

RECOMMENDATION SET 1

- **0. Dental Science**

- Trinity College Dublin
- **625** points
- **Overview:** Dental Science is the study of the oral cavity and the diseases associated with oral tissues. This five-year programme is designed to ensure that graduates can safely and effectively deliver the full range of primary dental care, including prevention, diagnosis and treatment of oral and dental diseases.
- **Why we recommended this:** Dental Science combines scientific inquiry and patient care with hands-on clinical skills, matching your high interest in healthcare and your aptitude for practical, analytical work.

- **1. Medicine**

- University College Cork
- **730** points
- **Overview:** The Medicine curriculum at UCC is rooted in the basic Medical Sciences of Anatomy, Physiology, and Biochemistry, but also places emphasis on clinical instruction. A distinctive feature is small-group, patient-centred teaching, in which students learn the skills of listening and communicating, history-taking and clinical examination.
- **Why we recommended this:** Medicine offers a path to apply rigorous scientific analysis and interpersonal communication skills to complex patient diagnosis and treatment, aligning with your strong healthcare focus.

- **2. Veterinary Medicine**

- University College Dublin
- **589** points
- **Overview:** This course will educate you to the best international standards in veterinary medicine and is accredited nationally by the Veterinary Council of Ireland (VCI), by the European Association of Establishments for Veterinary Education (EAEVE) and is one of only 6 veterinary schools in Europe currently accredited by the American Veterinary Medical Association (AVMA). The veterinary profession is concerned with the promotion of the health and welfare of animals of special importance to society. This involves the care of healthy and sick animals, the prevention, recognition, control and treatment of their diseases and of diseases transmitted from animals to man, and the welfare and productivity of livestock.
- **Why we recommended this:** Veterinary Medicine aligns with your interest in health and life sciences, allowing you to use analytical problem-solving and practical skills to care for animals.

- **3. Occupational Therapy**

- University College Cork
- **566** points
- **Overview:** Students on this broad and varied Occupational Therapy course study psychology, anatomy and physiology, as well as occupational therapy theories, assessment and treatment approaches and evidence-based practice.
- **Why we recommended this:** Occupational Therapy bridges the gap between scientific understanding and person-centered care, requiring the high-level practical problem-solving and empathy found in your profile.

- **4. Children's and General Nursing (Integrated)**

- University College Cork
- **522** points
- **Overview:** The Children's and General Nursing course will provide you with opportunities to develop knowledge and skills relevant to children's and general nursing practice, including independent and critical thinking and problem-solving. It will enable you to ensure that the nursing care you deliver is up-to-date and based on the best current evidence.
- **Why we recommended this:** Children's and General Nursing (Integrated) leverages your passion for healthcare, demanding a blend of evidence-based scientific knowledge and compassionate interaction to support diverse patient groups.

- **5. Midwifery**

- University College Dublin
- **509** points
- **Overview:** The focus and philosophy of midwifery in UCD is the promotion of women-centred care. The initial focus of this course is on the foundational knowledge and skills required for midwifery practice. Each year, these will be developed and strengthened through theory and practice. In your final year, you'll also focus on professional issues.
- **Why we recommended this:** Midwifery focuses on person-centered healthcare, utilizing your interest in life sciences and your ability to provide compassionate, hands-on support during critical life events.

- **6. Veterinary Nursing**

- University College Dublin
- **487** points
- **Overview:** The degree provides the graduate with not only a sound academic foundation but also the practical skills and competencies with which to build a solid career as a professional veterinary nurse. Students receive a high-quality education through lectures, tutorials and practical classes, as well as off-site work experience. The curriculum reflects the demands on the Irish veterinary nurse in practice by incorporating teaching on small animal (including exotics), farm animal and equine nursing.
- **Why we recommended this:** Veterinary Nursing provides a practical route into animal healthcare, combining scientific study with the hands-on clinical skills you are naturally inclined toward.

- **7. General Nursing**

- University College Cork
- **452** points
- **Overview:** Our BSc General Nursing programme will provide you with excellent opportunities to develop knowledge and skills relevant to professional General Nursing practice, including independent and critical thinking, and problem-solving. It will enable you to deliver nursing care that is up-to-date and based on the best current evidence.
- **Why we recommended this:** General Nursing utilizes your interest in healthcare and evidence-based science, focusing on patient care through a blend of analytical thinking and practical clinical expertise.

- **8. Mental Health Nursing**

- University College Cork
- **400** points

- **Overview:** Our Mental Health Nursing course will provide you with excellent opportunities to develop knowledge and skills relevant to professional Psychiatric Nursing practice, including independent and critical thinking, and problem solving. It will enable you to deliver nursing care that is up-to-date and based on the best current evidence.
 - **Why we recommended this:** Mental Health Nursing connects your interest in human behavior and healthcare, requiring strong interpersonal skills and analytical reasoning to support patients' psychological well-being.
- **9. Intellectual Disability Nursing**
 - University College Cork
 - **356** points
 - **Overview:** This Intellectual Disability Nursing course will provide you with excellent opportunities to develop knowledge and skills relevant to professional Intellectual Disability Nursing practice, including independent and critical thinking, and problem-solving. It will enable you to deliver nursing care that is up-to-date and based on the best current evidence.
 - **Why we recommended this:** Intellectual Disability Nursing combines healthcare knowledge with advocacy to provide specialized, evidence-based care, perfectly matching your profile's focus on helping others through science.
- **10. Biological and Biomedical Sciences**
 - Trinity College Dublin
 - **554** points
 - **Overview:** Biology is the study of living things; we explore how life first arose: the properties that distinguish living organisms from inert matter; how the vast diversity of life forms was generated; how organisms reproduce themselves; how they interact both with each other and with the environment. Biology is fundamental to understanding the world we live in and plays a huge role in medicine.
 - **Why we recommended this:** Biological and Biomedical Sciences suits your strong analytical nature, focusing on the scientific foundations of life and medicine through rigorous research and exploration.
- **11. Nutritional Sciences**
 - University College Cork
 - **518** points
 - **Overview:** The BSc Nutritional Sciences course focuses on the role of diet in health promotion and disease prevention (including problems related to undernutrition and over-nutrition, and especially the major non communicable chronic diseases such as cardiovascular disease, cancer, diabetes and osteoporosis). This is done from an individual, national and international perspective, using insights gained from a wide range of scientific disciplines.
 - **Why we recommended this:** Nutritional Sciences allows you to explore the scientific link between diet and health, using your analytical strengths to promote wellness and prevent disease.
- **12. Biomedical, Health and Life Sciences**
 - University College Dublin
 - **589** points
 - **Overview:** This course will appeal to those with a keen interest in science and in how research and technology can impact on human health. It is training scientists at the interface of science and medicine. You will learn how scientifically driven investigations can advance our knowledge of disease prevention, detection and treatment and translating these into clinical utility. The course will immerse you in modern medical and biological sciences and focus on the application of scientific developments. BHLS offers students a unique opportunity to complete a research project with a Principal Investigator in a biomedical research area that interests them and an opportunity to be involved in peer-reviewed publications.
 - **Why we recommended this:** Biomedical, Health and Life Sciences appeals to your love of research, focusing on how technological and clinical investigations can advance human health outcomes.
- **13. Psychology**
 - Trinity College Dublin
 - **577** points
 - **Overview:** The School of Psychology aims to offer a knowledge base and a set of skills that not only equip students for the many careers that exist in psychology, but also prepare students intellectually for other careers. Psychology is a branch of science that demands clear, rigorous thinking, numeracy and the ability to define, study and solve problems in complex, changing settings.
 - **Why we recommended this:** Psychology aligns with your interest in human behavior and your analytical mindset, offering a scientific framework to understand and solve complex mental health problems.
- **14. Social Sciences (Two Subject Combination)**
 - University College Dublin
 - **490** points
 - **Overview:** Social Sciences students explore society and how people behave as individuals and in groups. With the four-year Social Sciences degree, you choose DN700 at CAO and then select your preferred option below. Your subject choices are guaranteed. The Two Subjects Choice (TSC) options are: Archaeology; Economics; Geography; Information & Communication Studies, Philosophy; Politics and Sociology. There are options to change subject choices at the end of first year if you wish. You will gain a deep understanding of each subject you choose to study and develop real-world skills in research, communication and leadership. You may additionally apply for an internship, or study abroad for a year or a semester. You will learn to analyse, criticise and challenge beliefs and assumptions - including your own.
 - **Why we recommended this:** Social Sciences (Two Subject Combination) utilizes your rigorous curiosity to explore society, offering various pathways to research and understand complex structures and human interactions.
- **15. Sociology (Social Sciences Two Subject Combination)**
 - University College Dublin
 - **490** points
 - **Overview:** If you are interested in people, you will be interested in sociology. It is relevant for understanding almost every aspect of our lives. We are all part of society, we are connected with each other and we are affected by the people around us. In the same way, we shape the social context for others as well. Sociology provides you with the mindset and the research tools to observe the social world, make connections, understand differences, norms, cultures or inequalities.
 - **Why we recommended this:** Sociology (Social Sciences Two Subject Combination) provides tools to analyze cultural norms and inequalities, matching your desire to understand people through a structured, scientific lens.
- **16. Social Studies (Social Work)**
 - Trinity College Dublin
 - **456** points
 - **Overview:** Social work is a profession concerned with supporting and helping people in a variety of situations and settings. People who use social work services include young and adult offenders, children, families, older people, people with mental and physical illness and disability, homeless people, unemployed people, ethnic groups, Travellers and people with drug and alcohol problems. Ultimately, social work aims to support people to live more successfully, within their communities by helping them to find solutions to their problems.

- **Why we recommended this:** Social Studies (Social Work) connects your interest in welfare with a practical career, focusing on supporting vulnerable communities through empathetic intervention and problem-solving.
- **17. Early Years and Childhood Studies**
 - University College Cork
 - **368** points
 - **Overview:** This four-year degree will expose you to interdisciplinary perspectives from the Schools of Applied Psychology, Applied Social Studies and Education. The curriculum emphasises academic theory, research skills, and professional and reflective practice. It includes a broad range of perspectives on childhood, the child in society, child development, early years care and education, and child health.
 - **Why we recommended this:** Early Years and Childhood Studies merges interests in child development and welfare, using psychology and theory to support the well-being of children in society.
- **18. Social Science - Youth & Community Work**
 - University College Cork
 - **317** points
 - **Overview:** This degree combines an academic social science programme with a professionally accredited qualification in youth work. This professional qualification is recognised by employers in the Republic of Ireland, Northern Ireland, and throughout the UK. This programme offers a range of foundational subjects including Sociology, Social Policy, and Research Methods.
 - **Why we recommended this:** Social Science - Youth & Community Work balances academic research with practical community support, matching your interests in welfare and helping others within a professional framework.
- **19. Chemistry**
 - University College Dublin
 - **544** points
 - **Overview:** The UCD Science (DN200) course offers 27 degree subjects categorised into streams. Students can study subjects from more than one stream in first year. It is also possible for students to change their stream in first year. At the end of first year, students choose a minimum of two subjects to study in second year (for example Statistics and Mathematics or Genetics and Microbiology). Students will major in one of these subjects in third and fourth year.
 - **Why we recommended this:** Chemistry focuses on the fundamental scientific principles you enjoy, providing a rigorous analytical environment to explore chemical sciences and their practical applications.

RECOMMENDATION SET 2

- **0. Medicine**
 - Trinity College Dublin
 - **739** points
 - **Overview:** Medicine is a unique course in that students study a broad range of subjects with the primary goal of understanding the science and practice of healing. Medicine and healthcare are constantly evolving as new knowledge and therapies emerge to prevent and treat illness. Each day brings a new patient with new healthcare challenges.
 - **Why we recommended this:** Medicine aligns with your profound interest in healthcare, combining your strong analytical mind with a desire to help others through scientific practice and patient care.
- **1. Dental Science**
 - Trinity College Dublin
 - **625** points
 - **Overview:** Dental Science is the study of the oral cavity and the diseases associated with oral tissues. This five-year programme is designed to ensure that graduates can safely and effectively deliver the full range of primary dental care, including prevention, diagnosis and treatment of oral and dental diseases.
 - **Why we recommended this:** Dental Science fits your healthcare focus, requiring the precise technical skill and scientific reasoning necessary to diagnose and treat patients in a clinical setting.
- **2. Veterinary Medicine**
 - University College Dublin
 - **589** points
 - **Overview:** This course will educate you to the best international standards in veterinary medicine and is accredited nationally by the Veterinary Council of Ireland (VCI), by the European Association of Establishments for Veterinary Education (EAEVE) and is one of only 6 veterinary schools in Europe currently accredited by the American Veterinary Medical Association (AVMA). The veterinary profession is concerned with the promotion of the health and welfare of animals of special importance to society. This involves the care of healthy and sick animals, the prevention, recognition, control and treatment of their diseases and of diseases transmitted from animals to man, and the welfare and productivity of livestock.
 - **Why we recommended this:** Veterinary Medicine matches your healthcare focus and practical nature, requiring scientific expertise and empathy to promote the health and welfare of animals.
- **3. Pharmacy**
 - University College Cork
 - **602** points
 - **Overview:** A pharmacist is a healthcare team member specifically concerned with drugs and medicines. Pharmacy at UCC provides the confidence, skills, and knowledge to make a difference in the pharmaceutical arena.
 - **Why we recommended this:** Pharmacy is a natural fit for your interest in healthcare, blending chemical science and patient welfare to ensure the safe and effective use of medicines.
- **4. Biomedical, Health and Life Sciences**
 - University College Dublin
 - **589** points
 - **Overview:** This course will appeal to those with a keen interest in science and in how research and technology can impact on human health. It is training scientists at the interface of science and medicine. You will learn how scientifically driven investigations can advance our knowledge of disease prevention, detection and treatment and translating these into clinical utility. The course will immerse you in modern medical and biological sciences and focus on the application of scientific developments. BHLS offers students a unique opportunity to complete a research project with a Principal Investigator in a biomedical research area that interests them and an opportunity to be involved in peer-reviewed publications.
 - **Why we recommended this:** Biomedical, Health and Life Sciences caters to your interest in health research, allowing you to explore how scientific developments translate into real-world medical treatments.

- **5. Engineering with Management**

- Trinity College Dublin
- **613** points
- **Overview:** Engineering with Management is concerned with the analysis, design, improvement, installation, and management of integrated systems of people, finance, materials and equipment. Our graduates have the technical skills common to all excellent engineers, with this knowledge augmented by an understanding of the commercial and industrial environment and the ability to generate innovative solutions to the problems of the world.
- **Why we recommended this:** Engineering with Management provides a platform to apply your problem-solving skills to technical systems while managing the human and financial aspects of integrated projects.

- **6. Economics and Finance**

- University College Dublin
- **625** points
- **Overview:** If you have a strong interest or ability in economics, maths and statistics, this degree provides everything you need for a future career in the areas of financial economics, banking and finance. Recognised as one of the premier degrees in its field in Ireland and internationally, it equips students with outstanding expertise in quantitative methods, analytical skills and a rigorous preparation in economics and finance. The skills that the course develops are valuable on their own in many careers and provide the essential background for learning Economics and Finance.
- **Why we recommended this:** Economics and Finance utilizes your strong analytical capabilities to study social systems, helping you understand how quantitative methods and statistics solve complex financial problems.

- **7. Philosophy, Political Science, Economics and Sociology**

- Trinity College Dublin
- **581** points
- **Overview:** Philosophy, Political Science, Economics and Sociology (PPES), offers a coherent and integrated introduction to the study of social sciences and philosophy. It brings together some of the most important approaches to understanding society and, in doing so, develops skills for a range of future careers and activities.
- **Why we recommended this:** Philosophy, Political Science, Economics and Sociology provides an integrated way to analyze society, utilizing your inquisitive mindset to understand complex social dynamics and institutional behaviors.

- **8. Economics/Geography**

- Trinity College Dublin
- **578** points
- **Overview:** EconomicsAny society has to address the problem of how and what to produce for its material survival, and how the goods and services that are produced should be distributed among its population. Economists explore how people and institutions behave and function when producing, exchanging and using goods and services. GeographyGeography is the study of Earth's landscapes, peoples, places and environments. Fundamentally it is about the world in which we live. Geography offers a 21st century education by uniquely bridging the social sciences (human geography) with the natural sciences (physical geography). Geography also covers increasingly important environmental issues where humans affect physical environments and vice versa.
- **Why we recommended this:** Economics/Geography appeals to your interest in social and physical sciences, examining how humans interact with their environments and manage resources.

- **9. Economics/History**

- Trinity College Dublin
- **578** points
- **Overview:** EconomicsAny society has to address the problem of how and what to produce for its material survival, and how the goods and services that are produced should be distributed among its population. Economists explore how people and institutions behave and function when producing, exchanging and using goods and services. HistoryThe four-year programme allows students to lay firm foundations in the first two years, with wide-ranging modules on medieval and modern history, Irish, European, American, environmental and global history, as well as on historical methods and approaches. The final two years of the programme allow students the chance to study several specialist modules in-depth and to undertake independent research on a subject of their own choice.
- **Why we recommended this:** Economics/History allows you to investigate the survival of societies by blending historical context with the study of how goods and services are distributed.

- **10. Actuarial & Financial Studies**

- University College Dublin
- **613** points
- **Overview:** Studying UCD Actuarial & Financial Studies (BAFS) degree requires a multidisciplinary education in fields such as mathematics, economics, finance, statistics, risk management and professionalism. It takes a combination of strong analytical skills, business knowledge and understanding of human behaviour to design and manage programmes that control risk and guarantee sufficient funds for the insurance and pension sectors. Actuaries have traditionally worked mostly in the insurance and pensions industries but are increasingly moving into wider fields, where they can employ their range of skills. The course also opens up options to work in finance, investment and trading.
- **Why we recommended this:** Actuarial & Financial Studies matches your analytical strengths, using mathematical models and risk assessment to manage complex financial and insurance sectors.

- **11. Law/History**

- Trinity College Dublin
- **613** points
- **Overview:** Law The law degree will appeal to you if you are interested in society and how it works, how we regulate the relationships between people. Given the wide range of legal modules, the degree attracts students with a broad range of interests. Those interested in politics are attracted to subjects such as constitutional law. History The History programme introduces students to the diversity of historical studies, which include modules covering medieval and modern periods, including Irish, European, and American history, as well as some modules exploring the skills and methods which historians use, and the kinds of debates in which historians engage.
- **Why we recommended this:** Law/History suits your investigative curiosity, allowing you to explore the evolution of society through historical research and the logical interpretation of legal frameworks.

- **12. Mathematics/Modern Language**

- Trinity College Dublin
- **613** points
- **Overview:** MathematicsMathematics is a broad and diverse subject which is used to model, analyse and understand several applications in the physical and biological sciences, engineering, management science, economics and finance. Its numerous applications are naturally interwoven with the underlying theory which is essential in developing one's logical reasoning, quantitative skills and problem-solving techniques. You can choose between German, Irish, Italian, Russian and Spanish. Apart from French and Irish all languages can be studied from both advanced and beginners level.
- **Why we recommended this:** Mathematics/Modern Language bridges logical reasoning and communication, challenging you to master complex

systems while developing linguistic fluency and analytical depth.

- **13. Mathematics/Music**

- Trinity College Dublin
- **613** points
- **Overview:** Mathematics is a broad and diverse subject which is used to model, analyse and understand several applications in the physical and biological sciences, engineering, management science, economics and finance. Its numerous applications are naturally interwoven with the underlying theory which is essential in developing one's logical reasoning, quantitative skills and problem-solving techniques. Music Studying music will allow you to engage with a range of traditions to acquire a profound understanding of how music works in theory and in creative practice. If you are interested in understanding music's place in society, developing music technology skills, writing music, or improving your skills as an informed performer, this course could be for you.
- **Why we recommended this:** Mathematics/Music combines your aptitude for logical patterns with a deeper understanding of theory, fostering both creative practice and quantitative reasoning skills.

- **14. Mathematics/Philosophy**

- Trinity College Dublin
- **613** points
- **Overview:** Mathematics is a broad and diverse subject which is used to model, analyse and understand several applications in the physical and biological sciences, engineering, management science, economics and finance. Its numerous applications are naturally interwoven with the underlying theory which is essential in developing one's logical reasoning, quantitative skills and problem-solving techniques. Philosophy This course offers the opportunity to engage in depth with questions of metaphysics (about the fundamental nature of reality), epistemology (the theory of knowledge), ethics (theories of right and wrong), political philosophy (the nature of the just state), philosophy of religion (reasoning about God), philosophy of mind (questions about thought, language and reason) and various other areas.
- **Why we recommended this:** Mathematics/Philosophy challenges your intellect to explore the fundamental nature of reality and ethics through rigorous logical reasoning and deep analytical inquiry.

- **15. Global Business**

- Trinity College Dublin
- **602** points
- **Overview:** The Global Business degree is a unique programme, designed for students who wish to focus on business from the very beginning of their degree. The degree is both innovative and practical with a strong focus on experiential learning. Trinity Business School places an emphasis on blended learning, where academic excellence meets industry experience with a keen focus on how business operates within the global economy.
- **Why we recommended this:** Global Business provides a practical pathway to analyze the global economy, using your inquisitive nature to understand how businesses operate in international markets.

- **16. Law and French**

- Trinity College Dublin
- **589** points
- **Overview:** The Law and French degree programme offers a unique opportunity to study core and specialised legal modules but also the language, culture and political systems of France. Students must undertake an Erasmus year in France, exposing them to the law of that legal system.
- **Why we recommended this:** Law and French combines legal analysis with cultural immersion, allowing you to study international legal systems while developing professional communication skills.

- **17. Music Education**

- Trinity College Dublin
- **656** points
- **Overview:** If you love sharing music, already have a competent standard of music performance, and wish to combine these qualities with a teaching career, then this course is ideally suited to you. Whether your interests are primarily academic or practical, your experience of this vast and rich discipline will be greatly advanced. As an academic study, music fosters independence of thought, creativity and critical and analytical skills. This course offers opportunities to perform music, to share music with others via teaching and performing, and to conduct a number of different ensembles.
- **Why we recommended this:** Music Education connects your interest in education with social interaction, allowing you to share knowledge and mentor others through teaching and ensemble performance.

- **18. Management Science and Information Systems Studies**

- Trinity College Dublin
- **625** points
- **Overview:** Students learn how to use techniques from disciplines such as business, mathematics, computer science, statistics and management science to solve real world problems. There is also a firm emphasis on interpersonal skills such as verbal communication, interviewing, teamwork and report writing.
- **Why we recommended this:** Management Science and Information Systems Studies leverages your investigative skills to solve real-world business problems using mathematics, statistics, and logical reasoning techniques.

- **19. Law/Business Studies**

- Trinity College Dublin
- **613** points
- **Overview:** LawThe law degree will appeal to you if you are interested in society and how it works, how we regulate the relationships between people. Given the wide range of legal modules, the degree attracts students with a broad range of interests. Business StudiesThis four year programme offers the opportunity to focus upon the many areas of overlapping interest between the two disciplines, for example, the structure of companies and other forms of business organisation, competition law and regulation of markets, consumer law, labour law, finance and financial markets, taxation, the protection of intellectual property and international perspectives on law and business.
- **Why we recommended this:** Law/Business Studies offers a chance to analyze the regulation of society and markets, appealing to your curiosity about how legal structures and commercial organizations operate.
