

RECOMMENDATION SET 1

- **0. Biomedical Science**

- Maynooth University
- **0** points
- **4 Years**
- **Overview:** Students learn how to use analytical and technical procedures to monitor and improve human health and to investigate disease processes. The degree is broadly similar to the pre-clinical component of a medical degree. Students also learn how to ask questions, make observations, and analyse evidence in theory work and through practical laboratory sessions- and to present and communicate findings clearly while developing computer literacy and research skills.

- **1. Food Science and Human Nutrition**

- Maynooth University
- **440** points
- **4 Years**
- **Overview:** This programme is for students who wish to work in the area of food production, quality assurance, nutrition, and product development, with a focus on future foods and the role of food in the health of people, in Ireland and globally. This course provides students with a broad science-based education, with specialist content on the future of food development, human nutrition, and the role of food and healthy living, and also explores the social and global challenges around food security.

- **2. Pharmaceutical and Biomedical Chemistry**

- Maynooth University
- **434** points
- **4 Years**
- **Overview:** This course is suited to those who wish to specialise in chemistry for the pharmaceutical and biomedical industries. Pharmaceutical Chemistry is a very important branch of Chemistry that is applied to the synthesis and formulation of new therapeutic drugs as well as the manufacture of medicinal compounds on a large scale. In this programme you will receive an excellent education in chemistry (physical chemistry, organic chemistry, inorganic chemistry), and have the opportunity to specialise in pharmaceutical chemistry, medicinal chemistry and bioinorganic chemistry.

- **3. Agricultural Science - No Preference**

- University College Dublin
- **431** points
- **4 Years**
- **Overview:** If you are interested in studying Agricultural Science but are not certain of which area to specialise in, you can select the 'No Preference (NPF)' option on your CAO form. Then, during your first year at UCD, you can choose your area of specialisation. Once you receive an offer on the Agricultural Science programme (DN250) you will be guaranteed a place in any of the 11 specialisations from second year. Alternatively, if you know which of the 11 programmes you would like to specialise in, you can select this on your CAO application.

- **4. Linguistics**

- University College Dublin
- **420** points
- **3 Years**
- **Overview:** Language is something we take for granted but it is one of the most important skills we possess as human beings. It is hard to imagine any activity that does not involve language in some way. This makes linguistics (the scientific study of language) one of the most intriguing and interesting subjects.

- **5. International Business and Global Cultures**

- Maynooth University
- **400** points
- **3 or 4 Years**
- **Overview:** An essential challenge for businesses in Ireland is how they can connect the capabilities of our workforce to contribute to solutions for people who are largely in markets outside Ireland, across the EU and the wider global community. Business needs graduates who can both understand the fundamentals of how to create value for customers and how to translate them into solutions and services that fit the needs of diverse cultures.

- **6. Business and Languages**

- Maynooth University
- **397** points
- **4 Years**
- **Overview:** You choose one business subject (Accounting*, Business Management, International Business or Marketing) and one language (Chinese, French, German or Spanish). You do not need to have studied either business or your chosen language for the Leaving Certificate to take this degree.

- **7. Modern Languages**

- University College Dublin

- **410** points
- **4 Years**
- **Overview:** Modern Languages combines advanced language skills with the literature, history and culture of the countries where these languages are spoken. It also focuses on developing critical faculties and cross-cultural awareness. This degree is for those of you who want to concentrate on at least two modern foreign languages, explore the connections between them, spend a year abroad and graduate with a BA International degree.

- **8. Celtic Civilization**

- University College Dublin
- **420** points
- **3 Years**
- **Overview:** The Celtic Civilisation course focuses on the cultures of the Celtic-speaking peoples in Ireland, Britain and beyond. It encompasses diverse elements in folklore, literature, history to allow students to pursue particular fields of interest. This gives students the opportunity to acquire a broad overview of the cultures of the Celtic-speaking peoples and also to develop more specific areas of expertise. Many of the Celtic Civilisation modules are good choices as electives for those interested in Celtic culture in Ireland and beyond.

- **9. English**

- University College Dublin
- **420** points
- **3 Years**
- **Overview:** Study English at UCD if you are an enthusiastic reader, writer and thinker who loves literature. Strengthen your understanding of narrative, poetic and dramatic forms. Enlarge your critical vocabulary and historical awareness. Explore how the study of literature intersects with questions of gender, politics and cultural theory. Learn how to research a topic, evaluate evidence and present your ideas in a cogent, elegant fashion.

- **10. Irish Folklore**

- University College Dublin
- **420** points
- **3 Years**
- **Overview:** Studying folklore involves the exploration of traditional popular culture, in the past and in the present. It is primarily concerned with the history and culture of ordinary people, and with the evolution and role of tradition at a vernacular level. As an academic discipline, Folklore (or ethnology) involves the exploration of oral literature, social tradition, material culture, popular belief and practice, as well as traditional music and song. It explores the dynamics of communal memory and of culture as a collective phenomenon. It

looks at the nature of popular tradition and the way in which such tradition is transmitted, usually outside of official channels and often across vast distances of time and space.

- **11. Irish Studies**

- University College Dublin
- **420** points
- **3 Years**
- **Overview:** Irish Studies is an interdisciplinary programme that examines the variety and diversity of Irish history, society, cultural practice and the complex processes through which Ireland and Irish identities have been constructed.

- **12. Biological and Geographical Sciences**

- Maynooth University
- **419** points
- **4 Years**
- **Overview:** The core areas in Biology and Geography covered by the programme provide foundation knowledge across both disciplines, and explore in different ways how the dynamic planet Earth supports such a diversity of climates, landforms, ecosystems and species, and also how human activity is impacting on all of these from a local to a global scale.

- **13. Physics with Astrophysics**

- Maynooth University
- **375** points
- **4 Years**
- **Overview:** Astronomy is the scientific study of celestial objects (stars, planets, comets, asteroids) and phenomena (cosmic radiation, dark energy). This course provides a solid grounding in physics and astrophysics, as well as planetary science, astronomy, astronomical instrumentation and techniques, and cosmology.

- **14. Geography**

- University College Dublin
- **420** points
- **3 Years**
- **Overview:** Geography involves the study of subjects such as the impact of societies on the quality of the environment; geographical approaches to the study of world population; climate change; migration; the relationship between culture, landscape transformation and politics. No prior knowledge of geography is assumed. Geography can be studied as a Joint Major or Minor subject through DN520 or DN700, or as part of selected courses in DN700.

- **15. Mathematical Physics**

- Maynooth University
- **300** points
- **3 Years**
- **Overview:** The study of mathematical physics covers the entire physical world, from the microscopic quantum realm to the astrophysics of the universe. You will learn how to analyse and explain complex issues, to identify problems, work out solutions and to enter into the unknown with an open, critical inquiring mind. As well as being introduced to the major ideas and developments in theoretical physics.

- **16. Agri-Environmental Sciences – Agricultural Science**

- University College Dublin
- **431** points
- **4 Years**
- **Overview:** Agri-Environmental Sciences programme is an applied science degree that will equip you with the knowledge and skills necessary to make a meaningful impact in the fields of agriculture and environmental management. Through a combination of classroom learning, practical field experience, and professional work placements, you will gain a deep understanding of rural environmental issues, sustainable agriculture practices, and the policies and schemes that protect our natural resources.

- **17. Forestry – Agricultural Science**

- University College Dublin
- **431** points
- **4 Years**
- **Overview:** UCD Forestry students learn how to create habitats, provide spaces for recreation, and produce timber – a resource that can simultaneously store carbon and substitute for concrete and steel. Students will gain skills in forest planning, remote sensing, the use of geographical information systems and forest modelling while developing the capacity for life-long learning that enables them to stay abreast of developments in policy, technology and the sciences that underpin forestry practice. The combination of science and business modules, complemented by a work experience placement, ensures that UCD Forestry graduates are in high demand across the sector.

- **18. International Development**

- Maynooth University
- **300** points
- **3 Years**
- **Overview:** As a student of International Development in the Bachelor of Arts degree you will explore issues such as globalisation, climate change, food security, poverty, conflict, disasters and other humanitarian emergencies, human rights, health, education, gender, inequality and empowerment, from an international development perspective.

- **19. Animal and Crop Production - Agricultural Science**

- University College Dublin
- **431** points
- **4 Years**
- **Overview:** UCD's Animal and Crop Production programme offers a comprehensive education in the science and business of animal and crop production. You will learn about the development and improvement in farm animal and crop production, gain broad knowledge on growth, physiology, nutrient utilisation, agribusiness, agri-environment and develop the skills to create economical and sustainable agricultural production systems. Plus, you will gain communication and IT skills to help you stay up-to-date on evolving technical, economic, and regulatory frameworks.

RECOMMENDATION SET 2

- **0. Economics**

- Maynooth University
- **445** points
- **3 Years**
- **Overview:** As a BSc Economics student, you will learn to take a scientific evidence-based approach to understand, critique and create policies to combat economic and social problems. Employers in all sectors from government to financial services have a growing need for economists who can analyse and interpret data. This requires a strong grounding in analytical and quantitative methods. With an emphasis on independent research, this programme is designed to allow you to flourish based on your individual curiosity and strengths.

- **1. General Nursing**

- University College Dublin
- **444** points
- **4 Years**
- **Overview:** This degree prepares you to become a Registered General Nurse who can work collaboratively to successfully manage the complex healthcare needs of the adult population. You will study the theory and practice of nursing in a fully integrated way, establishing a strong foundation for your future career. Your lectures, workshops and tutorials are delivered on our Belfeld campus, while practice placements will enhance your learning and develop your nursing skills.

- **2. Education (Education and Gaelige)**

- University College Dublin
- **442** points
- **4 Years**
- **Overview:** This course blends language learning and initial teacher education to prepare you to work as a language teacher in post-primary schools in the Irish education system. You can choose to study two languages from modern languages (French, Spanish, German or Italian) and/or an Ghaeilge. Alternatively, you can choose to major in an Ghaeilge alone. You will engage in modules to develop your language proficiency skills, building your linguistic competencies while also learning about the culture and literature of the language(s) through an interrogation of key texts. You will also develop your skills as a teacher as you progress through the course, undertaking modules in foundation disciplines (history/sociology/psychology/philosophy of education, curriculum studies) and professional studies (communication skills, digital learning, research) while also engaging in school placement (in both primary and post-primary schools).

- **3. Education (Education and Modern Languages)**

- University College Dublin
- **442** points
- **4 Years**
- **Overview:** This course blends language learning and initial teacher education to prepare you to work as a language teacher in post-primary schools in the Irish education system. You can choose to study two languages from modern languages (French, Spanish, German or Italian) and/or an Ghaeilge. Alternatively, you can choose to major in an Ghaeilge alone. You will engage in modules to develop your language proficiency skills, building your linguistic competencies while also learning about the culture and literature of the language(s) through an interrogation of key texts. You will also develop your skills as a teacher as you progress through the course, undertaking modules in foundation disciplines (history/sociology/psychology/philosophy of education, curriculum studies) and professional studies (communication skills, digital learning, research) while also engaging in school placement (in both primary and post-primary schools).

- **4. Education (Education, Gaeilge and Modern Languages)**

- University College Dublin
- **442** points
- **4 Years**
- **Overview:** This course blends language learning and initial teacher education to prepare you to work as a language teacher in post-primary schools in the Irish education system. - **5. Food Science and Human Nutrition**

- Maynooth University
- **440** points
- **4 Years**
- **Overview:** This programme is for students who wish to work in the area of food production, quality assurance, nutrition, and product development, with a focus on future foods and the role of food in the health of people, in Ireland and globally. this course provides students with a broad science-based education, with specialist content on the future of food development, human nutrition, and the role of food and healthy living, and also explores the social and global challenges around food security.

- **6. Pharmaceutical and Biomedical Chemistry**

- Maynooth University
- **434** points
- **4 Years**
- **Overview:** This course is suited to those who wish to specialise in chemistry for the pharmaceutical and biomedical industries. Pharmaceutical Chemistry is a very important branch of Chemistry that is applied to the synthesis and formulation of new therapeutic drugs as well as the manufacture of medicinal compounds on a large scale. In this programme you will receive an excellent education in chemistry (physical chemistry, organic chemistry, inorganic chemistry), and have the opportunity to specialise in pharmaceutical chemistry, medicinal chemistry and bioinorganic chemistry.

- **7. Social Policy & Sociology**

- University College Dublin
- **432** points
- **3 Years**
- **Overview:** The Bachelor of Social Science (BSocSc) at University College Dublin is the premier honours degree of its kind in Ireland. It is the standard qualification for those working in policy making and social services and recently celebrated its fiftieth anniversary. If you are interested in exploring how societies, communities and families work and wish to make a difference to the world, affect cultural change, contribute to public service or corporate responsibility, then this course is for you

- **8. Agri-Environmental Sciences - Agricultural Science**

- University College Dublin
- **431** points
- **4 Years**
- **Overview:** Agri-Environmental Sciences programme is an applied science degree that will equip you with the knowledge and skills necessary to make a meaningful impact in the fields of agriculture and environmental management. Through a combination of classroom learning, practical field experience, and professional work placements, you will gain a deep understanding of rural environmental issues, sustainable agriculture practices, and the policies and schemes that protect our natural resources.

• **9. Agricultural Science - No Preference**

- University College Dublin
- **431** points
- **4 Years**
- **Overview:** If you are interested in studying Agricultural Science but are not certain of which area to specialise in, you can select the 'No Preference (NPF)' option on your CAO form. Then, during your first year at UCD, you can choose your area of specialisation. Once you receive an offer on the Agricultural Science programme (DN250) you will be guaranteed a place in any of the 11 specialisations from second year. Alternatively, if you know which of the 11 programmes you would like to specialise in, you can select this on your CAO application.

• **10. Agricultural Systems Technology - Agricultural Science**

- University College Dublin
- **431** points
- **4 Years**
- **Overview:** Agricultural Systems Technology is aimed at students who wish to learn how to build, develop, and manage technology for the agriculture sector. Students will gain a deep understanding of how to use technology in order to improve and enhance sustainability, efficiency and reliability in farming and food production. You will take classes in engineering, science, mathematics and data science. Upon completing the course, you will be uniquely equipped to build, develop and manage technologies such as computer systems, networks, data management and sensors, machinery systems and precision agriculture.

• **11. Animal and Crop Production - Agricultural Science**

- University College Dublin
- **431** points
- **4 Years**
- **Overview:** UCD's Animal and Crop Production programme offers a comprehensive education in the science and business of animal and crop production. You will learn about the development and improvement in farm animal and crop production, gain broad knowledge on growth, physiology, nutrient utilisation, agribusiness, agri-environment and develop the

skills to create economical and sustainable agricultural production systems. Plus, you will gain communication and IT skills to help you stay up-to-date on evolving technical, economic, and regulatory frameworks.

- **12. Animal Science – Agricultural Science**

- University College Dublin
- **431** points
- **4 Years**
- **Overview:** UCD's Animal Science programme is a four-year degree that delves into the applied sciences necessary for understanding how animals function and the principles of livestock production. You will explore the growth, development, and behaviour of domestic animals, and the fundamentals of sustainable animal production systems. Modules include animal biology, genetics, biotechnology, nutrition, and more.

- **13. Animal Science – Equine – Agricultural Science**

- University College Dublin
- **431** points
- **4 Years**
- **Overview:** Animal Science – Equine allows those with a passion for horses, the equine industry or equine science to pursue these interests at third level and still maintain a broad range of future career options within agriculture. A highlight of the degree is the opportunity to participate in a 5-month international work placement within a leading Thoroughbred or Sport Horse organisation. The degree provides the scientific knowledge and transferable skills necessary for professional leadership roles within many aspects of the Agriculture and Equine industries.

- **14. Crop Science – Agricultural Science**

- University College Dublin
- **431** points
- **4 Years**
- **Overview:** As a student in our Crop Science Programme, you will learn about the science, production, and management of crops from genes to fields. With a focus on agronomy, you will explore crop production and soil management to improve yield and quality. Our expert faculty members are active researchers in the rapidly developing field of agriculture and agribusiness. In addition to a strong foundation in basic sciences, you will have the opportunity to study emerging crop pathogens, organic agriculture, climate and soils, and plants and diets.

- **15. Dairy Business – Agricultural Science**

- University College Dublin

- **431** points
- **4 Years**
- **Overview:** This degree is designed to equip future leaders of the dairy industry with the scientific, technical and business skills needed to succeed in this exciting industry. The first two years provide a strong foundation in business, science, mathematics, and technology-related modules, followed by relevant applied sciences, business, and communication modules.

- **16. Food and Agribusiness Management - Agricultural Science**

- University College Dublin
- **431** points
- **4 Years**
- **Overview:** During the Food & Agribusiness Management degree, you'll learn how the principles of economics and business management apply to farming, food production and marketing. You'll gain an understanding of how the Irish and international food systems deliver food products and services that people want, and how farmers and food manufacturers can produce profitably, while also taking care of the natural environment. The four-year degree provides a unique opportunity to understand both business and science, focusing on the agri-food sector – Ireland's largest indigenous industry. You will learn skills that can be used across a wide range of jobs both within and outside the agri-food sector.

- **17. Food Business with Chinese Studies - Agricultural Science**

- University College Dublin
- **431** points
- **4 Years**
- **Overview:** Our Food Business with Chinese Studies programme prepares graduates with the skills urgently required by the Irish food industry to succeed in the changing market landscape. With Brexit and the uncertainty surrounding the UK market, it is critical for the industry to expand exports to emerging markets, particularly China. This requires improved foreign language capability, which we provide through a combination of fundamental food science and food business management modules, and language, cultural, and target market-oriented courses. In third year, students study at Renmin University of China, taking Chinese language courses and other relevant modules, while experiencing the diverse culture and vibrant economic growth of China.

- **18. Forestry - Agricultural Science**

- University College Dublin
- **431** points
- **4 Years**
- **Overview:** UCD Forestry students learn how to create habitats, provide spaces for recreation, and produce timber – a resource that can simultaneously store carbon and

substitute for concrete and steel. Students will gain skills in forest planning, remote sensing, the use of geographical information systems and forest modelling while developing the capacity for life-long learning that enables them to stay abreast of developments in policy, technology and the sciences that underpin forestry practice. The combination of science and business modules, complemented by a work experience placement, ensures that UCD Forestry graduates are in high demand across the sector.

- **19. Horticulture - Agricultural Science**

- University College Dublin
- **431** points
- **4 Years**
- **Overview:** With a focus on environmentally friendly practices and innovative technologies, this degree equips you with the knowledge and skills to become a competent and confident leader in the horticulture community. By studying core science subjects and specialist horticulture and environment modules, you will gain an understanding of sustainable management of food and ornamental plant production, knowledge of protecting and enhancing biodiversity and habitats, designing and managing landscapes, and the benefits of horticultural therapy.
