

# RECOMMENDATION SET 1

---

- **0. Fine Art**

- TU Dublin - Grangegorman
- **701** points
- **4 Years**
- **Overview:** The BA in Fine Art is designed for students who wish to work as cultural producers in the Fine Art sector. The course is focused primarily on acquiring the knowledge and skills that are needed to operate as a visual artist in a competitive environment, nationally and internationally. There's a strong emphasis on developing skills acquisition, creative intelligence and conceptual and critical thinking abilities, which are integrated with modules in Critical Theory and Professional Practice.

- **1. Interior Design**

- TU Dublin - Grangegorman
- **862** points
- **4 Years**
- **Overview:** This course is all about the art or process of designing the interior decoration of a room or building, and how we experience spaces and the objects in them. It's a powerful, essential part of our daily lives that affects how we live, work and play. Exciting recreational environments, unique domestic spaces, functional workplaces, inspiring retail spaces, that's interior design at work.

- **2. Drama and Theatre Studies**

- Trinity College Dublin
- **506** points
- **4 Years**
- **Overview:** Theatre Studies encompass all the arts that make up the live experience we call theatre - including costume, lighting, sound, devising, directing, design, dramaturgy and playwriting. We also study the meaning behind theatre, analysing culture and politics, space and place, the presence of audience and performers, and the use of digital technology.

- **3. Music**

- Trinity College Dublin
- **476** points
- **4 Years**

- **Overview:** Studying music will allow you to engage with a range of traditions to acquire a profound understanding of how music works in theory and in creative practice. If you are interested in understanding music and its place in society, developing music technology skills, writing music, or improving your skills as an informed performer, this course could be for you. A music degree will prepare you for a wide range of careers in the creative arts, journalism, music production, arts management, research, and teaching.

- **4. Mathematics/Music**

- Trinity College Dublin
- **613** points
- **4 Years**
- **Overview:** Mathematics Mathematics is a broad and diverse subject which is used to model, analyse and understand several applications in the physical and biological sciences, engineering, management science, economics and finance. Its numerous applications are naturally interwoven with the underlying theory which is essential in developing one's logical reasoning, quantitative skills and problem-solving techniques. Music Studying music will allow you to engage with a range of traditions to acquire a profound understanding of how music works in theory and in creative practice. If you are interested in understanding music's place in society, developing music technology skills, writing music, or improving your skills as an informed performer, this course could be for you.

- **5. Design - Visual Communication**

- TU Dublin - Grangegorman
- **654** points
- **4 Years**
- **Overview:** The work of the Design - Visual Communication graduate is all about breathing life into images, text and concepts, turning them on their head and communicating them in a fresh way to a wide audience. This four-year course will suit you if you wish to become a graphic designer, illustrator, typographer or digital media designer.

- **6. Commercial Modern Music**

- TU Dublin - Grangegorman
- **585** points
- **4 Years**
- **Overview:** This four-year course has been designed for guitarists, bass players, drummers, vocalists, songwriters, music producers and those running commercial music projects who want to gain a Level 8 qualification in modern music, while at the same time fulfilling their creative and commercial potential. It will encourage you to hone your live performance skills and recording studio technical knowledge while also developing your career goals, which may include being a professional performer, professional songwriter or producer, music manager or publisher, academic researcher or teacher.

- **7. Music/Philosophy**

- Trinity College Dublin
- **527** points
- **4 Years**
- **Overview:** MusicStudying music will allow you to engage with a range of traditions to acquire a profound understanding of how music works in theory and in creative practice. If you are interested in understanding music's place in society, developing music technology skills, writing music, or improving your skills as an informed performer, this course could be for you. Philosophy (Restricted)This course offers the opportunity to engage in depth with questions of metaphysics (about the fundamental nature of reality), epistemology (the theory of knowledge), ethics (theories of right and wrong), political philosophy (the nature of the just state), philosophy of religion (reasoning about God), philosophy of mind (questions about thought, language and reason) and various other areas. We teach courses which have both systematic and historical emphases and in the higher years students can choose options and get to write a thesis on a topic of their own choice.

- **8. Computer Science**

- Trinity College Dublin
- **535** points
- **4 Years**
- **Overview:** Computer Science is concerned with the study of everything to do with computers and our relationship with them. Computer scientists are critical to the efficient running of modern societies, dealing with health, security, banking and finance, transportation, and now increasingly our interaction through social networks. Computing professionals deal with theoretical issues, solve complex problems, deal with matters of ethics and with society at large. Theoretical issues in computer science relate to the abstract notions of computation and information.

- **9. Computer Science, Linguistics and a Language**

- Trinity College Dublin
- **512** points
- **4 Years**
- **Overview:** B.A. (Mod) in Computer Science, Linguistics and a Language. CSLL combines the study of Computer Science; a natural language, either Spanish, French or Irish; and Linguistics. The computer science component of CSLL seeks to impart a mastery of the techniques and technologies that lie behind what you see on the screen of one of today's computers, giving you a full understanding the computer applications of today, and enabling you to participate in the development of the applications of the future.

- **10. Linguistics/Computer Science**

- Trinity College Dublin
- **498** points
- **4 Years**
- **Overview:** The combined study of Computer Science and Linguistics yields opportunities for graduates to specialise in computational speech and language processing or text analysis. Linguistics often appeals to students who are curious about language as one of the most fascinating aspects of human knowledge and behaviour. Linguistics is also appealing to those who enjoy detailed, problem-solving analysis and careful argumentation. Students of Linguistics engage in evidence-based analysis of language, acquiring skills and techniques that allow investigation of different aspects of language structure such as sound, words and grammar. This involves key transferable skills in problem solving and critical thinking.

- **11. Computer Science (International)**

- TU Dublin - Grangegorman
- **351** points
- **4 Years**
- **Overview:** This course will provide you with the knowledge and skills to work as a global software engineer or as an application developer, able to develop as needed in an ever-changing global industry. On graduation, you'll be qualified to work in the international IT industry in a wide range of computer roles. You'll have a strong foundation in such areas as Internet development, cloud computing, mobile software, enterprise systems, artificial intelligence and games technology.

- **12. Computer Science (Infrastructure)**

- TU Dublin - Grangegorman
- **346** points
- **4 Years**
- **Overview:** Computer Science (Infrastructure) is about developing software and infrastructure for applications ranging from those on smart devices to those in global corporations. This course provides the skills required to build data centres and networks, and to develop software securely, individually and in teams. You'll gain a working knowledge of the components of a computer and a network, become familiar with the components of an operating system, and learn to administrate large distributed systems.

- **13. Game Design**

- TU Dublin - Grangegorman
- **402** points
- **4 Years**
- **Overview:** This four-year course focuses on the creation and study of games. It covers the design and development of digital and analogue games, including PC, mobile, Web, card and

board games. Topics include in-depth analysis of games, practical hands-on development experience and theoretical game studies. Along the way, you'll also learn important industry skills such as programming, game design, digital media asset creation, project management and game publishing.

- **14. Linguistics/Classical Languages**

- Trinity College Dublin
- **498** points
- **4 Years**
- **Overview:** Linguistics Students of Linguistics engage in evidence-based analysis of language, acquiring skills and techniques that allow investigation of different aspects of language structure such as sound, words and grammar. This involves key transferable skills in problem solving and critical thinking. Classical Languages The study of Classical Languages is concerned with the language, literature and thought of either Ancient Greece or Ancient Rome. You will choose to study either Greek or Latin. Through the reading of literature in the original language and the examination of key aspects of ancient history, you will develop a thorough knowledge of the classical world and a critical approach to textual and material culture.

- **15. Linguistics/Modern Language**

- Trinity College Dublin
- **498** points
- **4 Years**
- **Overview:** Linguistics Students of Linguistics engage in evidence-based analysis of language, acquiring skills and techniques that allow investigation of different aspects of language structure such as sound, words and grammar. This involves key transferable skills in problem solving and critical thinking. Modern Language Within the Modern Languages programme you study two modern European languages. It is the most intensive exposure to languages and cultures that Trinity College has to offer. You can choose between French, German, Irish, Italian, Russian and Spanish. Apart from French and Irish all languages can be studied from both advanced and beginners level

- **16. Mathematics/Modern Language**

- Trinity College Dublin
- **613** points
- **4 Years**
- **Overview:** Mathematics Mathematics is a broad and diverse subject which is used to model, analyse and understand several applications in the physical and biological sciences, engineering, management science, economics and finance. Its numerous applications are naturally interwoven with the underlying theory which is essential in developing one's logical reasoning, quantitative skills and problem-solving techniques. You can choose between

German, Irish, Italian, Russian and Spanish. Apart from French and Irish all languages can be studied from both advanced and beginners level.

- **17. English Studies**

- Trinity College Dublin
- **530** points
- **4 Years**
- **Overview:** The study of English is concerned with the history and practices of writing in English and encompasses literary works spanning English, Anglo-Irish, American and post-colonial cultures. It aims to develop a thorough knowledge of the history of these literatures while also enabling students to develop a sophisticated critical consciousness and an awareness of critical and cultural theory.

- **18. English Literature/History**

- Trinity College Dublin
- **487** points
- **4 Years**
- **Overview:** English LiteratureEnglish Literature covers a broad range of literatures written in the English language, from Chaucer to the present day. The aim of the course is to help students acquire a thorough knowledge of the history of differing literatures while also enabling them to develop a sophisticated critical consciousness and an awareness of critical and cultural theory. HistoryThe History programme combines the strength of a broad-based programme in the first two years, introducing all students to the sheer diversity of historical studies, with the freedom to explore areas of particular interest to individual students in the final two years. The first and second years provide a range of modules covering medieval and modern periods, including Irish, European, and American history, as well as some modules exploring the skills and methods which historians use, and the kinds of debates in which historians engage.

- **19. Mathematics**

- Trinity College Dublin
- **578** points
- **4 Years**
- **Overview:** Mathematics is a broad and diverse subject which is used to model, analyse and understand several applications in the physical and biological sciences, engineering, management science, economics and finance. Its numerous applications are naturally interwoven with the underlying theory which is essential in developing one's logical reasoning, quantitative skills and problem-solving techniques.

# RECOMMENDATION SET 2

---

- **0. Engineering with Management**

- Trinity College Dublin
- **613** points
- **4 Years**
- **Overview:** Engineering with Management is concerned with the analysis, design, improvement, installation, and management of integrated systems of people, finance, materials and equipment. Our graduates have the technical skills common to all excellent engineers, with this knowledge augmented by an understanding of the commercial and industrial environment and the ability to generate innovative solutions to the problems of the world.

- **1. Law/Business Studies**

- Trinity College Dublin
- **613** points
- **4 Years**
- **Overview:** LawThe law degree will appeal to you if you are interested in society and how it works, how we regulate the relationships between people. Given the wide range of legal modules, the degree attracts students with a broad range of interests. Business StudiesThis four year programme offers the opportunity to focus upon the many areas of overlapping interest between the two disciplines, for example, the structure of companies and other forms of business organisation, competition law and regulation of markets, consumer law, labour law, finance and financial markets, taxation, the protection of intellectual property and international perspectives on law and business.

- **2. Law/History**

- Trinity College Dublin
- **613** points
- **4 Years**
- **Overview:** Law The law degree will appeal to you if you are interested in society and how it works, how we regulate the relationships between people. Given the wide range of legal modules, the degree attracts students with a broad range of interests. Those interested in politics are attracted to subjects such as constitutional law. History The History programme introduces students to the diversity of historical studies, which include modules covering medieval and modern periods, including Irish, European, and American history, as well as some modules exploring the skills and methods which historians use, and the kinds of debates in which historians engage.

- **3. Mathematics/Modern Language**

- Trinity College Dublin
- **613** points
- **4 Years**
- **Overview:** Mathematics Mathematics is a broad and diverse subject which is used to model, analyse and understand several applications in the physical and biological sciences, engineering, management science, economics and finance. You can choose between German, Irish, Italian, Russian and Spanish. Apart from French and Irish all languages can be studied from both advanced and beginners level.

- **4. Mathematics/Music**

- Trinity College Dublin
- **613** points
- **4 Years**
- **Overview:** Mathematics Mathematics is a broad and diverse subject which is used to model, analyse and understand several applications in the physical and biological sciences, engineering, management science, economics and finance. Its numerous applications are naturally interwoven with the underlying theory which is essential in developing one's logical reasoning, quantitative skills and problem-solving techniques. Music Studying music will allow you to engage with a range of traditions to acquire a profound understanding of how music works in theory and in creative practice. If you are interested in understanding music's place in society, developing music technology skills, writing music, or improving your skills as an informed performer, this course could be for you.

- **5. Mathematics/Philosophy**

- Trinity College Dublin
- **613** points
- **4 Years**
- **Overview:** Mathematics Mathematics is a broad and diverse subject which is used to model, analyse and understand several applications in the physical and biological sciences, engineering, management science, economics and finance. Its numerous applications are naturally interwoven with the underlying theory which is essential in developing one's logical reasoning, quantitative skills and problem-solving techniques. Philosophy This course offers the opportunity to engage in depth with questions of metaphysics (about the fundamental nature of reality), epistemology (the theory of knowledge), ethics (theories of right and wrong), political philosophy (the nature of the just state), philosophy of religion (reasoning about God), philosophy of mind (questions about thought, language and reason) and various other areas.

- **6. Global Business**

- Trinity College Dublin
- **602** points
- **4 years**
- **Overview:** The Global Business degree is a unique programme, designed for students who wish to focus on business from the very beginning of their degree. The degree is both innovative and practical with a strong focus on experiential learning. Trinity Business School places an emphasis on blended learning, where academic excellence meets industry experience with a keen focus on how business operates within the global economy.

- **7. Pharmacy**

- Trinity College Dublin
- **601** points
- **4-5 Years**
- **Overview:** Pharmacy is the study of all aspects of drugs, both natural and synthetic in origin, including their chemistry, their uses in medicines, and how they work within the body. Pharmacists work in a variety of settings - community pharmacies, hospitals, long-term care facilities, and within the pharmaceutical industry, to name just a few. In many respects, their role as a key healthcare professional is to help people achieve the best results from their medications. Optional Fifth Year: M.Sc. (Pharm) Master's Degree (NFQ Level 9) Optional.

- **8. Actuarial Mathematics**

- Dublin City University
- **589** points
- **4 Years**
- **Overview:** Actuarial Mathematics could be the perfect course for you. It's accredited by the Institute and Faculty of Actuaries, UK, meaning you may be exempt from some of the exams needed to qualify as an actuary in Ireland and the UK. Before you embark on learning essential actuarial knowledge and theories, you'll be given solid mathematical training. In your first two years, you'll study the fundamental mathematical principles that underpin the actuarial and financial models covered in later years. You'll also study computer programming, economics and accounting.

- **9. Law and French**

- Trinity College Dublin
- **589** points
- **4 Years**
- **Overview:** The Law and French degree programme offers a unique opportunity to study core and specialised legal modules but also the language, culture and political systems of

France. Students must undertake an Erasmus year in France, exposing them to the law of that legal system.

- **10. Philosophy, Political Science, Economics and Sociology**

- Trinity College Dublin
- **581** points
- **4 Years**
- **Overview:** Philosophy, Political Science, Economics and Sociology (PPES), offers a coherent and integrated introduction to the study of social sciences and philosophy. It brings together some of the most important approaches to understanding society and, in doing so, develops skills for a range of future careers and activities.

- **11. Economics/Geography**

- Trinity College Dublin
- **578** points
- **4 Years**
- **Overview:** EconomicsAny society has to address the problem of how and what to produce for its material survival, and how the goods and services that are produced should be distributed among its population. Economists explore how people and institutions behave and function when producing, exchanging and using goods and services.  
GeographyGeography is the study of Earth's landscapes, peoples, places and environments. Fundamentally it is about the world in which we live. Geography offers a 21st century education by uniquely bridging the social sciences (human geography) with the natural sciences (physical geography). Geography also covers increasingly important environmental issues where humans affect physical environments and vice versa.

- **12. Economics/History**

- Trinity College Dublin
- **578** points
- **4 Years**
- **Overview:** EconomicsAny society has to address the problem of how and what to produce for its material survival, and how the goods and services that are produced should be distributed among its population. Economists explore how people and institutions behave and function when producing, exchanging and using goods and services. HistoryThe four-year programme allows students to lay firm foundations in the first two years, with wide-ranging modules on medieval and modern history, Irish, European, American, environmental and global history, as well as on historical methods and approaches. The final two years of the programme allow students the chance to study several specialist modules in-depth and to undertake independent research on a subject of their own choice.

- **13. Economics/Mathematics**

- Trinity College Dublin
- **578** points
- **4 Years**
- **Overview:** Economics Economists explore how people and institutions behave and function when producing, exchanging and using goods and services. Economists' main motivation is to find mechanisms that encourage efficiency in the production and use of material goods and resources, while at the same time producing a pattern of income distribution that society finds acceptable. Mathematics Mathematics is a broad and diverse subject which is used to model, analyse and understand several applications in the physical and biological sciences, engineering, management science, economics and finance. Its numerous applications are naturally interwoven with the underlying theory which is essential in developing one's logical reasoning, quantitative skills and problem-solving techniques.

- **14. Economics/Modern Language**

- Trinity College Dublin
- **578** points
- **4 Years**
- **Overview:** Economists explore how people and institutions behave and function when producing, exchanging and using goods and services. Economists' main motivation is to find mechanisms that encourage efficiency in the production and use of material goods and resources, while at the same time producing a pattern of income distribution that society finds acceptable. Students combine this subject with their choice of German or Spanish.

- **15. Economics/Philosophy**

- Trinity College Dublin
- **578** points
- **4 Years**
- **Overview:** Economists explore how people and institutions behave and function when producing, exchanging and using goods and services. Economists' main motivation is to find mechanisms that encourage efficiency in the production and use of material goods and resources, while at the same time producing a pattern of income distribution that society finds acceptable. Philosophy This course offers the opportunity to engage in depth with questions of metaphysics (about the fundamental nature of reality), epistemology (the theory of knowledge), ethics (theories of right and wrong), political philosophy (the nature of the just state), philosophy of religion (reasoning about God), philosophy of mind (questions about thought, language and reason) and various other areas. We teach courses which have both systematic and historical emphases and in the higher years students can choose options and get to write a thesis on a topic of their own choice.

- **16. Economics/Sociology**

- Trinity College Dublin

- **578** points
- **4 Years**
- **Overview:** EconomicsAny society has to address the problem of how and what to produce for its material survival, and how the goods and services that are produced should be distributed among its population. Economists explore how people and institutions behave and function when producing, exchanging and using goods and services. Economists' main motivation is to find mechanisms that encourage efficiency in the production and use of material goods and resources, while at the same time producing a pattern of income distribution that society finds acceptable. SociologyIf you want to understand the social changes taking place in the world today, and you are curious about people and society, then Sociology is for you. You will also gain the ability to understand topical issues and to present and communicate information and thoughts coherently. In addition, you will learn invaluable analytical, communication, research and presentation skills – transferable skills which can be applied to a wide range of careers and postgraduate programmes.

- **17. Law**

- Trinity College Dublin
- **578** points
- **4 Years**
- **Overview:** The law degree will appeal to you if you are interested in society and how it works, and with the broader question of the regulation of inter-personal relationships. A general interest in history and political developments, will be an advantage, as the law is deeply linked to its historical and political context.

- **18. Mathematics**

- Trinity College Dublin
- **578** points
- **4 Years**
- **Overview:** Mathematics is a broad and diverse subject which is used to model, analyse and understand several applications in the physical and biological sciences, engineering, management science, economics and finance. Its numerous applications are naturally interwoven with the underlying theory which is essential in developing one's logical reasoning, quantitative skills and problem-solving techniques.

- **19. Engineering**

- Trinity College Dublin
- **577** points
- **4 Years**
- **Overview:** Engineering is about being creative in technical problem solving. Engineers make things possible by using mathematical and scientific principles together with analytical and design skills. They tackle existing problems by developing new solutions through innovative

technologies. They also expand the frontiers of society by developing advanced materials, sustainable energy systems, construction technologies, transport systems, biomedical devices, and telecommunications infrastructure.
