

RECOMMENDATION SET 1

- **0. General Nursing**

- Maynooth University
- **466** points
- **4 Years**
- **Overview:** This innovative programme integrates theory, skills practice and practice placements. It aims to prepare competent graduates who are confident in their ability to deliver person centred, safe, compassionate, evidence-based, effective and high-quality care across diverse healthcare settings.

- **1. Nursing (Mental Health)**

- Dublin City University
- **359** points
- **4 Years**
- **Overview:** Are you interested in mental health? Do you love working with people of all ages and from diverse backgrounds? If so, this course could be perfect for you. You'll gain the knowledge, skills and values to work as a qualified mental health nurse with people of any age. It's a rewarding and much valued career with fantastic employment opportunities. During each semester, you'll complete a clinical placement, which ensures you'll meet the Nursing and Midwifery Board of Ireland (NMBI) requirements. Our health service provider partners offer diverse clinical settings, giving you a broad range of clinical learning opportunities across all the primary mental health specialities. For this course, they are: St Vincent's Hospital, Fairview. The National Forensic Mental Health Service Dublin North City Mental Health Services North Dublin Mental Health Services

- **2. Nursing (Intellectual Disability)**

- Dublin City University
- **308** points
- **4 Years**
- **Overview:** In this speciality field, intellectual disability nurses work as part of a cross-disciplinary team that strives to enable and empower people with intellectual disabilities to achieve their full potential. Intellectual disability can affect two aspects of people's lives - their intellectual functioning (such as learning, problem solving, judgement) and their adaptive functioning (in activities of daily life such as communication and independent living). During this course, you'll come to develop the professional knowledge, skills and attitudes you'll need to care for people with intellectual disability.

- **3. Health and Society**

- Dublin City University
- **452** points
- **3 Years**
- **Overview:** This course has been designed to enable you to discover all the aspects of health issues, and learn how to understand, research and act to improve the health of populations. During the course, you'll encounter many different ways of thinking about and acting on health issues, including biological, social, political, ethical and psychological perspectives. You'll not only learn about different potential career paths, but you'll also get to focus many projects and other programme activities on your own health interests. As a Health and Society student, you'll participate in a voluntary community project in your first year, then go on to design and implement a health equity campaign in second year. In your final year, you'll complete a health research project and write your final dissertation. Once you've completed the programme, you could go on to work in a state or voluntary health or social agency, or go to work in overseas development. Many of our graduates apply to go directly into further study, such as a postgraduate programme in occupational therapy, speech and language therapy, health promotion, social research and a wide range of other areas.

- **4. Biological Sciences (General Entry)**

- Dublin City University
- **466** points
- **4 Years**
- **Overview:** During the General Entry course, you'll study biochemistry, bioprocessing, biotechnology, genetics, cell biology and microbiology, while also completing some modules in chemistry, physics and mathematics. Once you successfully pass this first year, you'll go on to one of three programmes: the BSc in Genetics and Cell Biology, the BSc in Biotechnology or the BSc in Bioprocessing.

- **5. Chemical and Pharmaceutical Sciences**

- Dublin City University
- **477** points
- **4 Years**
- **Overview:** Are you curious about how chemistry affects our world, both in nature and when it comes to preparing and using everyday materials such as polymers, pharmaceuticals, fine chemicals, flavours and fragrances. If that's the case and you're a highly motivated independent student who is eager to challenge yourself in the different branches of chemistry, this course is for you. This course offers a compelling mix of technical knowledge and more hands-on practical experience than other similar courses, meaning you'll be better prepared for the workforce or postgraduate study. During it, you'll gain fundamental knowledge in organic, inorganic, physical, medicinal and analytical chemistry, along with practical lab skills and the ability to apply the theory you've learned. You'll also build your creative, innovation and presentation skills. Preparing for exciting future opportunities: In third year, you'll do a four- to six-month INTRA work placement in industry or in academic labs, in Ireland or overseas. This will give you vital experience, and enable you to learn new skills and develop contacts that can often lead to employment opportunities after finishing your degree. As a graduate you'll be sought after in sectors such as the pharmaceutical/biopharmaceutical, chemical/materials, specialty chemical, food and government laboratories. Typical roles could include process development, synthetic chemistry, formulation, regulatory affairs, quality control/assurance, analytical method development and medicinal chemistry. Others may go into teaching or patent law, while some decide to go on to further study for a masters or a doctorate.

- **6. Food Science and Human Nutrition**

- Maynooth University
- **440** points
- **4 Years**
- **Overview:** This programme is for students who wish to work in the area of food production, quality assurance, nutrition, and product development, with a focus on future foods and the role of food in the health of people, in Ireland and globally. This course provides students with a broad science-based education, with specialist content on the future of food development, human nutrition, and the role of food and healthy living, and also explores the social and global challenges around food security.

- **7. Pharmaceutical and Biomedical Chemistry**

- Maynooth University
- **434** points

- **4 Years**
 - **Overview:** This course is suited to those who wish to specialise in chemistry for the pharmaceutical and biomedical industries. Pharmaceutical Chemistry is a very important branch of Chemistry that is applied to the synthesis and formulation of new therapeutic drugs as well as the manufacture of medicinal compounds on a large scale. In this programme you will receive an excellent education in chemistry (physical chemistry, organic chemistry, inorganic chemistry), and have the opportunity to specialise in pharmaceutical chemistry, medicinal chemistry and bioinorganic chemistry.
- **8. International Business and Global Cultures**
 - Maynooth University
 - **400 points**
 - **3 or 4 Years**
 - **Overview:** An essential challenge for businesses in Ireland is how they can connect the capabilities of our workforce to contribute to solutions for people who are largely in markets outside Ireland, across the EU and the wider global community. Business needs graduates who can both understand the fundamentals of how to create value for customers and how to translate them into solutions and services that fit the needs of diverse cultures.
- **9. Business and Languages**
 - Maynooth University
 - **397 points**
 - **4 Years**
 - **Overview:** You choose one business subject (Accounting*, Business Management, International Business or Marketing) and one language (Chinese, French, German or Spanish). You do not need to have studied either business or your chosen language for the Leaving Certificate to take this degree.
- **10. Baitsiléir san Oideachas Trí Mheán na Gaeilge (Bunmhúinteoireacht)**
 - Marino Institute of Education
 - **502 points**
 - **4 Years**
 - **Overview:** The Bachelor of Education through the Medium of Irish is aimed at students who wish to teach through the medium of Irish in Gaeltacht schools or in All-Irish Schools. Is céim ar leith é an Baitsiléir san Oideachas Trí Mheán na Gaeilge (Bunmhúinteoireacht) a oireann go speisialta do mhic léinn a dteastaíonn uathu múineadh san earnáil oideachais Lán-Ghaeilge i.e. i scoileanna Gaeltachta nó i scoileanna Lán-Ghaeilge.
- **11. Baitsiléir san Oideachas Trí Mheán na Gaeilge (Bunmhúinteoireacht) - Gaeltacht Applicants**
 - Marino Institute of Education
 - **496 points**
 - **4 Years**
 - **Overview:** The Bachelor of Education through the Medium of Irish is aimed at students who wish to teach through the medium of Irish in Gaeltacht schools or in All-Irish Schools. Is céim ar leith é an Baitsiléir san Oideachas Trí Mheán na Gaeilge (Bunmhúinteoireacht) a oireann go speisialta do mhic léinn a dteastaíonn uathu múineadh san earnáil oideachais Lán-Ghaeilge i.e. i scoileanna Gaeltachta nó i scoileanna Lán-Ghaeilge.
- **12. Music Technology**
 - Maynooth University
 - **300 points**
 - **3 Years**
 - **Overview:** Studying Music Technology is opportunity to combine Music Technology with Music, Computer Science and a wide range of other disciplines. You gain hands-on experience of the practical skills involved in music technology while learning about essential concepts.
- **13. Product Design and Innovation**
 - Maynooth University
 - **317 points**
 - **4 Years**
 - **Overview:** Product designers are key to innovation in the modern world. As technological competence spreads globally, businesses are placing greater focus on achieving market success through design. A highly practical course, with an emphasis on project-based learning, workshops, laboratory sessions and group work. Opportunity to take a six-month, full-time work experience placement, in a relevant employment setting.
- **14. Multimedia**
 - Dublin City University
 - **388 points**
 - **3 Years**
 - **Overview:** Do you have a creative, enquiring mind and an interest in the design of engaging and interactive media experiences? Then DCU's BSc in Multimedia is the degree for you! Digital media technologies are central to our everyday lives and essential for any company to succeed in a globalised economy. Learn from the best DCU's BSc in Multimedia was the first degree of its type in Ireland and still leads the field. On this programme, you'll learn from teaching staff with real-world professional experience and deep knowledge based on research and industry practice.
- **15. Post Primary Teacher Education - Technology, Engineering and Graphics**
 - Dublin City University
 - **402 points**
 - **4 Years**
 - **Overview:** This is a course for people who are interested in becoming post-primary teachers in the areas of Technology, Engineering and Graphics. On this degree, you'll learn about designing and innovating, and in coming up with creative solutions for the challenges facing society and industry. The four-year programme will be delivered through a partnership of DCU and Technological University of the Shannon (TUS). The first two years of study will take place at the TUS Athlone campus, and the final two years at the DCU Institute of Education in Dublin.
- **16. Education, Home Economics and Biology - with concurrent Teacher Education**
 - ATU Sligo St. Angelas
 - **453 points**
 - **4 Years**
 - **Overview:** The Bachelor of Education in Home Economics and Biology is a full-time, concurrent teacher education degree leading to a National Framework of Qualifications (NFQ) Level 8 honours degree.
- **17. Science (with Education)**
 - Maynooth University
 - **420 points**

- **4 Years**
 - **Overview:** If you are interested in a career as a second-level science and/or mathematics teacher, this may be the degree for you. As an undergraduate, you will study a four-year Science degree, while also completing 60 credits in Education. After four years you are awarded a BSc Science (with Education) degree - a level 8 honours degree. You now have two pathways open to you:
- **18. Education - Early Childhood Education**
 - Dublin City University
 - **420 points**
 - **4 Years**
 - **Overview:** Do you want to make a difference to the lives and educational futures of young children? Then follow your passion and explore early education with an internationally-recognised team of academics and researchers in DCU. This course will prepare you for a highly rewarding career, educating and supporting young children during a vital time in their development. The Bachelor of Early Childhood Education (BECE) prepares you for work as a professional in a variety of early childhood educational settings, from preschools and creches, to child and family support programmes and it equips graduates to work with children of all needs. The BECE enables graduates to follow a career in a range of voluntary and statutory organisations that work on behalf of children and families.
- **19. Early Childhood Teaching and Learning**
 - Maynooth University
 - **399 points**
 - **4 Years**
 - **Overview:** This full-time degree will prepare you for a range of leadership roles in the Early Childhood Education and Care. It is a progressive level 8 degree, supporting the development of outstanding early childhood educators.

RECOMMENDATION SET 2

- **0. Chemical and Pharmaceutical Sciences**
 - Dublin City University
 - **477 points**
 - **4 Years**
 - **Overview:** Are you curious about how chemistry affects our world, both in nature and when it comes to preparing and using everyday materials such as polymers, pharmaceuticals, fine chemicals, flavours and fragrances. If that's the case and you're a highly motivated independent student who is eager to challenge yourself in the different branches of chemistry, this course is for you. This course offers a compelling mix of technical knowledge and more hands-on practical experience than other similar courses, meaning you'll be better prepared for the workforce or postgraduate study. During it, you'll gain fundamental knowledge in organic, inorganic, physical, medicinal and analytical chemistry, along with practical lab skills and the ability to apply the theory you've learned. You'll also build your creative, innovation and presentation skills. Preparing for exciting future opportunities: In third year, you'll do a four- to six-month INTRA work placement in industry or in academic labs, in Ireland or overseas. This will give you vital experience, and enable you to learn new skills and develop contacts that can often lead to employment opportunities after finishing your degree. Typical roles could include process development, synthetic chemistry, formulation, regulatory affairs, quality control/assurance, analytical method development and medicinal chemistry. Others may go into teaching or patent law, while some decide to go on to further study for a masters or a doctorate.
- **1. Education - Primary Teaching**
 - Marino Institute of Education
 - **473 points**
 - **4 Years**
 - **Overview:** Helping young people learn has to be one of the most satisfying and rewarding careers of all. By choosing the Bachelor in Education (Primary) programme you embark on a course that will prepare you for working in primary schools in Ireland. You will find out how children learn to read, write, count and calculate; you'll learn how to introduce them to the arts the magic and mysteries of the world around them and how to grow and develop in a healthy way.
- **2. Sport Science and Health**
 - Maynooth University
 - **473 points**
 - **4 Years**
 - **Overview:** This programme is based on the core scientific disciplines of sport and exercise science - physiology and biomechanics. Students will learn to understand how to achieve maximum performance for the high performing athlete, and those who are looking to support exercise and physical activity for the health of the wider population, of all ages and capabilities.
- **3. Digital Business and Innovation**
 - Dublin City University
 - **468 points**
 - **4 Years**
 - **Overview:** Learn how companies leverage digital technologies to innovate, transform and succeed. Whether it's Big Data, the Internet of Things or Virtual Reality, the world of business is being transformed by digital technology. It's an exciting time of rapid change that is creating wonderful new opportunities. This four-year course is the first of its kind in Ireland and aims to give you the skills to succeed in a future world of work that is driven by technology.
- **4. Economics, Politics and Law**
 - Dublin City University
 - **467 points**
 - **3-4 Years**
 - **Overview:** Are you interested in how societies work? DCU's Economics, Politics and Law (EPL) degree course is designed to give you a deep and thorough understanding of the political, legal and economic forces that shape the world. Build strong foundations This degree provides a solid base to all three disciplines and you will study foundational topics such as introductions to micro and macroeconomics, political science and constitutional law. You don't need to have done any of these before. As you progress through your studies you may choose to specialise in areas such as Urban and Regional Economics, Issues in American Politics or Family Law, to name a few. You will also maximise your learning potential with dedicated research methods modules that will equip you with a variety of study skills. Skills attractive to employers This extremely versatile degree provides you with skills and knowledge that are highly valued across sectors including finance and banking, government and policy, the legal profession, NGOs and more. This degree will help you develop your oral and written communication skills, research techniques, critical thinking, teamwork and research abilities. 3 or 4

year degree You can complete the BA in Economics, Politics and Law degree in three years, or choose to take an extra year either to study abroad or complete an INTRA placement.

- **5. Biological Sciences (General Entry)**

- Dublin City University
- **466** points
- **4 Years**
- **Overview:** During the General Entry course, you'll study biochemistry, bioprocessing, biotechnology, genetics, cell biology and microbiology, while also completing some modules in chemistry, physics and mathematics. Once you successfully pass this first year, you'll go on to one of three programmes: the BSc in Genetics and Cell Biology, the BSc in Biotechnology or the BSc in Bioprocessing.

- **6. General Nursing**

- Maynooth University
- **466** points
- **4 Years**
- **Overview:** This innovative programme integrates theory, skills practice and practice placements. It aims to prepare competent graduates who are confident in their ability to deliver person centred, safe, compassionate, evidence-based, effective and high-quality care across diverse healthcare settings.

- **7. Quantitative Finance**

- Maynooth University
- **465** points
- **4 Years**
- **Overview:** This programme will challenge and stimulate students who wish to pursue a career in the financial markets. The combination of financial, mathematical and computer programming skills will equip graduates to succeed and prosper in a fast-changing banking and financial sector. Students will have the opportunity to put the theory into practice during the work placement period and savour the daily life of a professional in the financial services industry.

- **8. Business with Sport Science**

- Maynooth University
- **455** points
- **3 - 4 Years**
- **Overview:** This programme is for students who have a desire to work in the growing and diverse range of businesses in the area of sports, exercise and well-being. The sports, exercise and well-being sector is one of the largest service industries in Ireland and globally. Ranging from small to large enterprises, many are run by sports-professionals. These businesses need graduates who can both understand the science and practicalities of the sports and exercise sector, and the fundamentals of how to create value and make a profit - via services and solutions that meet a variety of customers.

- **9. Global Business (Germany)**

- Dublin City University
- **455** points
- **4 Years**
- **Overview:** Are you looking for a course that gives you a headstart in international business, as well as a rich cultural experience in another country? Then the BA in Global Business (Germany) could be for you. This degree gives you the skills and knowledge you need to thrive in the fast-moving world of business. Not only that, but the course also gives you the opportunity to qualify with two degrees by the end of this four-year programme, and you'll have the chance to gain fluency in German.

- **10. Education, Home Economics and Biology - with concurrent Teacher Education**

- ATU Sligo St. Angelas
- **453** points
- **4 Years**
- **Overview:** The Bachelor of Education in Home Economics and Biology is a full-time, concurrent teacher education degree leading to a National Framework of Qualifications (NFQ) Level 8 honours degree.

- **11. Health and Society**

- Dublin City University
- **452** points
- **3 Years**
- **Overview:** This course has been designed to enable you to discover all the aspects of health issues, and learn how to understand, research and act to improve the health of populations. During the course, you'll encounter many different ways of thinking about and acting on health issues, including biological, social, political, ethical and psychological perspectives. You'll not only learn about different potential career paths, but you'll also get to focus many projects and other programme activities on your own health interests. As a Health and Society student, you'll participate in a voluntary community project in your first year, then go on to design and implement a health equity campaign in second year. In your final year, you'll complete a health research project and write your final dissertation. Once you've completed the programme, you could go on to work in a state or voluntary health or social agency, or go to work in overseas development. Many of our graduates apply to go directly into further study, such as a postgraduate programme in occupational therapy, speech and language therapy, health promotion, social research and a wide range of other areas.

- **12. Law**

- Maynooth University
- **452** points
- **4 years**
- **Overview:** Specialise in a single major law programme over four years, opening up excellent employment prospects in both law and non-law careers. Acquire a thorough grounding in the fundamental areas of legal study and a broad range of specialist modules like Transnational Litigation, Civil Liberties, and Criminology. Enhance employability by developing your faculties for argument, reasoning and for the analysis of complicated ideas.

- **13. Economics**

- Maynooth University
- **445** points
- **3 Years**
- **Overview:** As a BSc Economics student, you will learn to take a scientific evidence-based approach to understand, critique and create policies to combat economic and social problems. Employers in all sectors from government to financial services have a growing need for economists who can

analyse and interpret data. This requires a strong grounding in analytical and quantitative methods. With an emphasis on independent research, this programme is designed to allow you to flourish based on your individual curiosity and strengths.

- **14. Science and Mathematics Education**

- Dublin City University
- **443** points
- **4 Years**
- **Overview:** If you love science and maths, and would like to share your enthusiasm, interest and knowledge with young people, you'll thrive on the BSc in Science and Mathematics Education. Science and maths teachers work to develop their pupils' understanding of the world around them and to educate future generations of scientists, engineers and technologists, not to mention citizens who are scientifically, mathematically and technically literate. You'll build a strong foundation in key areas of education, mathematics and either physics or chemistry, developing essential mathematical thinking skills, and scientific practices and ways of working throughout the four years. You'll also study the history, psychology, sociology and philosophy of education, as well as undertaking curriculum studies.

- **15. Food Science and Human Nutrition**

- Maynooth University
- **440** points
- **4 Years**
- **Overview:** This programme is for students who wish to work in the area of food production, quality assurance, nutrition, and product development, with a focus on future foods and the role of food in the health of people, in Ireland and globally. This course provides students with a broad science-based education, with specialist content on the future of food development, human nutrition, and the role of food and healthy living, and also explores the social and global challenges around food security.

- **16. Post Primary Teacher Education - Gaelige and French, German or Spanish**

- Dublin City University
- **440** points
- **4 Years**
- **Overview:** This course will prepare you to teach at post-primary level in two languages. You will take Gaelige, along with a choice of either French, German or Spanish. Alongside developing your language abilities, the course also builds your skills in the areas of teamwork, leadership, communication and creativity. These are vital for a career in post primary teaching, but are also key to a variety of other professions. In this four-year course, you'll benefit from studying in small class groups within the larger university community.

- **17. Environmental Science and Technology**

- Dublin City University
- **434** points
- **4 Years**
- **Overview:** Get the relevant scientific skills you'll need to tackle these complex issues on this diverse and stimulating course. Whether out on field trips or doing nanoscale environmental analysis in the lab, you'll gain the analytical and practical skills to understand, protect and improve our environment. Not only that, but you'll get to contribute in a practical way to reducing carbon on- and off-campus in our new module, Towards Zero Carbon. Over the four years, you'll gain a strong scientific core in biology, chemistry, physics and maths. This is vital to working as an environmental scientist, but also gives you flexibility when it comes to your career choice. In your third year, you'll do a nine-month work placement and you also have the chance to study abroad. And of course, throughout the course, you'll be able to contribute practically to reducing carbon reliance. As the world is ever more focused on protecting the environment and cutting carbon emissions, there is ongoing and increasing demand for qualified scientists. Graduates from this course typically go on to high-impact careers as research scientists in areas such as environmental protection, and water, air and soil management and conservation.

- **18. Pharmaceutical and Biomedical Chemistry**

- Maynooth University
- **434** points
- **4 Years**
- **Overview:** This course is suited to those who wish to specialise in chemistry for the pharmaceutical and biomedical industries. Pharmaceutical Chemistry is a very important branch of Chemistry that is applied to the synthesis and formulation of new therapeutic drugs as well as the manufacture of medicinal compounds on a large scale. In this programme you will receive an excellent education in chemistry (physical chemistry, organic chemistry, inorganic chemistry), and have the opportunity to specialise in pharmaceutical chemistry, medicinal chemistry and bioinorganic chemistry.

- **19. Climate and Environmental Sustainability**

- Dublin City University
- **431** points
- **3-4 Years**
- **Overview:** The BA in Climate and Environmental Sustainability is an applied geography programme that is not just about understanding climate change and its consequences, but also about understanding how the environment itself offers solutions. If you have a keen interest in issues relating to the environment such as improving water quality and managing biodiversity, this degree is ideal for you.
