

# RECOMMENDATION SET 1

---

- **0. Mathematics**

- Trinity College Dublin
- **578** points
- **4 Years**
- **Overview:** Mathematics is a broad and diverse subject which is used to model, analyse and understand several applications in the physical and biological sciences, engineering, management science, economics and finance. Its numerous applications are naturally interwoven with the underlying theory which is essential in developing one's logical reasoning, quantitative skills and problem-solving techniques.

- **1. Mathematics (Social Sciences Two Subject Combination)**

- University College Dublin
- **490** points
- **4 Years**
- **Overview:** Mathematics has long played a central role in our quest to fully describe and understand the natural world. Nowadays, it is also a vital tool in many of the social sciences. Those who concentrate on this subject will gain an understanding of mathematical concepts and learn how to prove key facts and solve problems using deductive reasoning.

- **2. Statistics**

- University College Dublin
- **420** points
- **3 Years**
- **Overview:** If you are interested in studying Statistics with an Arts and Humanities or Social Science subject, then this degree could be for you. Statistics is the science of transforming data into knowledge and understanding, providing a principled approach to making data-informed decisions. Statistical methods enable us to gain insights from data, and with the advent of powerful computing technology, these methods have become widely used in many sectors.

- **3. Theoretical Physics**

- Trinity College Dublin
- **566** points
- **4 Years**

- **Overview:** Theoretical Physics explores the natural world at its most fundamental level, using mathematical theories guided by experimental investigation. For some it is the foundation for an academic career in mathematics or physics. For others it provides the basis for many career options in industry, medicine, law, finance and computing. Trinity provides a course which ranges widely across physics and mathematics. Its graduates are in demand for their technical skills and versatility.

- **4. Actuarial Mathematics**

- Dublin City University
- **589** points
- **4 Years**
- **Overview:** Actuarial Mathematics could be the perfect course for you. It's accredited by the Institute and Faculty of Actuaries, UK, meaning you may be exempt from some of the exams needed to qualify as an actuary in Ireland and the UK. Before you embark on learning essential actuarial knowledge and theories, you'll be given solid mathematical training. In your first two years, you'll study the fundamental mathematical principles that underpin the actuarial and financial models covered in later years. You'll also study computer programming, economics and accounting.

- **5. Common Entry into Actuarial and Financial Mathematics**

- Dublin City University
- **555** points
- **4 Years**
- **Overview:** If you'd like to qualify for in-demand quantitative roles in the insurance and financial industry, the Common Entry into Actuarial and Financial Mathematics programme (CAFM) might be for you. It's especially ideal if you'd like the flexibility to explore different areas of maths before choosing how you'll specialise. You'll learn the fundamental mathematical principles that underpin the state-of-the-art actuarial and financial models you'll study in later years, along with computer programming, data analysis, economics and accounting.

- **6. Engineering**

- Trinity College Dublin
- **577** points
- **4 Years**
- **Overview:** Engineering is about being creative in technical problem solving. Engineers make things possible by using mathematical and scientific principles together with analytical and design skills. They tackle existing problems by developing new solutions through innovative technologies. They also expand the frontiers of society by developing advanced materials, sustainable energy systems, construction technologies, transport systems, biomedical devices, and telecommunications infrastructure.

- **7. Mechanical Engineering**

- University of Galway
- **566** points
- **4 Years**
- **Overview:** Mechanical Engineering is a subject concerned with the design and manufacture of parts and systems that make up the range of machinery and equipment you see around you, from a can opener to a jet aircraft. Mechanical engineers design the tools and processes necessary to create all man-made products, and are often involved from conceiving of an idea right through to seeing it as a finished product ready for its commercial application.

- **8. Engineering (Electrical & Electronic Engineering)**

- University College Cork
- **543** points
- **4 Years**
- **Overview:** BE Electrical and Electronic Engineering is a four-year professional engineering course designed to prepare students for employment in the electrical and electronic sectors in Ireland and abroad. It has a broad curriculum with strong practical content, including a work placement. It has an excellent record for graduate employment.

- **9. Mechanical & Manufacturing Engineering**

- Dublin City University
- **542** points
- **4 Years**
- **Overview:** Can you imagine designing and building a better electric vehicle, jet engine or wind turbine? Maybe you've figured out a way to improve inhalers or door handles. If you're fascinated by how things work and are made, enjoy getting caught up in the details, and thrive as part of a team, choose Mechanical and Manufacturing Engineering. Our students take things apart, figure out how they work and how to fix or improve them, then put them back together again. You'll get to use 3D printers and other advanced tools in DCU's state-of-the-art labs, while also absorbing engineering theory. It is at heart a maths-based course, but you'll also gain extensive skills and knowledge in engineering mechanics, computer simulation and analysis, design and manufacture, and project management. In third year, you'll do an eight-month work placement in industry and you also have the opportunity to study abroad. And you can extend your undergraduate BEng programme by a year to complete a masters degree.

- **10. Physics and Astrophysics**

- University College Cork
- **543** points

- **4 Years**
- **Overview:** Fundamentally Physics and Astrophysics is concerned with the study of the universe, from the largest galaxies to the nature of matter itself. Physics, and the technologies developed by physicists, play a major role in chemistry, biology, medicine, electronics, geology, and in the applied fields of optics, nanotechnology, computer science and engineering.

- **11. Physical Sciences**

- Trinity College Dublin
- **522** points
- **4 Years**
- **Overview:** Physical Sciences (TR063) at Trinity is a four year degree programme for students who like to solve problems. Whether it is studying galaxies, examining the potential of new lasers or investigating next generation nanomaterials, this degree pathway will prepare you for a lifelong career of solving problems in research, industry or business.

- **12. Physics with Astronomy**

- Dublin City University
- **413** points
- **4 Years**
- **Overview:** Do you enjoy maths and have a keen interest in how the universe works? This course is ideal for you. It's all about how physics can help to answer the puzzles of the universe. Astronomy is the oldest of the sciences, but you'll discover how it's evolving incredibly quickly in the 21st century, with more and more sensitive instruments yielding more and better data. By the time you graduate, you'll know the latest techniques used to observe the sky at different energies, and why multi-wavelength observations are crucial to understanding the true nature of cosmic sources. You'll learn through lectures and by doing lab work, where you'll get to explore the nature of sources using real X-ray data collected by the XMM-Newton observatory.

- **13. Biological, Biomedical & Biomolecular Sciences**

- University College Dublin
- **544** points
- **4 Years**
- **Overview:** The UCD Science (DN200) course offers 27 degree subjects categorised into streams. Students can study subjects from more than one stream in first year. It is also possible for students to change their stream in first year. At the end of first year, students choose a minimum of two subjects to study in second year (for example Statistics and Mathematics or Genetics and Microbiology). Students will major in one of these subjects in third and fourth year.

- **14. Computer Science**

- University College Dublin
- **540** points
- **4 Years**
- **Overview:** The UCD Computer Science degree covers the fundamentals of Computer Science while also exposing students to the contemporary languages and technologies used in the industry. Key topics include programming, foundational mathematics, advanced software engineering, cloud development, theory of computer science, networks and security. The principal programming languages used are C, Java and Python. Specialised topics include computer graphics, game development, robotics, mobile development and others.

- **15. Computer Science and Information Technology**

- University of Galway
- **440** points
- **4 Years**
- **Overview:** We depend on electronic devices, such as computers and mobile phones, computer software and networks to store, process, transmit, retrieve and manipulate information. Students will cover the technology used in these devices and will focus on the development of the software applications that make these devices useful.

- **16. Information Technology**

- University of Galway
- **350** points
- **3 Years**
- **Overview:** Students are introduced to the basics of IT and computer methods. The course teaches useful skills in computer programming and application in the first year. As part of an Arts degree, this subject is one of three subjects you choose in first year. In second and third year you continue with two of the subjects taken in First Arts. It may be possible to take an extra year studying abroad.

- **17. Finance**

- University College Cork
- **577** points
- **3 Years**
- **Overview:** Finance is concerned with the operation of financial markets and the valuation of financial assets, in particular in stock, bond, foreign exchange and interest rate markets. The BSc Finance is based equally on the subject areas of corporate finance and financial economics. This combined approach provides graduates with a thorough grounding in each area.

- **18. Commerce**

- University College Dublin
- **554** points
- **3-4 Years**
- **Overview:** The Bachelor of Commerce (BComm) is a globally recognised business degree, designed for ambitious and achievement-orientated students who want to make a significant impact in the business world. Combining strong theoretical understanding with the practical skills needed for graduate employment, students are assured of a challenging and relevant programme for the modern business world. You'll learn to become an independent and critical thinker and a cogent and compelling communicator; with the skills to work seamlessly in groups; to develop the technical and mathematical skills to analyse and make sense of business data and intelligence.

- **19. Accounting and Finance**

- Dublin City University
- **532** points
- **3 Years**
- **Overview:** A BA in Accounting and Finance gives you a world of opportunities. It is considered Ireland's premier degree for those wishing to pursue careers as accountants and financial services professionals. The course offers great prospects for career progression, and the chance to work in a wide range of different industries. Your Career Starts Here This degree was first of its kind in Ireland, and this continues to be an extremely popular course. Graduates are highly regarded by the accounting and financial services professions, as can be seen in the consistently employment rates for those who take the BA in Accounting and Finance.

## RECOMMENDATION SET 2

---

- **0. Pharmacy**

- Trinity College Dublin
- **601** points
- **4-5 Years**
- **Overview:** Pharmacy is the study of all aspects of drugs, both natural and synthetic in origin, including their chemistry, their uses in medicines, and how they work within the body. Pharmacists work in a variety of settings - community pharmacies, hospitals, long-term care facilities, and within the pharmaceutical industry, to name just a few. In many respects, their role as a key healthcare professional is to help people achieve the best results from their medications. Optional Fifth Year: M.Sc. (Pharm) Master's Degree (NFQ Level 9) Optional.

- **1. Actuarial Mathematics**

- Dublin City University
- **589** points
- **4 Years**
- **Overview:** Actuarial Mathematics could be the perfect course for you. It's accredited by the Institute and Faculty of Actuaries, UK, meaning you may be exempt from some of the exams needed to qualify as an actuary in Ireland and the UK. Before you embark on learning essential actuarial knowledge and theories, you'll be given solid mathematical training. In your first two years, you'll study the fundamental mathematical principles that underpin the actuarial and financial models covered in later years. You'll also study computer programming, economics and accounting.

- **2. Biomedical, Health and Life Sciences**

- University College Dublin
- **589** points
- **4 Years**
- **Overview:** This course will appeal to those with a keen interest in science and in how research and technology can impact on human health. It is training scientists at the interface of science and medicine. You will learn how scientifically driven investigations can advance our knowledge of disease prevention, detection and treatment and translating these into clinical utility. The course will immerse you in modern medical and biological sciences and focus on the application of scientific developments. BHLS offers students a unique opportunity to complete a research project with a Principal Investigator in a biomedical research area that interests them and an opportunity to be involved in peer-reviewed publications.

- **3. Law and French**

- Trinity College Dublin
- **589** points
- **4 Years**
- **Overview:** The Law and French degree programme offers a unique opportunity to study core and specialised legal modules but also the language, culture and political systems of France. Students must undertake an Erasmus year in France, exposing them to the law of that legal system.

- **4. Philosophy, Political Science, Economics and Sociology**

- Trinity College Dublin
- **581** points
- **4 Years**

- **Overview:** Philosophy, Political Science, Economics and Sociology (PPES), offers a coherent and integrated introduction to the study of social sciences and philosophy. It brings together some of the most important approaches to understanding society and, in doing so, develops skills for a range of future careers and activities.

- **5. Economics/Geography**

- Trinity College Dublin
- **578** points
- **4 Years**
- **Overview:** EconomicsAny society has to address the problem of how and what to produce for its material survival, and how the goods and services that are produced should be distributed among its population. Economists explore how people and institutions behave and function when producing, exchanging and using goods and services.  
GeographyGeography is the study of Earth's landscapes, peoples, places and environments. Fundamentally it is about the world in which we live. Geography offers a 21st century education by uniquely bridging the social sciences (human geography) with the natural sciences (physical geography). Geography also covers increasingly important environmental issues where humans affect physical environments and vice versa.

- **6. Economics/History**

- Trinity College Dublin
- **578** points
- **4 Years**
- **Overview:** EconomicsAny society has to address the problem of how and what to produce for its material survival, and how the goods and services that are produced should be distributed among its population. Economists explore how people and institutions behave and function when producing, exchanging and using goods and services. HistoryThe four-year programme allows students to lay firm foundations in the first two years, with wide-ranging modules on medieval and modern history, Irish, European, American, environmental and global history, as well as on historical methods and approaches. The final two years of the programme allow students the chance to study several specialist modules in-depth and to undertake independent research on a subject of their own choice.

- **7. Economics/Mathematics**

- Trinity College Dublin
- **578** points
- **4 Years**
- **Overview:** Economics Economists explore how people and institutions behave and function when producing, exchanging and using goods and services. Economists' main motivation is to find mechanisms that encourage efficiency in the production and use of material goods and resources, while at the same time producing a pattern of income distribution that

society finds acceptable. MathematicsMathematics is a broad and diverse subject which is used to model, analyse and understand several applications in the physical and biological sciences, engineering, management science, economics and finance. Its numerous applications are naturally interwoven with the underlying theory which is essential in developing one's logical reasoning, quantitative skills and problem-solving techniques.

- **8. Economics/Modern Language**

- Trinity College Dublin
- **578** points
- **4 Years**
- **Overview:** Economists explore how people and institutions behave and function when producing, exchanging and using goods and services. Economists' main motivation is to find mechanisms that encourage efficiency in the production and use of material goods and resources, while at the same time producing a pattern of income distribution that society finds acceptable. Students combine this subject with their choice of German or Spanish.

- **9. Economics/Philosophy**

- Trinity College Dublin
- **578** points
- **4 Years**
- **Overview:** Economists explore how people and institutions behave and function when producing, exchanging and using goods and services. Economists' main motivation is to find mechanisms that encourage efficiency in the production and use of material goods and resources, while at the same time producing a pattern of income distribution that society finds acceptable. PhilosophyThis course offers the opportunity to engage in depth with questions of metaphysics (about the fundamental nature of reality), epistemology (the theory of knowledge), ethics (theories of right and wrong), political philosophy (the nature of the just state), philosophy of religion (reasoning about God), philosophy of mind (questions about thought, language and reason) and various other areas. We teach courses which have both systematic and historical emphases and in the higher years students can choose options and get to write a thesis on a topic of their own choice.

- **10. Economics/Sociology**

- Trinity College Dublin
- **578** points
- **4 Years**
- **Overview:** EconomicsAny society has to address the problem of how and what to produce for its material survival, and how the goods and services that are produced should be distributed among its population. Economists explore how people and institutions behave and function when producing, exchanging and using goods and services. Economists' main motivation is to find mechanisms that encourage efficiency in the production and use of

material goods and resources, while at the same time producing a pattern of income distribution that society finds acceptable. SociologyIf you want to understand the social changes taking place in the world today, and you are curious about people and society, then Sociology is for you. You will also gain the ability to understand topical issues and to present and communicate information and thoughts coherently. In addition, you will learn invaluable analytical, communication, research and presentation skills - transferable skills which can be applied to a wide range of careers and postgraduate programmes.

- **11. Law**

- Trinity College Dublin
- **578** points
- **4 Years**
- **Overview:** The law degree will appeal to you if you are interested in society and how it works, and with the broader question of the regulation of inter-personal relationships. A general interest in history and political developments, will be an advantage, as the law is deeply linked to its historical and political context.

- **12. Mathematics**

- Trinity College Dublin
- **578** points
- **4 Years**
- **Overview:** Mathematics is a broad and diverse subject which is used to model, analyse and understand several applications in the physical and biological sciences, engineering, management science, economics and finance. Its numerous applications are naturally interwoven with the underlying theory which is essential in developing one's logical reasoning, quantitative skills and problem-solving techniques.

- **13. Physiotherapy**

- University College Dublin
- **578** points
- **4 Years**
- **Overview:** Physiotherapists are healthcare professionals responsible for developing, maintaining and restoring movement and functional ability in adults and children using evidence-based practice. Studying Physiotherapy in UCD will provide you with the skills and qualifications required to practice as a physiotherapist upon graduation. With state-of-the-art facilities and globally recognised researchers as lecturers, you will learn in a culture of established academic excellence.

- **14. Engineering**

- Trinity College Dublin

- **577** points
- **4 Years**
- **Overview:** Engineering is about being creative in technical problem solving. Engineers make things possible by using mathematical and scientific principles together with analytical and design skills. They tackle existing problems by developing new solutions through innovative technologies. They also expand the frontiers of society by developing advanced materials, sustainable energy systems, construction technologies, transport systems, biomedical devices, and telecommunications infrastructure.

- **15. Finance**

- University College Cork
- **577** points
- **3 Years**
- **Overview:** Finance is concerned with the operation of financial markets and the valuation of financial assets, in particular in stock, bond, foreign exchange and interest rate markets. The BSc Finance is based equally on the subject areas of corporate finance and financial economics. This combined approach provides graduates with a thorough grounding in each area.

- **16. Psychology**

- Trinity College Dublin
- **577** points
- **4 Years**
- **Overview:** The School of Psychology aims to offer a knowledge base and a set of skills that not only equip students for the many careers that exist in psychology, but also prepare students intellectually for other careers. Psychology is a branch of science that demands clear, rigorous thinking, numeracy and the ability to define, study and solve problems in complex, changing settings.

- **17. Biomedical Engineering**

- University of Galway
- **568** points
- **4 Years**
- **Overview:** Biomedical Engineering is a relatively new branch of engineering that involves the use of cutting-edge technologies to help improve human healthcare. Biomedical engineers are involved in the design and creation of medical devices, implants such as stents, instruments and materials for clinical use.

- **18. Human Health and Disease**

- Trinity College Dublin

- **567** points
- **4 Years**
- **Overview:** The Human Health and Disease degree trains students for work in the field of biomedical research. It brings to life the fascinating connections between structure and function in the human body and explores the health and disease continuum in detail, including teaching on how medical therapies act to treat or even prevent disease. As an example, understanding brain structure and biochemistry allows us to appreciate how neurons communicate and this in turn is helping biomedical researchers and clinicians to identify new and effective ways to treat and prevent diseases such as dementia.

- **19. Biomedical Science**

- University of Galway
- **566** points
- **4 Years**
- **Overview:** Biomedical Science is the study of Life Science subjects related to human health and disease. Students will learn about the structure and function of the human body from the level of organs and tissues to the molecular level, as well as how drugs are used to treat disease. You will major in one of the following biomedical science subjects: Anatomy, Biochemistry, Pharmacology or Physiology.
