

RECOMMENDATION SET 1

- **0. Computer Science**

- University College Dublin
- **540** points
- **Overview:** The UCD Computer Science degree covers the fundamentals of Computer Science while also exposing students to the contemporary languages and technologies used in the industry. Key topics include programming, foundational mathematics, advanced software engineering, cloud development, theory of computer science, networks and security. The principal programming languages used are C, Java and Python. Specialised topics include computer graphics, game development, robotics, mobile development and others.
- **Why we recommended this:**

- **1. Computer Science and Information Technology**

- University of Galway
- **440** points
- **Overview:** We depend on electronic devices, such as computers and mobile phones, computer software and networks to store, process, transmit, retrieve and manipulate information. Students will cover the technology used in these devices and will focus on the development of the software applications that make these devices useful.
- **Why we recommended this:**

- **2. Computer Science (International)**

- TU Dublin - Grangegorman
- **351** points
- **Overview:** This course will provide you with the knowledge and skills to work as a global software engineer or as an application developer, able to develop as needed in an ever-changing global industry. On graduation, you'll be qualified to work in the international IT industry in a wide range of computer roles. You'll have a strong foundation in such areas as Internet development, cloud computing, mobile software, enterprise systems, artificial intelligence and games technology.
- **Why we recommended this:**

- **3. Information Technology**

- University of Galway
- **350** points

- **Overview:** Students are introduced to the basics of IT and computer methods. The course teaches useful skills in computer programming and application in the first year. As part of an Arts degree, this subject is one of three subjects you choose in first year. In second and third year you continue with two of the subjects taken in First Arts. It may be possible to take an extra year studying abroad.
- **Why we recommended this:**

- **4. Computer Science and Software Engineering (through Arts)**

- Maynooth University
- **349** points
- **Overview:** Study all the essentials of computing and software for mobile apps and websites, as well as key areas in mathematics, a major project and a six month placement in industry. Enjoy the huge benefit of studying another Arts subject with Computer Science in first year. This lends graduates a wider frame of reference.
- **Why we recommended this:**

- **5. Computer Science and Software Engineering (through Science)**

- Maynooth University
- **347** points
- **Overview:** Study all the essentials of computing and software, as well as key areas in mathematics, a major project and a six month placement in industry. Acquire hands-on programming skills and advanced problem solving techniques in our new dedicated computer science building (Eolas). You will study another Science subject or Critical Skills with Computer Science and Mathematics in first year.
- **Why we recommended this:**

- **6. Computer Science (Infrastructure)**

- TU Dublin - Grangegorman
- **346** points
- **Overview:** Computer Science (Infrastructure) is about developing software and infrastructure for applications ranging from those on smart devices to those in global corporations. This course provides the skills required to build data centres and networks, and to develop software securely, individually and in teams. You'll gain a working knowledge of the components of a computer and a network, become familiar with the components of an operating system, and learn to administrate large distributed systems.
- **Why we recommended this:**

- **7. Cloud Computing**

- TU Dublin - Tallaght
- **261** points

- **Overview:** Learn with the People who develop the best in the world! TU Dublin has been a leader in the delivery of Cloud courses for a number of years working closely with Amazon AWS and Microsoft Azure, global leaders in public cloud computing. The best in the world have developed their skills with us, in August 2019 a TU Dublin graduate won the coveted Gold Medal at the World Skills Competition for Cloud Computing in Kazan Russia.
- **Why we recommended this:**

- **8. Engineering**

- Trinity College Dublin
- **577** points
- **Overview:** Engineering is about being creative in technical problem solving. Engineers make things possible by using mathematical and scientific principles together with analytical and design skills. They tackle existing problems by developing new solutions through innovative technologies. They also expand the frontiers of society by developing advanced materials, sustainable energy systems, construction technologies, transport systems, biomedical devices, and telecommunications infrastructure.
- **Why we recommended this:**

- **9. Mechanical Engineering**

- University of Galway
- **566** points
- **Overview:** Mechanical Engineering is a subject concerned with the design and manufacture of parts and systems that make up the range of machinery and equipment you see around you, from a can opener to a jet aircraft. Mechanical engineers design the tools and processes necessary to create all man-made products, and are often involved from conceiving of an idea right through to seeing it as a finished product ready for its commercial application.
- **Why we recommended this:**

- **10. Engineering (Electrical & Electronic Engineering)**

- University College Cork
- **543** points
- **Overview:** BE Electrical and Electronic Engineering is a four-year professional engineering course designed to prepare students for employment in the electrical and electronic sectors in Ireland and abroad. It has a broad curriculum with strong practical content, including a work placement. It has an excellent record for graduate employment.
- **Why we recommended this:**

- **11. Mechanical & Manufacturing Engineering**

- Dublin City University

- **542** points
- **Overview:** Can you imagine designing and building a better electric vehicle, jet engine or wind turbine? Maybe you've figured out a way to improve inhalers or door handles. If you're fascinated by how things work and are made, enjoy getting caught up in the details, and thrive as part of a team, choose Mechanical and Manufacturing Engineering. Our students take things apart, figure out how they work and how to fix or improve them, then put them back together again. You'll get to use 3D printers and other advanced tools in DCU's state-of-the-art labs, while also absorbing engineering theory. It is at heart a maths-based course, but you'll also gain extensive skills and knowledge in engineering mechanics, computer simulation and analysis, design and manufacture, and project management. In third year, you'll do an eight-month work placement in industry and you also have the opportunity to study abroad. And you can extend your undergraduate BEng programme by a year to complete a masters degree.
- **Why we recommended this:**

- **12. Civil Engineering**

- University of Galway
- **521** points
- **Overview:** Civil Engineering is concerned with the planning, design, construction and maintenance of the built environment. It encompasses minor and major structures, ranging from drainage systems, houses, commercial buildings, roads and bridges to multi-story buildings and water and wastewater treatment facilities. The work of civil engineers is most visible in the structures in which we live and work.
- **Why we recommended this:**

- **13. Electrical Services & Energy Management**

- TU Dublin - Grangegorman
- **261** points
- **Overview:** Graduates of this course work in design teams to deliver electrical services to buildings and play an integral role in the operation and management of the energy facilities. You'll be equipped with the fundamental engineering, management and design skills you need to design electrical services for facilities and manage the energy consumption in facilities.
- **Why we recommended this:**

- **14. Mathematical Sciences**

- University College Cork
- **577** points
- **Overview:** Mathematical Sciences, both as a language and as a body of knowledge and technique, have provided the fundamental underpinnings of science and technology for centuries. Today, its influence stretches beyond the physical sciences and engineering into

medicine, business and finance, the life sciences, and the social sciences. Mathematical Sciences are also studied for the elegance of their ideas and the intellectual challenges they pose.

- **Why we recommended this:**

- **15. Mathematics (Social Sciences Two Subject Combination)**

- University College Dublin
- **490** points
- **Overview:** Mathematics has long played a central role in our quest to fully describe and understand the natural world. Nowadays, it is also a vital tool in many of the social sciences. Those who concentrate on this subject will gain an understanding of mathematical concepts and learn how to prove key facts and solve problems using deductive reasoning.
- **Why we recommended this:**

- **16. Journalism**

- Dublin City University
- **409** points
- **Overview:** DCU's BA in Journalism is a top degree in Ireland designed to equip you with practical skills in reporting and writing for different media as well as providing you with essential knowledge in politics, law, ethics, society and culture. This degree will really appeal to you if you have an enquiring mind because the world needs journalists to analyse, examine and reveal how things work and what the future holds for people.
- **Why we recommended this:**

- **17. Information and Communication Studies**

- University College Dublin
- **420** points
- **Overview:** Information & Communication Studies (ICS) equips you with the knowledge, skills, and tools to help you to make sense of a world where every aspect of human experience is affected by digital technology, media, data, and information in all formats. ICS explores digital information, social media, and communication and analyses their effects on societies, culture, politics, privacy, health, education and the many different spheres of public, private and personal life. Ultimately, ICS is about people, and understanding how people and technology interact and influence each other.
- **Why we recommended this:**

- **18. Physics**

- University College Dublin
- **544** points

- **Overview:** The UCD Science (DN200) course offers 27 degree subjects categorised into streams. Students can study subjects from more than one stream in first year. It is also possible for students to change their stream in first year. At the end of first year, students choose a minimum of two subjects to study in second year (for example Statistics and Mathematics or Genetics and Microbiology). Students will major in one of these subjects in third and fourth year.
- **Why we recommended this:**
- **19. Biological, Biomedical & Biomolecular Sciences**
 - University College Dublin
 - **544** points
 - **Overview:** The UCD Science (DN200) course offers 27 degree subjects categorised into streams. Students can study subjects from more than one stream in first year. It is also possible for students to change their stream in first year. At the end of first year, students choose a minimum of two subjects to study in second year (for example Statistics and Mathematics or Genetics and Microbiology). Students will major in one of these subjects in third and fourth year.
 - **Why we recommended this:**

RECOMMENDATION SET 2

- **0. Interior Design**
 - TU Dublin - Grangegorman
 - **862** points
 - **Overview:** This course is all about the art or process of designing the interior decoration of a room or building, and how we experience spaces and the objects in them. It's a powerful, essential part of our daily lives that affects how we live, work and play. Exciting recreational environments, unique domestic spaces, functional workplaces, inspiring retail spaces, that's interior design at work.
 - **Why we recommended this:**
- **1. Medicine**
 - Trinity College Dublin
 - **739** points
 - **Overview:** Medicine is a unique course in that students study a broad range of subjects with the primary goal of understanding the science and practice of healing. Medicine and healthcare are constantly evolving as new knowledge and therapies emerge to prevent and treat illness. Each day brings a new patient with new healthcare challenges.
 - **Why we recommended this:**

- **2. Fine Art**

- TU Dublin – Grangegorman
- **701** points
- **Overview:** The BA in Fine Art is designed for students who wish to work as cultural producers in the Fine Art sector. The course is focused primarily on acquiring the knowledge and skills that are needed to operate as a visual artist in a competitive environment, nationally and internationally. There's a strong emphasis on developing skills acquisition, creative intelligence and conceptual and critical thinking abilities, which are integrated with modules in Critical Theory and Professional Practice.
- **Why we recommended this:**

- **3. Music Education**

- Trinity College Dublin
- **656** points
- **Overview:** If you love sharing music, already have a competent standard of music performance, and wish to combine these qualities with a teaching career, then this course is ideally suited to you. Whether your interests are primarily academic or practical, your experience of this vast and rich discipline will be greatly advanced. As an academic study, music fosters independence of thought, creativity and critical and analytical skills. This course offers opportunities to perform music, to share music with others via teaching and performing, and to conduct a number of different ensembles.
- **Why we recommended this:**

- **4. Design – Visual Communication**

- TU Dublin – Grangegorman
- **654** points
- **Overview:** The work of the Design – Visual Communication graduate is all about breathing life into images, text and concepts, turning them on their head and communicating them in a fresh way to a wide audience. This four-year course will suit you if you wish to become a graphic designer, illustrator, typographer or digital media designer.
- **Why we recommended this:**

- **5. Veterinary Medicine**

- University College Dublin
- **589** points
- **Overview:** This course will educate you to the best international standards in veterinary medicine and is accredited nationally by the Veterinary Council of Ireland (VCI), by the European Association of Establishments for Veterinary Education (EAEVE) and is one of only 6 veterinary schools in Europe currently accredited by the American Veterinary Medical Association (AVMA). The veterinary profession is concerned with the promotion of the health

and welfare of animals of special importance to society. This involves the care of healthy and sick animals, the prevention, recognition, control and treatment of their diseases and of diseases transmitted from animals to man, and the welfare and productivity of livestock.

- **Why we recommended this:**

- **6. Commercial Modern Music**

- TU Dublin - Grangegorman
- **585** points
- **Overview:** This four-year course has been designed for guitarists, bass players, drummers, vocalists, songwriters, music producers and those running commercial music projects who want to gain a Level 8 qualification in modern music, while at the same time fulfilling their creative and commercial potential. It will encourage you to hone your live performance skills and recording studio technical knowledge while also developing your career goals, which may include being a professional performer, professional songwriter or producer, music manager or publisher, academic researcher or teacher.
- **Why we recommended this:**

- **7. Engineering**

- Trinity College Dublin
- **577** points
- **Overview:** Engineering is about being creative in technical problem solving. Engineers make things possible by using mathematical and scientific principles together with analytical and design skills. They tackle existing problems by developing new solutions through innovative technologies. They also expand the frontiers of society by developing advanced materials, sustainable energy systems, construction technologies, transport systems, biomedical devices, and telecommunications infrastructure.
- **Why we recommended this:**

- **8. Finance**

- University College Cork
- **577** points
- **Overview:** Finance is concerned with the operation of financial markets and the valuation of financial assets, in particular in stock, bond, foreign exchange and interest rate markets. The BSc Finance is based equally on the subject areas of corporate finance and financial economics. This combined approach provides graduates with a thorough grounding in each area.
- **Why we recommended this:**

- **9. Mathematical Sciences**

- University College Cork

- **577** points
- **Overview:** Mathematical Sciences, both as a language and as a body of knowledge and technique, have provided the fundamental underpinnings of science and technology for centuries. Today, its influence stretches beyond the physical sciences and engineering into medicine, business and finance, the life sciences, and the social sciences. Mathematical Sciences are also studied for the elegance of their ideas and the intellectual challenges they pose.
- **Why we recommended this:**

- **10. Physiotherapy**

- Trinity College Dublin
- **577** points
- **Overview:** Physiotherapy (also known as physical therapy) places full and functional movement at the heart of what it means to be healthy. It involves treating patients of all ages with a range of illnesses and conditions, including those with back and neck problems, sports injuries, arthritis, or those recovering from strokes and operations. The focus of our treatment is exercise prescription.
- **Why we recommended this:**

- **11. Psychology**

- Trinity College Dublin
- **577** points
- **Overview:** The School of Psychology aims to offer a knowledge base and a set of skills that not only equip students for the many careers that exist in psychology, but also prepare students intellectually for other careers. Psychology is a branch of science that demands clear, rigorous thinking, numeracy and the ability to define, study and solve problems in complex, changing settings.
- **Why we recommended this:**

- **12. Biomedical Engineering**

- University of Galway
- **568** points
- **Overview:** Biomedical Engineering is a relatively new branch of engineering that involves the use of cutting-edge technologies to help improve human healthcare. Biomedical engineers are involved in the design and creation of medical devices, implants such as stents, instruments and materials for clinical use.
- **Why we recommended this:**

- **13. Human Health and Disease**

- Trinity College Dublin

- **567** points
- **Overview:** The Human Health and Disease degree trains students for work in the field of biomedical research. It brings to life the fascinating connections between structure and function in the human body and explores the health and disease continuum in detail, including teaching on how medical therapies act to treat or even prevent disease. As an example, understanding brain structure and biochemistry allows us to appreciate how neurons communicate and this in turn is helping biomedical researchers and clinicians to identify new and effective ways to treat and prevent diseases such as dementia.
- **Why we recommended this:**

- **14. Biomedical Science**

- University of Galway
- **566** points
- **Overview:** Biomedical Science is the study of Life Science subjects related to human health and disease. Students will learn about the structure and function of the human body from the level of organs and tissues to the molecular level, as well as how drugs are used to treat disease. You will major in one of the following biomedical science subjects: Anatomy, Biochemistry, Pharmacology or Physiology.
- **Why we recommended this:**

- **15. Business and Law**

- University College Dublin
- **566** points
- **Overview:** The Business & Law (BBL) degree is a popular choice for many students and is extremely well regarded by employers across the legal and financial communities. The degree is a 'double major' which means it combines law and business in a single degree, providing an ideal skill-set for the commercial world and offering valuable career flexibility. If you choose this degree, you will undertake business and law modules in equal measure for your first three years in both the UCD Sutherland School of Law and the UCD Quinn School of Business. This allows you to gain a deep understanding of both disciplines while offering you the opportunity to choose in final year which area interests you most for your career progression.
- **Why we recommended this:**

- **16. Law (BCL)**

- University College Dublin
- **566** points
- **Overview:** The UCD Bachelor of Civil Law (BCL) degree enjoys a proud history and an established reputation at home and abroad. The BCL degree allows you to immerse yourself in the study of law, to engage with a range of interesting legal perspectives and to acquire a profound understanding of how law works in theory and in practice.

- **Why we recommended this:**

- **17. Law and Business**

- University College Cork
- **566** points
- **Overview:** The BCL (Law and Business) is a joint honours degree combining the related disciplines of law and business. This exciting four-year programme: explores the relationship between law and business, in areas such as business organisation, finance, and market regulation, and applies key legal and business tools of analysis to examine issues affecting the performance of firms and industries in a global business environment.
- **Why we recommended this:**

- **18. Law with Economics**

- University College Dublin
- **566** points
- **Overview:** This course allows you to obtain a highly respected degree in law, whilst simultaneously acquiring a broad knowledge of economics. Certain areas of law (e.g. competition regulation and intellectual property) are heavily influenced by economic theory. BCL (Law with Economics) graduates are uniquely equipped to understand these regulatory frameworks in all of their conceptual complexity. On this degree, you'll embark on a field of cross-disciplinary study which is intellectually very demanding, but also tremendously enriching and of immense practical importance.
- **Why we recommended this:**

- **19. Law with French Law**

- University College Dublin
- **566** points
- **Overview:** Law with French Law is one of two French Law Courses offered by Sutherland School of Law, the other being the dual degree - the BCL/Maîtrise (more information on the following page). All students interested in the French Law Courses enter the BCL (Law with French Law) in first year. Both degrees offer the exciting opportunity for immersion in two of the world's major legal systems. Student will learn about the common law system, practised in Ireland and the UK (and in some form, in most of the English-speaking world) and the civil law system which is used throughout Europe.
- **Why we recommended this:**
