

RECOMMENDATION SET 1

- **0. Biomedical Science**

- Maynooth University
- **0** points
- **4 Years**
- **Overview:** Students learn how to use analytical and technical procedures to monitor and improve human health and to investigate disease processes. The degree is broadly similar to the pre-clinical component of a medical degree. Students also learn how to ask questions, make observations, and analyse evidence in theory work and through practical laboratory sessions- and to present and communicate findings clearly while developing computer literacy and research skills.

- **1. Veterinary Medicine**

- University College Dublin
- **589** points
- **5 Years**
- **Overview:** This course will educate you to the best international standards in veterinary medicine and is accredited nationally by the Veterinary Council of Ireland (VCI), by the European Association of Establishments for Veterinary Education (EAEVE) and is one of only 6 veterinary schools in Europe currently accredited by the American Veterinary Medical Association (AVMA). The veterinary profession is concerned with the promotion of the health and welfare of animals of special importance to society. This involves the care of healthy and sick animals, the prevention, recognition, control and treatment of their diseases and of diseases transmitted from animals to man, and the welfare and productivity of livestock.

- **2. Medicine**

- University College Cork
- **730** points
- **5 Years**
- **Overview:** The Medicine curriculum at UCC is rooted in the basic Medical Sciences of Anatomy, Physiology, and Biochemistry, but also places emphasis on clinical instruction. A distinctive feature is small-group, patient-centred teaching, in which students learn the skills of listening and communicating, history-taking and clinical examination.
