

RECOMMENDATION SET 1

- **0. Engineering (Common Entry)**

- Maynooth University
- **364** points
- **4 Years**
- **Overview:** Electronic Engineering at Maynooth has developed world-class expertise in the area of mobile communications, biomedical diagnostics and technologies, and the intelligent control of large machines such as Robots or wave machines. Each of these areas is matched to rapidly growing industries and excellent job opportunities. By bringing this deep knowledge to all the undergraduate programmes, we provide our graduates with a world-class electronic engineering education but also a head start in these exciting and developing areas.

- **1. Mechanical Engineering (General Entry)**

- TU Dublin - Tallaght
- **358** points
- **4 Years**
- **Overview:** Engineers are in extremely high demand right now in Ireland and globally with exponential growth in job opportunities, especially in the Mechanical, Automation and Biomedical sector. Engineering graduates are trained to be creative and inventive, and to solve difficult problems such as the development of new technologies from jet engines to robots to artificial hip implants to hybrid cars and train components.

- **2. Biotechnology**

- Maynooth University
- **430** points
- **4 Years**
- **Overview:** Biotechnology explores all aspects of modern molecular biology including recombinant DNA technology, antibody production and uses, and animal cell culture. It covers disciplines including genetics, molecular biology, immunology, molecular microbiology, biochemistry, and cell biology.

- **3. Robotics and Intelligent Devices**

- Maynooth University
- **350** points
- **4 years**

- **Overview:** In this robotics and Intelligent Devices programme we focus on the design, implementation, and use of intelligent physical things in the environment. These include robots, autonomous vehicles, smart sensors, and internet-of-things devices. In the modern world, many of these things are the basis for brand new services or service improvements in areas such as health and wellbeing, assistive living, safety, smart manufacturing, retail, and hospitality, among others.

- **4. Mechatronic Engineering**

- TU Dublin - Blanchardstown
- **301** points
- **4 Years**
- **Overview:** Mechatronics is defined as a combination of mechanics and electronics which is controlled by computers. This includes designing robots or machines for various purposes; from the space rovers which explore planets, to auto-focusing digital cameras.

- **5. Medicine**

- University College Dublin
- **738** points
- **6 Years**
- **Overview:** Our curriculum is patient-centred and continually adapts to the needs of society and developments in medical knowledge. You'll learn from world-class educators and patients in state-of-the-art facilities, immerse yourself in our acclaimed undergraduate student research programme and benefit from a diverse, international student population. Teaching methods include lectures, small group sessions, practicals and tutorials. There are four themes running through the entirety of both our undergraduate and graduate programmes: Evidence based medicine and research; Clinical competencies and preparedness; Professional medical practice; and Healthcare systems, quality and patient safety.

- **6. Veterinary Medicine**

- University College Dublin
- **589** points
- **5 Years**
- **Overview:** This course will educate you to the best international standards in veterinary medicine and is accredited nationally by the Veterinary Council of Ireland (VCI), by the European Association of Establishments for Veterinary Education (EAEVE) and is one of only 6 veterinary schools in Europe currently accredited by the American Veterinary Medical Association (AVMA). The veterinary profession is concerned with the promotion of the health and welfare of animals of special importance to society. This involves the care of healthy and sick animals, the prevention, recognition, control and treatment of their diseases and of diseases transmitted from animals to man, and the welfare and productivity of livestock.

- **7. Veterinary Nursing**

- University College Dublin
- **487** points
- **4 Years**
- **Overview:** The degree provides the graduate with not only a sound academic foundation but also the practical skills and competencies with which to build a solid career as a professional veterinary nurse. Students receive a high-quality education through lectures, tutorials and practical classes, as well as off-site work experience. The curriculum reflects the demands on the Irish veterinary nurse in practice by incorporating teaching on small animal (including exotics), farm animal and equine nursing.

- **8. General Nursing**

- Maynooth University
- **466** points
- **4 Years**
- **Overview:** This innovative programme integrates theory, skills practice and practice placements. It aims to prepare competent graduates who are confident in their ability to deliver person centred, safe, compassionate, evidence-based, effective and high-quality care across diverse healthcare settings.

- **9. Information and Communication Studies**

- University College Dublin
- **420** points
- **3 Years**
- **Overview:** Information & Communication Studies (ICS) equips you with the knowledge, skills, and tools to help you to make sense of a world where every aspect of human experience is affected by digital technology, media, data, and information in all formats. ICS explores digital information, social media, and communication and analyses their effects on societies, culture, politics, privacy, health, education and the many different spheres of public, private and personal life. Ultimately, ICS is about people, and understanding how people and technology interact and influence each other.

- **10. Media, Film & Cultural Studies**

- Maynooth University
- **300** points
- **3 Years**
- **Overview:** Media & Cultural Studies provides you with a critical lens through which to examine the roles of film, TV, audio, social media platforms and interactive media in shaping your lived experiences as well as developing your understanding of these important industries. You will learn how to research and analyse media cultures, genres and

technologies, to critique the role of media in popular culture, society and politics and how media and cultural businesses work.

- **11. Media Production and Digital Arts**

- TU Dublin - Tallaght
- **283** points
- **4 Years**
- **Overview:** Working in a studio-based environment, our hands-on production modules and specialist workshops focus on digital content creation and will have you thinking, designing and creating right from the start. This degree is designed to be fluid, responding to both your interests and the ever-changing industry landscape. With a complementary suite of practical and theoretical modules, all aspects of the course inform and are informed by each other.

- **12. Marketing and Global Cultures**

- Maynooth University
- **400** points
- **3 or 4 Years**
- **Overview:** An essential challenge for businesses in Ireland is how they can connect the capabilities of our workforce to contribute to solutions for people who are largely in markets outside Ireland, across the EU and the wider global community. Business needs graduates who can both understand the fundamentals of how to create value for customers and how to translate them into solutions and services that fit the needs of diverse cultures.

- **13. Food Science**

- University College Dublin
- **466** points
- **4 Years**
- **Overview:** The Food Science Programme at UCD develops your scientific knowledge and practical skills in producing sustainable, high-quality, safe, and nutritious food for the global market. As a food scientist, you will be involved in all aspects of the food chain, from production to the consumer. You will learn core sciences such as biology, chemistry, and mathematics, and apply them to food physics, analysis, microbiology, and sensory science. You will also gain expertise in food chemistry, processing, and new product development, preparing you for careers in production management, nutrition, food quality and safety, sales and marketing, and research. Applicants can pick one of two pathways: Food Science or Sustainable Food Systems

- **14. Food Science and Human Nutrition**

- Maynooth University

- **440** points
- **4 Years**
- **Overview:** This programme is for students who wish to work in the area of food production, quality assurance, nutrition, and product development, with a focus on future foods and the role of food in the health of people, in Ireland and globally. this course provides students with a broad science-based education, with specialist content on the future of food development, human nutrition, and the role of food and healthy living, and also explores the social and global challenges around food security.

- **15. Pharmaceutical and Biomedical Chemistry**

- Maynooth University
- **434** points
- **4 Years**
- **Overview:** This course is suited to those who wish to specialise in chemistry for the pharmaceutical and biomedical industries. Pharmaceutical Chemistry is a very important branch of Chemistry that is applied to the synthesis and formulation of new therapeutic drugs as well as the manufacture of medicinal compounds on a large scale. In this programme you will receive an excellent education in chemistry (physical chemistry, organic chemistry, inorganic chemistry), and have the opportunity to specialise in pharmaceutical chemistry, medicinal chemistry and bioinorganic chemistry.

- **16. Landscape Architecture**

- University College Dublin
- **485** points
- **4 Years**
- **Overview:** The design studio is central to Landscape Architecture. You'll spend most of your time in the studio, pursuing individual and small group project work. You'll learn by doing design projects that allow you to develop creative skills and apply knowledge taught through lectures, seminars, drawing classes, field trips, reviews, readings, individual and group tutorials. In your third year you will also gain professional experience interning in a landscape related company / institution.

- **17. Electronic Engineering and Engineering Software (General Entry)**

- TU Dublin - Tallaght
- **243** points
- **4 Years**
- **Overview:** This course is designed to produce professional engineers who can design and optimise complex hardware, software and communications systems, and you will be at the forefront of developing the connected world. You'll develop the skills you need to work in all aspects of the ICT industry, including software design, information technology, telecommunications, and computer network engineering.

- **18. Agricultural Systems Technology - Agricultural Science**

- University College Dublin
- **431** points
- **4 Years**
- **Overview:** Agricultural Systems Technology is aimed at students who wish to learn how to build, develop, and manage technology for the agriculture sector. Students will gain a deep understanding of how to use technology in order to improve and enhance sustainability, efficiency and reliability in farming and food production. You will take classes in engineering, science, mathematics and data science. Upon completing the course, you will be uniquely equipped to build, develop and manage technologies such as computer systems, networks, data management and sensors, machinery systems and precision agriculture.

- **19. Computer Science and Software Engineering (through Arts)**

- Maynooth University
- **349** points
- **4 Years**
- **Overview:** Study all the essentials of computing and software for mobile apps and websites, as well as key areas in mathematics, a major project and a six month placement in industry. Enjoy the huge benefit of studying another Arts subject with Computer Science in first year. This lends graduates a wider frame of reference.

RECOMMENDATION SET 2

- **0. Linguistics/Classical Languages**

- Trinity College Dublin
- **498** points
- **4 Years**
- **Overview:** Linguistics Students of Linguistics engage in evidence-based analysis of language, acquiring skills and techniques that allow investigation of different aspects of language structure such as sound, words and grammar. This involves key transferable skills in problem solving and critical thinking. Classical Languages The study of Classical Languages is concerned with the language, literature and thought of either Ancient Greece or Ancient Rome. You will choose to study either Greek or Latin. Through the reading of literature in the original language and the examination of key aspects of ancient history, you will develop a thorough knowledge of the classical world and a critical approach to textual and material culture.

- **1. Linguistics/Computer Science**

- Trinity College Dublin
- **498** points
- **4 Years**
- **Overview:** The combined study of Computer Science and Linguistics yields opportunities for graduates to specialise in computational speech and language processing or text analysis. Linguistics often appeals to students who are curious about language as one of the most fascinating aspects of human knowledge and behaviour. Linguistics is also appealing to those who enjoy detailed, problem-solving analysis and careful argumentation. Students of Linguistics engage in evidence-based analysis of language, acquiring skills and techniques that allow investigation of different aspects of language structure such as sound, words and grammar. This involves key transferable skills in problem solving and critical thinking.

- **2. Linguistics/Modern Language**

- Trinity College Dublin
- **498** points
- **4 Years**
- **Overview:** Linguistics Students of Linguistics engage in evidence-based analysis of language, acquiring skills and techniques that allow investigation of different aspects of language structure such as sound, words and grammar. This involves key transferable skills in problem solving and critical thinking. Modern Language Within the Modern Languages programme you study two modern European languages. It is the most intensive exposure to languages and cultures that Trinity College has to offer. You can choose between French, German, Irish, Italian, Russian and Spanish. Apart from French and Irish all languages can be studied from both advanced and beginners level

- **3. Linguistics/Philosophy**

- Trinity College Dublin
- **498** points
- **4 Years**
- **Overview:** Linguistics Students of Linguistics engage in evidence-based analysis of language, acquiring skills and techniques that allow investigation of different aspects of language structure such as sound, words and grammar. This involves key transferable skills in problem solving and critical thinking. Philosophy This course offers the opportunity to engage in depth with questions of metaphysics (about the fundamental nature of reality), epistemology (the theory of knowledge), ethics (theories of right and wrong), political philosophy (the nature of the just state), philosophy of religion (reasoning about God), philosophy of mind (questions about thought, language and reason) and various other areas.

- **4. Archaeology (Social Sciences Two Subject Combination)**

- University College Dublin

- **490** points
- **4 Years**
- **Overview:** If you study Archaeology, you will see the world, time and the human condition in an entirely new way. Archaeology is a uniquely multidisciplinary subject, using all sources of evidence from the past, from ancient manuscripts to the scientific analysis of plants, animals and materials. Through undertaking Archaeology as a degree, you will learn how to assess, explain and make connections between different types of evidence that will allow you to develop a deeper understanding about the past. Students will also develop practical skills valued by employers, such as report writing, teamwork, presentation, communication and analytical skills.

- **5. Computational Social Science**

- University College Dublin
- **490** points
- **4 Years**
- **Overview:** The world around us is undergoing significant changes due to digitization and deployment of Artificial Intelligence. Today we are more interconnected than ever before. As we navigate this new social landscape, we leave behind digital footprints that can be analyzed and interpreted through the lens of Computational Social Science. This field of study leverages the power of big data, computer simulations, and social network analysis to gain insights into social phenomena and individual behaviour.

- **6. Economics (Social Sciences Two Subject Combination)**

- University College Dublin
- **490** points
- **4 Years**
- **Overview:** Economics explores how and why people make decisions and choose between alternative ways of spending their money and using their time, energy and skills. That is why Economics can help to shed light on decision-making in areas from love and marriage, to sports and crime. If you are interested in people's behaviour and in current affairs, and if you enjoy problem-solving and are naturally analytical with good numeracy skills, then Economics will appeal to you.

- **7. Economics, Mathematics & Statistics**

- University College Dublin
- **490** points
- **4 Years**
- **Overview:** If you are interested in Mathematics, Statistics and Economics, then this course enables you to explore these areas in depth, while also emphasising how they complement each other. Economists employ mathematics to design theoretical models and use statistics to test these models and to explore the tremendous amount of data that is

generated by the economy. In turn, the models and data that are part of the study of Economics provide an interesting source of applications for students that have learned mathematical and statistical skills.

- **8. Geography (Social Sciences Two Subject Combination)**

- University College Dublin
- **490** points
- **4 Years**
- **Overview:** Geography is the only discipline that combines the study of both the natural and social worlds, and their interaction, and is key to solving global problems such as climate change, poverty, migration, urbanisation and environmental management. By studying Geography in UCD, you will understand the context in which environmental, socio-cultural and politico-economic decision-making takes place and develop skills that prepare you for the workplaces and societies of tomorrow.

- **9. History (Social Sciences Two Subject Combination)**

- University College Dublin
- **490** points
- **4 Years**
- **Overview:** History is the pursuit of how we got here and the stories that we tell ourselves to explain the past. Working from ordinary to extraordinary, local to global, fact to fiction, you'll develop critical thinking, argument and analysis skills that lie at the heart of careers in media, government, culture and education.

- **10. Information & Communication Studies (Social Sciences Two Subject Combination)**

- University College Dublin
- **490** points
- **4 Years**
- **Overview:** Information & Communication Studies (ICS) equips you with the knowledge, skills, and tools to help you to make sense of a world where every aspect of human experience is affected by digital technology, media, data, and information in all formats. ICS explores digital information, social media, and communication and analyses their effects on societies, culture, politics, privacy, health, education and the many different spheres of public, private and personal life.

- **11. Mathematics (Social Sciences Two Subject Combination)**

- University College Dublin
- **490** points
- **4 Years**

- **Overview:** Mathematics has long played a central role in our quest to fully describe and understand the natural world. Nowadays, it is also a vital tool in many of the social sciences. Those who concentrate on this subject will gain an understanding of mathematical concepts and learn how to prove key facts and solve problems using deductive reasoning.

- **12. Philosophy (Social Sciences Two Subject Combination)**

- University College Dublin
- **490** points
- **4 Years**
- **Overview:** Philosophy is essentially about dialogue and discussion, about giving reasons and examples, about counter-arguments and counter-examples. We read the work of great philosophers, but we also challenge their arguments and conclusions. Although all the modules are based on lectures, many of these are highly interactive. In addition, philosophy is rare in the university for offering small-group tutorials for all of its modules.

- **13. Philosophy, Politics and Economics**

- University College Dublin
- **490** points
- **4 Years**
- **Overview:** PPE provides a broad and deep understanding of how a society works, and indeed how international society works. It examines the complex economic and political forces in play, the problems of measuring and assessing the health of society, and the principles of justice that should guide political decision-making to improve society. PPE will teach students how to read beyond media headlines, and where to find more information about the hot policy questions of the day, in national and international contexts.

- **14. Politics and International Relations (Social Sciences Two Subject Combination)**

- University College Dublin
- **490** points
- **4 Years**
- **Overview:** With a degree in Politics and International Relations, you will develop the knowledge and skills required to analyse the complex interplay between national and international political institutions, systems and forces. In first year, you will be introduced to the core areas of politics, giving you a solid foundation for future study. In subsequent years, you will pursue the areas of politics and international relations that interest you most.

- **15. Social Justice (Social Sciences Two Subject Combination)**

- University College Dublin
- **490** points
- **4 Years**

- **Overview:** The subject of Social Justice draws on a range of academic disciplines in order to advance understanding of issues such as inequality, discrimination and human rights abuses. It will appeal to those who would like to acquire the knowledge and skills to understand and challenge injustice and help bring about social change.

- **16. Social Sciences (Two Subject Combination)**

- University College Dublin
- **490** points
- **3 Years**
- **Overview:** Social Sciences students explore society and how people behave as individuals and in groups. With the four-year Social Sciences degree, you choose DN700 at CAO and then select your preferred option below. Your subject choices are guaranteed. The Two Subjects Choice (TSC) options are: Archaeology; Economics; Geography; Information & Communication Studies, Philosophy; Politics and Sociology. There are options to change subject choices at the end of first year if you wish. You will gain a deep understanding of each subject you choose to study and develop real-world skills in research, communication and leadership. You may additionally apply for an internship, or study abroad for a year or a semester. You will learn to analyse, criticise and challenge beliefs and assumptions - including your own.

- **17. Sociology (Social Sciences Two Subject Combination)**

- University College Dublin
- **490** points
- **4 Years**
- **Overview:** If you are interested in people, you will be interested in sociology. It is relevant for understanding almost every aspect of our lives. We are all part of society, we are connected with each other and we are affected by the people around us. In the same way, we shape the social context for others as well. Sociology provides you with the mindset and the research tools to observe the social world, make connections, understand differences, norms, cultures or inequalities.

- **18. Statistics (Social Sciences Two Subject Combination)**

- University College Dublin
- **490** points
- **4 Years**
- **Overview:** If you are interested in studying Statistics with an Arts and Humanities or Social Science subject, then this degree could be for you. Statistics is the science of transforming data into knowledge and understanding, providing a principled approach to making data-informed decisions. Statistical methods enable us to gain insights from data, and with the advent of powerful computing technology, these methods have become widely used in many sectors.

- **19. English Literature/Classical Languages**

- Trinity College Dublin
- **487** points
- **4 Years**
- **Overview:** English Literature English Literature covers a broad range of literatures written in the English language, from Chaucer to the present day. The aim of the course is to help students acquire a thorough knowledge of the history of differing literatures while also enabling them to develop a sophisticated critical consciousness and an awareness of critical and cultural theory. Classical Languages The study of Classical Languages is concerned with the language, literature and thought of either Ancient Greece or Ancient Rome. You will choose to study either Greek or Latin. Through the reading of literature in the original language and the examination of key aspects of ancient history, you will develop a thorough knowledge of the classical world and a critical approach to textual and material culture.
