

RECOMMENDATION SET 1

- **0. Post Primary Teacher Education - Technology, Engineering and Graphics**

- Dublin City University
- **402** points
- **4 Years**
- **Overview:** This is a course for people who are interested in becoming post-primary teachers in the areas of Technology, Engineering and Graphics. On this degree, you'll learn about designing and innovating, and in coming up with creative solutions for the challenges facing society and industry. The four-year programme will be delivered through a partnership of DCU and Technological University of the Shannon (TUS). The first two years of study will take place at the TUS Athlone campus, and the final two years at the DCU Institute of Education in Dublin.

- **1. Physical Education with Biology**

- Dublin City University
- **521** points
- **4 Years**
- **Overview:** Do you really enjoy getting active while also having a passion for subjects such as biology and science? This course is a brilliant opportunity to blend your interests in a substantive way and go on to make a positive impact on society through education. Once you graduate, you can teach PE and Biology up to Leaving Cert level, and Science for Junior Cert level, or choose from a wide range of other exciting career paths. This course offers a unique blend of academic subjects, taught in a way that emphasises learning through practical experiences. During the course, you'll gain a comprehensive understanding of the content, theory, and skills of different physical activities (such as athletics, games, aquatics, dance, and outdoor activities), biology, science and education. You'll also improve your communication, leadership, and critical thinking skills. Future-proof your life In both third and fourth year, you'll do a comprehensive professional school placement and you can also choose to study overseas through the Erasmus programme.

- **2. Physical Education with Mathematics**

- Dublin City University
- **499** points
- **4 Years**
- **Overview:** Do you really enjoy both physical activity and mathematics? This course is a brilliant opportunity to combine your passions and go on to make a positive impact on

society through education. Once you graduate from this course, you can teach these subjects up to Leaving Cert level or choose from a wide range of other exciting career paths. This course offers a unique blend of academic subjects, taught in a way that emphasises learning through practical experiences. During the course, you'll gain a comprehensive understanding of the content, theory, and skills of different physical activities (such as athletics, games, aquatics, dance, and outdoor activities), maths and education. You'll also improve your communication, leadership, and critical thinking skills.

- **3. Science and Mathematics Education**

- Dublin City University
- **443** points
- **4 Years**
- **Overview:** If you love science and maths, and would like to share your enthusiasm, interest and knowledge with young people, you'll thrive on the BSc in Science and Mathematics Education. Science and maths teachers work to develop their pupils' understanding of the world around them and to educate future generations of scientists, engineers and technologists, not to mention citizens who are scientifically, mathematically and technically literate. You'll build a strong foundation in key areas of education, mathematics and either physics or chemistry, developing essential mathematical thinking skills, and scientific practices and ways of working throughout the four years. You'll also study the history, psychology, sociology and philosophy of education, as well as undertaking curriculum studies.

- **4. Engineering**

- Trinity College Dublin
- **577** points
- **4 Years**
- **Overview:** Engineering is about being creative in technical problem solving. Engineers make things possible by using mathematical and scientific principles together with analytical and design skills. They tackle existing problems by developing new solutions through innovative technologies. They also expand the frontiers of society by developing advanced materials, sustainable energy systems, construction technologies, transport systems, biomedical devices, and telecommunications infrastructure.

- **5. Mechanical Engineering**

- University of Galway
- **566** points
- **4 Years**
- **Overview:** Mechanical Engineering is a subject concerned with the design and manufacture of parts and systems that make up the range of machinery and equipment you see around you, from a can opener to a jet aircraft. Mechanical engineers design the tools and

processes necessary to create all man-made products, and are often involved from conceiving of an idea right through to seeing it as a finished product ready for its commercial application.

- **6. Engineering (Electrical & Electronic Engineering)**

- University College Cork
- **543** points
- **4 Years**
- **Overview:** BE Electrical and Electronic Engineering is a four-year professional engineering course designed to prepare students for employment in the electrical and electronic sectors in Ireland and abroad. It has a broad curriculum with strong practical content, including a work placement. It has an excellent record for graduate employment.

- **7. Mechanical & Manufacturing Engineering**

- Dublin City University
- **542** points
- **4 Years**
- **Overview:** Can you imagine designing and building a better electric vehicle, jet engine or wind turbine? Maybe you've figured out a way to improve inhalers or door handles. If you're fascinated by how things work and are made, enjoy getting caught up in the details, and thrive as part of a team, choose Mechanical and Manufacturing Engineering. Our students take things apart, figure out how they work and how to fix or improve them, then put them back together again. You'll get to use 3D printers and other advanced tools in DCU's state-of-the-art labs, while also absorbing engineering theory. It is at heart a maths-based course, but you'll also gain extensive skills and knowledge in engineering mechanics, computer simulation and analysis, design and manufacture, and project management. In third year, you'll do an eight-month work placement in industry and you also have the opportunity to study abroad. And you can extend your undergraduate BEng programme by a year to complete a masters degree.

- **8. Medicine**

- University College Cork
- **730** points
- **5 Years**
- **Overview:** The Medicine curriculum at UCC is rooted in the basic Medical Sciences of Anatomy, Physiology, and Biochemistry, but also places emphasis on clinical instruction. A distinctive feature is small-group, patient-centred teaching, in which students learn the skills of listening and communicating, history-taking and clinical examination.

- **9. Veterinary Medicine**

- University College Dublin
- **589** points
- **5 Years**
- **Overview:** This course will educate you to the best international standards in veterinary medicine and is accredited nationally by the Veterinary Council of Ireland (VCI), by the European Association of Establishments for Veterinary Education (EAEVE) and is one of only 6 veterinary schools in Europe currently accredited by the American Veterinary Medical Association (AVMA). The veterinary profession is concerned with the promotion of the health and welfare of animals of special importance to society. This involves the care of healthy and sick animals, the prevention, recognition, control and treatment of their diseases and of diseases transmitted from animals to man, and the welfare and productivity of livestock.

- **10. Occupational Therapy**

- University College Cork
- **566** points
- **4 Years**
- **Overview:** Students on this broad and varied Occupational Therapy course study psychology, anatomy and physiology, as well as occupational therapy theories, assessment and treatment approaches and evidence-based practice.

- **11. Children's and General Nursing (Integrated)**

- University College Cork
- **522** points
- **4 Years**
- **Overview:** The Children's and General Nursing course will provide you with opportunities to develop knowledge and skills relevant to children's and general nursing practice, including independent and critical thinking and problem-solving. It will enable you to ensure that the nursing care you deliver is up-to-date and based on the best current evidence.

- **12. Law and Human Rights**

- University of Galway
- **520** points
- **4 Years**
- **Overview:** The four-year Bachelor of Civil Law (Human Rights) is an innovative and unique programme - the first of its kind in Ireland. It offers students the opportunity to combine a full undergraduate law programme with the study of human rights.

- **13. Social Justice (Social Sciences Two Subject Combination)**

- University College Dublin
- **490** points

- **4 Years**
- **Overview:** The subject of Social Justice draws on a range of academic disciplines in order to advance understanding of issues such as inequality, discrimination and human rights abuses. It will appeal to those who would like to acquire the knowledge and skills to understand and challenge injustice and help bring about social change.

- **14. International Relations**

- Dublin City University
- **411** points
- **4 Years**
- **Overview:** During this degree, you will learn about issues such as conflict, peace and security, intelligence, terrorism, globalisation, third-world debt and climate change. By the end of this unique and innovative course, you will have learned about international politics, development and regional studies from a global perspective to equip you for careers working with international organisations, institutions and NGOs.

- **15. Law**

- Trinity College Dublin
- **578** points
- **4 Years**
- **Overview:** The law degree will appeal to you if you are interested in society and how it works, and with the broader question of the regulation of inter-personal relationships. A general interest in history and political developments, will be an advantage, as the law is deeply linked to its historical and political context.

- **16. Chemistry**

- University College Dublin
- **544** points
- **4 Years**
- **Overview:** The UCD Science (DN200) course offers 27 degree subjects categorised into streams. Students can study subjects from more than one stream in first year. It is also possible for students to change their stream in first year. At the end of first year, students choose a minimum of two subjects to study in second year (for example Statistics and Mathematics or Genetics and Microbiology). Students will major in one of these subjects in third and fourth year.

- **17. Human Health and Disease**

- Trinity College Dublin
- **567** points
- **4 Years**

- **Overview:** The Human Health and Disease degree trains students for work in the field of biomedical research. It brings to life the fascinating connections between structure and function in the human body and explores the health and disease continuum in detail, including teaching on how medical therapies act to treat or even prevent disease. As an example, understanding brain structure and biochemistry allows us to appreciate how neurons communicate and this in turn is helping biomedical researchers and clinicians to identify new and effective ways to treat and prevent diseases such as dementia.
- **18. Engineering (Process and Chemical Engineering)**
 - University College Cork
 - **543** points
 - **4 Years**
 - **Overview:** The first year of the BE is a broad education in engineering fundamentals. Process and Chemical Engineers are involved in the design, modification and operation of processes to produce products across a broad range of process industries, including bio/pharmaceuticals, food and drinks production, bulk chemicals and fuels/energy. Process and Chemical engineering helps provide a pathway towards meeting societal requirements around health and well being, energy provision, food production, water supply, waste management and consumer goods.
- **19. Biological and Chemical Sciences**
 - University College Cork
 - **532** points
 - **4 Years**
 - **Overview:** Our programme is carefully constructed to foster an interdisciplinary approach across a wide range of biological, biotechnology, medical, chemical and pharmaceutical research areas.

RECOMMENDATION SET 2

- **0. Pharmacy**
 - Trinity College Dublin
 - **601** points
 - **4-5 Years**
 - **Overview:** Pharmacy is the study of all aspects of drugs, both natural and synthetic in origin, including their chemistry, their uses in medicines, and how they work within the body. Pharmacists work in a variety of settings – community pharmacies, hospitals, long-term care facilities, and within the pharmaceutical industry, to name just a few. In many respects,

their role as a key healthcare professional is to help people achieve the best results from their medications. Optional Fifth Year: M.Sc. (Pharm) Master's Degree (NFQ Level 9) Optional.

- **1. Actuarial Mathematics**

- Dublin City University
- **589** points
- **4 Years**
- **Overview:** Actuarial Mathematics could be the perfect course for you. It's accredited by the Institute and Faculty of Actuaries, UK, meaning you may be exempt from some of the exams needed to qualify as an actuary in Ireland and the UK. Before you embark on learning essential actuarial knowledge and theories, you'll be given solid mathematical training. In your first two years, you'll study the fundamental mathematical principles that underpin the actuarial and financial models covered in later years. You'll also study computer programming, economics and accounting.

- **2. Biomedical, Health and Life Sciences**

- University College Dublin
- **589** points
- **4 Years**
- **Overview:** This course will appeal to those with a keen interest in science and in how research and technology can impact on human health. It is training scientists at the interface of science and medicine. You will learn how scientifically driven investigations can advance our knowledge of disease prevention, detection and treatment and translating these into clinical utility. The course will immerse you in modern medical and biological sciences and focus on the application of scientific developments. BHLS offers students a unique opportunity to complete a research project with a Principal Investigator in a biomedical research area that interests them and an opportunity to be involved in peer-reviewed publications.

- **3. Law and French**

- Trinity College Dublin
- **589** points
- **4 Years**
- **Overview:** The Law and French degree programme offers a unique opportunity to study core and specialised legal modules but also the language, culture and political systems of France. Students must undertake an Erasmus year in France, exposing them to the law of that legal system.

- **4. Philosophy, Political Science, Economics and Sociology**

- Trinity College Dublin

- **581** points
- **4 Years**
- **Overview:** Philosophy, Political Science, Economics and Sociology (PPES), offers a coherent and integrated introduction to the study of social sciences and philosophy. It brings together some of the most important approaches to understanding society and, in doing so, develops skills for a range of future careers and activities.

• 5. Economics/Geography

- Trinity College Dublin
- **578** points
- **4 Years**
- **Overview:** EconomicsAny society has to address the problem of how and what to produce for its material survival, and how the goods and services that are produced should be distributed among its population. Economists explore how people and institutions behave and function when producing, exchanging and using goods and services.
GeographyGeography is the study of Earth's landscapes, peoples, places and environments. Fundamentally it is about the world in which we live. Geography offers a 21st century education by uniquely bridging the social sciences (human geography) with the natural sciences (physical geography). Geography also covers increasingly important environmental issues where humans affect physical environments and vice versa.

• 6. Economics/History

- Trinity College Dublin
- **578** points
- **4 Years**
- **Overview:** EconomicsAny society has to address the problem of how and what to produce for its material survival, and how the goods and services that are produced should be distributed among its population. Economists explore how people and institutions behave and function when producing, exchanging and using goods and services. HistoryThe four-year programme allows students to lay firm foundations in the first two years, with wide-ranging modules on medieval and modern history, Irish, European, American, environmental and global history, as well as on historical methods and approaches. The final two years of the programme allow students the chance to study several specialist modules in-depth and to undertake independent research on a subject of their own choice.

• 7. Economics/Mathematics

- Trinity College Dublin
- **578** points
- **4 Years**
- **Overview:** Economics Economists explore how people and institutions behave and function when producing, exchanging and using goods and services. Economists' main motivation is

to find mechanisms that encourage efficiency in the production and use of material goods and resources, while at the same time producing a pattern of income distribution that society finds acceptable. MathematicsMathematics is a broad and diverse subject which is used to model, analyse and understand several applications in the physical and biological sciences, engineering, management science, economics and finance. Its numerous applications are naturally interwoven with the underlying theory which is essential in developing one's logical reasoning, quantitative skills and problem-solving techniques.

- **8. Economics/Modern Language**

- Trinity College Dublin
- **578** points
- **4 Years**
- **Overview:** Economists explore how people and institutions behave and function when producing, exchanging and using goods and services. Economists' main motivation is to find mechanisms that encourage efficiency in the production and use of material goods and resources, while at the same time producing a pattern of income distribution that society finds acceptable. Students combine this subject with their choice of German or Spanish.

- **9. Economics/Philosophy**

- Trinity College Dublin
- **578** points
- **4 Years**
- **Overview:** Economists explore how people and institutions behave and function when producing, exchanging and using goods and services. Economists' main motivation is to find mechanisms that encourage efficiency in the production and use of material goods and resources, while at the same time producing a pattern of income distribution that society finds acceptable. PhilosophyThis course offers the opportunity to engage in depth with questions of metaphysics (about the fundamental nature of reality), epistemology (the theory of knowledge), ethics (theories of right and wrong), political philosophy (the nature of the just state), philosophy of religion (reasoning about God), philosophy of mind (questions about thought, language and reason) and various other areas. We teach courses which have both systematic and historical emphases and in the higher years students can choose options and get to write a thesis on a topic of their own choice.

- **10. Economics/Sociology**

- Trinity College Dublin
- **578** points
- **4 Years**
- **Overview:** EconomicsAny society has to address the problem of how and what to produce for its material survival, and how the goods and services that are produced should be distributed among its population. Economists explore how people and institutions behave

and function when producing, exchanging and using goods and services. Economists' main motivation is to find mechanisms that encourage efficiency in the production and use of material goods and resources, while at the same time producing a pattern of income distribution that society finds acceptable. Sociology If you want to understand the social changes taking place in the world today, and you are curious about people and society, then Sociology is for you. You will also gain the ability to understand topical issues and to present and communicate information and thoughts coherently. In addition, you will learn invaluable analytical, communication, research and presentation skills – transferable skills which can be applied to a wide range of careers and postgraduate programmes.

- **11. Law**

- Trinity College Dublin
- **578** points
- **4 Years**
- **Overview:** The law degree will appeal to you if you are interested in society and how it works, and with the broader question of the regulation of inter-personal relationships. A general interest in history and political developments, will be an advantage, as the law is deeply linked to its historical and political context.

- **12. Mathematics**

- Trinity College Dublin
- **578** points
- **4 Years**
- **Overview:** Mathematics is a broad and diverse subject which is used to model, analyse and understand several applications in the physical and biological sciences, engineering, management science, economics and finance. Its numerous applications are naturally interwoven with the underlying theory which is essential in developing one's logical reasoning, quantitative skills and problem-solving techniques.

- **13. Physiotherapy**

- University College Dublin
- **578** points
- **4 Years**
- **Overview:** Physiotherapists are healthcare professionals responsible for developing, maintaining and restoring movement and functional ability in adults and children using evidence-based practice. Studying Physiotherapy in UCD will provide you with the skills and qualifications required to practice as a physiotherapist upon graduation. With state-of-the-art facilities and globally recognised researchers as lecturers, you will learn in a culture of established academic excellence.

- **14. Engineering**

- Trinity College Dublin
- **577** points
- **4 Years**
- **Overview:** Engineering is about being creative in technical problem solving. Engineers make things possible by using mathematical and scientific principles together with analytical and design skills. They tackle existing problems by developing new solutions through innovative technologies. They also expand the frontiers of society by developing advanced materials, sustainable energy systems, construction technologies, transport systems, biomedical devices, and telecommunications infrastructure.

- **15. Finance**

- University College Cork
- **577** points
- **3 Years**
- **Overview:** Finance is concerned with the operation of financial markets and the valuation of financial assets, in particular in stock, bond, foreign exchange and interest rate markets. The BSc Finance is based equally on the subject areas of corporate finance and financial economics. This combined approach provides graduates with a thorough grounding in each area.

- **16. Psychology**

- Trinity College Dublin
- **577** points
- **4 Years**
- **Overview:** The School of Psychology aims to offer a knowledge base and a set of skills that not only equip students for the many careers that exist in psychology, but also prepare students intellectually for other careers. Psychology is a branch of science that demands clear, rigorous thinking, numeracy and the ability to define, study and solve problems in complex, changing settings.

- **17. Biomedical Engineering**

- University of Galway
- **568** points
- **4 Years**
- **Overview:** Biomedical Engineering is a relatively new branch of engineering that involves the use of cutting-edge technologies to help improve human healthcare. Biomedical engineers are involved in the design and creation of medical devices, implants such as stents, instruments and materials for clinical use.

- **18. Human Health and Disease**

- Trinity College Dublin
- **567** points
- **4 Years**
- **Overview:** The Human Health and Disease degree trains students for work in the field of biomedical research. It brings to life the fascinating connections between structure and function in the human body and explores the health and disease continuum in detail, including teaching on how medical therapies act to treat or even prevent disease. As an example, understanding brain structure and biochemistry allows us to appreciate how neurons communicate and this in turn is helping biomedical researchers and clinicians to identify new and effective ways to treat and prevent diseases such as dementia.

- **19. Biomedical Science**

- University of Galway
- **566** points
- **4 Years**
- **Overview:** Biomedical Science is the study of Life Science subjects related to human health and disease. Students will learn about the structure and function of the human body from the level of organs and tissues to the molecular level, as well as how drugs are used to treat disease. You will major in one of the following biomedical science subjects: Anatomy, Biochemistry, Pharmacology or Physiology.
