

RECOMMENDATION SET 1

- **0. Computer Science**

- Trinity College Dublin
- **535** points
- **4 Years**
- **Overview:** Computer Science is concerned with the study of everything to do with computers and our relationship with them. Computer scientists are critical to the efficient running of modern societies, dealing with health, security, banking and finance, transportation, and now increasingly our interaction through social networks. Computing professionals deal with theoretical issues, solve complex problems, deal with matters of ethics and with society at large. Theoretical issues in computer science relate to the abstract notions of computation and information.
- **Why we recommended this:** Computer Science matches your exceptional analytical skills and interest in technology, providing a challenging environment to solve complex logic-based problems and develop sophisticated software systems.

- **1. Computer Science, Linguistics and a Language**

- Trinity College Dublin
- **512** points
- **4 Years**
- **Overview:** B.A. (Mod) in Computer Science, Linguistics and a Language. CSLL combines the study of Computer Science; a natural language, either Spanish, French or Irish; and Linguistics. The computer science component of CSLL seeks to impart a mastery of the techniques and technologies that lie behind what you see on the screen of one of today's computers, giving you a full understanding the computer applications of today, and enabling you to participate in the development of the applications of the future.
- **Why we recommended this:** Computer Science, Linguistics and a Language integrates your strong technical aptitude with analytical problem-solving, applying logical structures to human speech and computational technologies through a precise, scientific lens.

- **2. Linguistics/Computer Science**

- Trinity College Dublin
- **498** points
- **4 Years**
- **Overview:** The combined study of Computer Science and Linguistics yields opportunities for graduates to specialise in computational speech and language processing or text

analysis. Linguistics often appeals to students who are curious about language as one of the most fascinating aspects of human knowledge and behaviour. Linguistics is also appealing to those who enjoy detailed, problem-solving analysis and careful argumentation. Students of Linguistics engage in evidence-based analysis of language, acquiring skills and techniques that allow investigation of different aspects of language structure such as sound, words and grammar. This involves key transferable skills in problem solving and critical thinking.

- **Why we recommended this:** Linguistics/Computer Science leverages your peak interest in technology and logical analysis, allowing you to dissect the structure of language through rigorous, evidence-based computational methods and critical thinking.

- **3. Geography/Computer Science**

- Trinity College Dublin
- **371** points
- **4 Years**
- **Overview:** Geography Geography is the study of Earth's landscapes, peoples, places and environments. Fundamentally it is about the world in which we live. Geography offers a 21st century education by uniquely bridging the social sciences (human geography) with the natural sciences (physical geography). Computer Science Students studying Computer Science and Geography may have a particular interest in geographic information systems, spatial data or "smart cities". The combined study of Computer Science and Linguistics yields opportunities for graduates to specialise in computational speech and language processing or text analysis.
- **Why we recommended this:** Geography/Computer Science connects your technical expertise with a curiosity about the physical world, utilizing spatial data and digital systems to solve complex environmental and urban challenges.

- **4. Human Nutrition and Dietetics**

- Trinity College Dublin
- **522** points
- **4 Years**
- **Overview:** This four-year, full-time programme is run jointly with TU Dublin. Students are registered in both institutions and have access to all services across the two institutions. The course provides an integrated education on the science of nutrition and practice of dietetics and their application to human health and well-being. On successful completion, the degree in Human Nutrition and Dietetics is awarded jointly by Trinity and TU Dublin. This programme is approved by CORU, the regulator for the health and social care professions in Ireland. All graduates are eligible to proceed to register with the Dietitians Registration Board of CORU.
- **Why we recommended this:** Human Nutrition and Dietetics utilizes your deep scientific curiosity and healthcare interests, applying evidence-based biological research to improve

health outcomes through precise nutritional analysis and dietary planning.

- **5. Advanced Therapeutic Technologies**

- Royal College of Surgeons in Ireland
- **476** points
- **4 Years**
- **Overview:** The BSc in Advanced Therapeutic Technologies fuses digital technology with traditional science. This science degree is focused on the latest scientific discoveries and goes beyond learning about each step of the drug lifecycle process as it layers in cutting-edge advanced therapeutic technologies and precision medicine - state-of-the-art individual treatments based on individual's genes, environment and lifestyle.
- **Why we recommended this:** Advanced Therapeutic Technologies aligns with your preference for technical science and digital innovation, focusing on the precision medicine and cutting-edge drug development processes that match your analytical profile.

- **6. Medicine**

- Royal College of Surgeons in Ireland
- **732** points
- **5/6 Years**
- **Overview:** The intermediate years of the programme will focus on learning about abnormal bodily functions. You will attend a wide array of clinical skills workshops, small group tutorials and case-based teaching sessions. A lot of your time will be spent in a hospital setting attached to clinical teams. The final years of the programme are spent fully immersed in various clinical specialties on a rotational basis.
- **Why we recommended this:** Medicine demands the intensive scientific investigation and practical skill you excel at, focusing on clinical problem-solving and the biological understanding of human health in high-stakes environments.

- **7. Occupational Therapy**

- Trinity College Dublin
- **543** points
- **4 Years**
- **Overview:** The main goal of occupational therapy is to enable people to participate in meaningful activities of everyday living, such as, self-care, work and leisure activities. By enabling people to engage in activities that hold meaning for them, occupational therapists aim to enable people to improve their day-to-day quality of life. Occupational therapists work in a variety of settings, including communities, hospitals, rehabilitation units, schools, universities and reform centres.
- **Why we recommended this:** Occupational Therapy utilizes your interest in health sciences to solve functional challenges, using evidence-based practices to help individuals regain independence through structured, goal-oriented therapeutic interventions.

- **8. Chemical Sciences**

- Trinity College Dublin
- **543** points
- **4 Years**
- **Overview:** Chemistry is a creative and central science, dealing with challenges that span the physical and life sciences. It is found and used everywhere from the creation of new materials and processes through to advancements in medical health and diagnosis of disease. A chemistry-based qualification provides students with the relevant skills and knowledge to open doors in research, medicine, education, industry, finance, consultancy and more.
- **Why we recommended this:** Chemical Sciences caters to your top-tier analytical abilities and hands-on technical interests, focusing on experimental research and the fundamental scientific principles that drive innovation in modern medicine.

- **9. Clinical Speech and Language Studies**

- Trinity College Dublin
- **541** points
- **4 Years**
- **Overview:** The ability to speak and write, to listen and learn, to be understood – abilities that are fundamental to human communication and interaction – can be impaired by a wide range of conditions, from stroke to cerebral palsy, hearing impairment, learning disabilities, developmental delays, and autism. Speech and Language Therapists work with people of all ages and assess, diagnose and treat individuals with a variety of communication and swallowing disorders.
- **Why we recommended this:** Clinical Speech and Language Studies applies your strong scientific interest to the diagnosis and treatment of communication disorders, requiring the precise analytical skills you possess for effective clinical practice.

- **10. Radiation Therapy**

- Trinity College Dublin
- **534** points
- **4 Years**
- **Overview:** Radiation therapy uses targeted high energy X-rays to treat patients with cancer and is one of the main treatments for cancer. This course qualifies you to work as a radiation therapist – the healthcare professional who, together with the other multidisciplinary team members, is responsible for the preparation and delivery of a course of radiation therapy. This degree provides you with the required scientific understanding and the critical clinical and research skills to adapt to the ever-changing medical environment.
- **Why we recommended this:** Radiation Therapy combines your interest in healthcare with your technical aptitude, using sophisticated medical technology and scientific accuracy to

deliver life-saving cancer treatments within a multidisciplinary team.

- **11. Children's and General Nursing (Integrated)**

- Trinity College Dublin
- **520** points
- **4 Years**
- **Overview:** Students of nursing learn about caring and the complexities of health and illness through interactive teaching and learning strategies in the classroom and the healthcare environment. Practice (clinical and community) experience provides the student with opportunities to integrate the art and science of nursing and promotes the development of caring relationships with patients and their families/significant others.
- **Why we recommended this:** Children's and General Nursing (Integrated) allows you to apply your scientific knowledge to clinical practice, integrating professional care with a rigorous biological understanding of health and illness.

- **12. Midwifery**

- Trinity College Dublin
- **507** points
- **4 Years**
- **Overview:** The first three years combine learning in university and clinical midwifery practice in the maternity hospitals. The final year will include a 36-week period of internship in midwifery practice. This course will provide you with the knowledge and skills to meet the needs of women and their families in an individualised, culturally sensitive manner.
- **Why we recommended this:** Midwifery focuses on the scientific and clinical aspects of maternal health, utilizing your strong interest in life sciences to provide expert, evidence-based care throughout the birthing process.

- **13. Physical Sciences**

- Trinity College Dublin
- **522** points
- **4 Years**
- **Overview:** Physical Sciences (TR063) at Trinity is a four year degree programme for students who like to solve problems. Whether it is studying galaxies, examining the potential of new lasers or investigating next generation nanomaterials, this degree pathway will prepare you for a lifelong career of solving problems in research, industry or business.
- **Why we recommended this:** Physical Sciences offers an ideal path for your exceptional problem-solving skills, focusing on the experimental and theoretical investigation of everything from nanomaterials to the vast reaches of space.

- **14. Geography and Geoscience**

- Trinity College Dublin
- **472** points
- **4 Years**
- **Overview:** Geography and Geoscience is the study of our planet and the people that live on it. This multi-disciplinary programme is designed by leading research scientists in response to critical challenges facing the Earth system and humanity in the 21st century. It integrates knowledge from the physical, chemical, biological and social sciences to develop novel insights into Earth system function and human-environment interactions.
- **Why we recommended this:** Geography and Geoscience utilizes your analytical strengths to study the Earth's systems, combining physical, chemical, and biological sciences to solve critical environmental and global challenges.

• 15. Geography/Sociology

- Trinity College Dublin
- **371** points
- **4 Years**
- **Overview:** GeographyGeography is the study of Earth's landscapes, peoples, places and environments. Fundamentally it is about the world in which we live. Geography offers a 21st century education by uniquely bridging the social sciences (human geography) with the natural sciences (physical geography). Human geography focuses on understanding the dynamics of cultures, societies and economies, while physical geography focuses on understanding the dynamics of physical landscapes. SociologyIf you want to understand the social changes taking place in the world today, and you are curious about people and society, then Sociology is for you. You will also gain the ability to understand topical issues and to present and communicate information and thoughts coherently.
- **Why we recommended this:** Geography/Sociology bridges natural and social sciences, allowing you to use your analytical mindset to investigate the relationship between physical environments and the complex dynamics of modern societies.

• 16. Environmental Science and Engineering

- Trinity College Dublin
- **525** points
- **4 Years**
- **Overview:** Environmental Science and Engineering is a new integrated undergraduate with postgraduate degree course that aims to train the next generation of graduates who have the competencies, knowledge and experience necessary to design and deploy solutions that protect and improve our environment and human wellbeing, and that work with rather than against the natural world to foster biodiversity, climate action and sustainable use of Earth's finite resources.
- **Why we recommended this:** Environmental Science and Engineering matches your interest in natural sciences and technical design, tasking you with developing innovative, sustainable

solutions to protect the environment and human wellbeing.

- **17. Business Studies and German**

- Trinity College Dublin
- **521** points
- **4 Years**
- **Overview:** This programme aims to provide you with the knowledge and skills necessary to communicate internationally and to understand the social, political and cultural contexts of markets, organisations and management across countries. In addition to studying modules in business, economic and social studies, you will study the society, institutions, culture and civilisation associated with your chosen language. Much of the teaching is provided through the target language. The third year is spent at a university or business school in Germany.
- **Why we recommended this:** Business Studies and German suits your organized and analytical approach, providing a structured framework to understand international markets while mastering a second language through disciplined, systematic study.

- **18. Music Education**

- Trinity College Dublin
- **656** points
- **4 Years**
- **Overview:** If you love sharing music, already have a competent standard of music performance, and wish to combine these qualities with a teaching career, then this course is ideally suited to you. Whether your interests are primarily academic or practical, your experience of this vast and rich discipline will be greatly advanced. As an academic study, music fosters independence of thought, creativity and critical and analytical skills. This course offers opportunities to perform music, to share music with others via teaching and performing, and to conduct a number of different ensembles.
- **Why we recommended this:** Music Education utilizes your structured, disciplined approach to learning, focusing on the analytical and pedagogical aspects of music to prepare you for a professional career in teaching.

- **19. Film Studies/Music**

- Trinity College Dublin
- **541** points
- **4 Years**
- **Overview:** Film StudiesIf you enjoy watching a wide range of films from around the world and if you are interested in acquiring the critical and creative tools to analyse them in relation to questions of style, technology, society, and industry, then this may be the course for you. While you will learn about practical issues involved in film production, including how to write a script and how to produce short videos, the course is geared toward critical engagement with film and digital media. Music Studying music will allow you to engage with

a range of traditions to acquire a profound understanding of how music works in theory and in creative practice. If you are interested in understanding music's place in society, developing music technology skills, writing music, or improving your skills as an informed performer, this course could be for you.

- **Why we recommended this:** Film Studies/Music allows you to apply your strong analytical skills to the study of media and sound technology, focusing on the technical and theoretical foundations of these industries.

RECOMMENDATION SET 2

- **0. History/History of Art and Architecture**

- Trinity College Dublin
- **544** points
- **4 Years**
- **Overview:** History The History modules at Trinity allow you to study a remarkable range of types of history - whether cultural or political history, military or social history, environmental history or the history of ideas - from the early Middle Ages to the very recent past. We offer survey modules allowing you to grasp the broad patterns in history, specialist modules where you can study topics of particular interest to you in small classes, and opportunities for you to pursue your own independent research. History of Art and Architecture History of Art and Architecture is about the study of images, objects and buildings. It is unique in developing high levels of visual literacy applicable to a range of career pathways. It explores why works of art look the way they do and seeks to discover what they say about the societies that created them. It develops skills in visual analysis, critical assessment, and communication.
- **Why we recommended this:** History/History of Art and Architecture appeals to your love for research and analytical inquiry, while Architecture provides a structured, technical framework for studying historical and physical developments.

- **1. History/Modern Language**

- Trinity College Dublin
- **544** points
- **4 Years**
- **Overview:** History The History programme combines the strength of a broad-based programme in the first two years, introducing all students to the sheer diversity of historical studies, with the freedom to explore areas of particular interest to individual students in the final two years. A range of modules covering medieval and modern periods, including Irish, European, and American history, as well as some modules exploring the skills and methods which historians use, and the kinds of debates in which historians engage. There is the

opportunity to concentrate on those parts of history which interest you most, and above all in the final year dissertation, an independent research project which very many students find the most rewarding part of their whole degree programme. Students combine this subject with their choice of German, Irish, Russian or Spanish.

- **Why we recommended this:** Your preference for structured investigation makes History/Modern Language a suitable choice for analyzing complex historical data and the systematic, rule-based structures inherent in language study.

- **2. History/Philosophy**

- Trinity College Dublin
- **544** points
- **4 Years**
- **Overview:** HistoryThe History programme combines the strength of a broad-based programme in the first two years, introducing all students to the sheer diversity of historical studies, with the freedom to explore areas of particular interest to individual students in the final two years. PhilosophyThis course offers the opportunity to engage in depth with questions of metaphysics (about the fundamental nature of reality), epistemology (the theory of knowledge), ethics (theories of right and wrong), political philosophy (the nature of the just state), philosophy of religion (reasoning about God), philosophy of mind (questions about thought, language and reason) and various other areas.
- **Why we recommended this:** History/Philosophy leverages your exceptional analytical thinking, allowing you to rigorously examine the fundamental nature of reality alongside the logical progression of historical events and ideas.

- **3. History/Political Science**

- Trinity College Dublin
- **544** points
- **4 Years**
- **Overview:** History The History programme introduces all students to the diversity of historical studies, with the freedom to explore areas of particular interest to individual students in the final two years. Political Science Political Science will appeal to students who are excited about exploring the background to current events, the nature and use of power and how decisions are made that impact on wider society. If you are interested in having an in-depth knowledge of public affairs, developing critical and much sought after research skills and if your career interests lie in journalism, public service, teaching, public policy, international organisation and/or business then Political Science may be for you
- **Why we recommended this:** History/Political Science rewards your high capacity for critical research and systemic analysis, providing a data-driven approach to understanding how societies, power, and governments function.

- **4. History/Religion**

- Trinity College Dublin
- **544** points
- **4 Years**
- **Overview:** Religion This course offers you a choice of three possible directions of study after your first year. The first is a broad-based study of Religion and Theology, the second a specialisation in the Cultural Study of Religion, and the third in Christian Theology. Within the Cultural Study of Religion, you have the opportunity to explore the monotheistic religions of Judaism, Christianity and Islam, the religions of Asia and Africa, as well new atheistic and religious movements. If you choose to specialise in Theology, you can investigate the development of Christian self-understanding in a number of different modes, including denominational, multidenominational and ecumenical aspects. History The History programme introduces students to the diversity of historical studies, such as medieval and modern periods, including Irish, European, and American history, as well as some modules exploring the skills and methods which historians use, and the kinds of debates in which historians engage.
- **Why we recommended this:** Your aptitude for deep research and intellectual discovery is well-served by History/Religion, which offers a structured, investigative look into the evolution of global belief systems and historical records.

• 5. Chemical Sciences

- Trinity College Dublin
- **543** points
- **4 Years**
- **Overview:** Chemistry is a creative and central science, dealing with challenges that span the physical and life sciences. It is found and used everywhere from the creation of new materials and processes through to advancements in medical health and diagnosis of disease. A chemistry-based qualification provides students with the relevant skills and knowledge to open doors in research, medicine, education, industry, finance, consultancy and more.
- **Why we recommended this:** Chemical Sciences perfectly matches your high interest in science, offering a rigorous environment for laboratory experimentation, technical discovery, and solving complex problems in medical health.

• 6. Occupational Therapy

- Trinity College Dublin
- **543** points
- **4 Years**
- **Overview:** The main goal of occupational therapy is to enable people to participate in meaningful activities of everyday living, such as, self-care, work and leisure activities. By enabling people to engage in activities that hold meaning for them, occupational therapists aim to enable people to improve their day-to-day quality of life. Occupational therapists

work in a variety of settings, including communities, hospitals, rehabilitation units, schools, universities and reform centres.

- **Why we recommended this:** Occupational Therapy utilizes your practical problem-solving skills and interest in healthcare to help individuals improve their daily quality of life through clinical, hands-on interventions.

- **7. Clinical Speech and Language Studies**

- Trinity College Dublin
- **541** points
- **4 Years**
- **Overview:** The ability to speak and write, to listen and learn, to be understood – abilities that are fundamental to human communication and interaction – can be impaired by a wide range of conditions, from stroke to cerebral palsy, hearing impairment, learning disabilities, developmental delays, and autism. Speech and Language Therapists work with people of all ages and assess, diagnose and treat individuals with a variety of communication and swallowing disorders.
- **Why we recommended this:** Clinical Speech and Language Studies aligns with your healthcare interests, utilizing scientific diagnosis and systematic treatment plans to solve complex communication and swallowing disorders.

- **8. Film Studies/Drama Studies**

- Trinity College Dublin
- **541** points
- **4 Years**
- **Overview:** Film StudiesIf you enjoy watching a wide range of films from around the world and if you are interested in acquiring the critical and creative tools to analyse them in relation to questions of style, technology, society, and industry, then this may be the course for you. While you will learn about practical issues involved in film production, including how to write a script and how to produce short videos, the course is geared toward critical engagement with film and digital media. Drama StudiesThe degree explores the relationship between the theory and practice of Drama and Theatre to discover how and why they work. The strong developmental emphasis of the courses requires a particular blend of practical and academic skills. In addition to a high level of analytical ability and creativity you will need to possess resourcefulness and self-motivation.
- **Why we recommended this:** Film Studies/Drama Studies offers a technical and analytical perspective on media production and theory, catering to your strengths in critical engagement and resourceful, structured problem-solving.

- **9. Film Studies/English Literature**

- Trinity College Dublin
- **541** points

- **4 Years**
- **Overview:** Film Studies If you enjoy watching a wide range of films from around the world and if you are interested in acquiring the critical and creative tools to analyse them in relation to questions of style, technology, society, and industry, then this may be the course for you. While you will learn about practical issues involved in film production, including how to write a script and how to produce short videos, the course is geared toward critical engagement with film and digital media. English Literature English Literature covers a broad range of literatures written in the English language, from Chaucer to the present day. The aim of the course is to help students acquire a thorough knowledge of the history of differing literatures while also enabling them to develop a sophisticated critical consciousness and an awareness of critical and cultural theory.
- **Why we recommended this:** Your talent for detailed analysis makes Film Studies/English Literature a strong fit, allowing you to use your research skills to decode cultural history and complex narratives.

- **10. Film Studies/History**

- Trinity College Dublin
- **541** points
- **4 Years**
- **Overview:** Film Studies While you will learn about practical issues involved in film production, including how to write a script and how to produce short videos, the course is geared toward critical engagement with film and digital media. History The History programme combines the strength of a broad-based programme in the first two years, introducing all students to the sheer diversity of historical studies, with the freedom to explore areas of particular interest to individual students in the final two years. The first and second years provide a range of modules covering medieval and modern periods, including Irish, European, and American history, as well as some modules exploring the skills and methods which historians use, and the kinds of debates in which historians engage.
- **Why we recommended this:** Combining Film Studies/History allows you to apply your investigative mindset to both visual media and historical records, evaluating the evolution of society through a critical, evidence-based lens.

- **11. Film Studies/Modern Language**

- Trinity College Dublin
- **541** points
- **4 Years**
- **Overview:** Film Studies If you enjoy watching a wide range of films from around the world and if you are interested in acquiring the critical and creative tools to analyse them in relation to questions of style, technology, society, and industry, then this may be the course for you. While you will learn about practical issues involved in film production, including how to write a script and how to produce short videos, the course is geared toward critical

engagement with film and digital media. You will work in small groups to debate the topics that arise in lectures and to create short films and documentaries. Our students are active in many different societies, including DU Film Society and the student-run film magazine, Trinity Film Review. Students combine this subject with their choice of French or Spanish.

- **Why we recommended this:** Film Studies/Modern Language provides a structured way to analyze international media, utilizing your capacity for detailed, technical study to understand different cultural and linguistic frameworks.

- **12. Film Studies/Music**

- Trinity College Dublin
- **541** points
- **4 Years**
- **Overview:** Film StudiesIf you enjoy watching a wide range of films from around the world and if you are interested in acquiring the critical and creative tools to analyse them in relation to questions of style, technology, society, and industry, then this may be the course for you. While you will learn about practical issues involved in film production, including how to write a script and how to produce short videos, the course is geared toward critical engagement with film and digital media. Music Studying music will allow you to engage with a range of traditions to acquire a profound understanding of how music works in theory and in creative practice. If you are interested in understanding music's place in society, developing music technology skills, writing music, or improving your skills as an informed performer, this course could be for you.
- **Why we recommended this:** Film Studies/Music appeals to your interest in technology and theory, focusing on the technical aspects of production and the structured understanding of how music works.

- **13. Law and German**

- Trinity College Dublin
- **540** points
- **4 Years**
- **Overview:** The Law and German degree programme offer a unique opportunity to study core and specialised legal modules but also the language, culture and political systems of Germany. Students must undertake an Erasmus year in Germany, exposing them to the law of that legal system.
- **Why we recommended this:** Law and German utilizes your strong sense of logic and structure, demanding the precision required to master legal systems alongside the systematic study of another language.

- **14. Computer Science**

- Trinity College Dublin
- **535** points

- **4 Years**
- **Overview:** Computer Science is concerned with the study of everything to do with computers and our relationship with them. Computer scientists are critical to the efficient running of modern societies, dealing with health, security, banking and finance, transportation, and now increasingly our interaction through social networks. Computing professionals deal with theoretical issues, solve complex problems, deal with matters of ethics and with society at large. Theoretical issues in computer science relate to the abstract notions of computation and information.
- **Why we recommended this:** Computer Science is an ideal match for your elite analytical skills, offering a challenging environment to solve complex technical problems through programming and theoretical computation.

- **15. Radiation Therapy**

- Trinity College Dublin
- **534** points
- **4 Years**
- **Overview:** Radiation therapy uses targeted high energy X-rays to treat patients with cancer and is one of the main treatments for cancer. This course qualifies you to work as a radiation therapist – the healthcare professional who, together with the other multidisciplinary team members, is responsible for the preparation and delivery of a course of radiation therapy. This degree provides you with the required scientific understanding and the critical clinical and research skills to adapt to the ever-changing medical environment.
- **Why we recommended this:** Radiation Therapy leverages your interest in healthcare and physical sciences, requiring the high-level technical precision and scientific understanding necessary to deliver complex cancer treatments.

- **16. English Studies**

- Trinity College Dublin
- **530** points
- **4 Years**
- **Overview:** The study of English is concerned with the history and practices of writing in English and encompasses literary works spanning English, Anglo-Irish, American and post-colonial cultures. It aims to develop a thorough knowledge of the history of these literatures while also enabling students to develop a sophisticated critical consciousness and an awareness of critical and cultural theory.
- **Why we recommended this:** English Studies allows you to apply your deep capacity for research and critical theory to the structured history of literature, appealing to your desire for intellectual inquiry.

- **17. Music / Drama Studies**

- Trinity College Dublin

- **527** points
- **4 Years**
- **Overview:** MusicStudying music will allow you to engage with a range of traditions to acquire a profound understanding of how music works in theory and in creative practice. If you are interested in understanding music's place in society, developing music technology skills, writing music, or improving your skills as an informed performer, this course could be for you. Drama Studies (Restricted)The degree explores the relationship between the theory and practice of Drama and Theatre to discover how and why they work. The strong developmental emphasis of the courses requires a particular blend of practical and academic skills.
- **Why we recommended this:** Music / Drama Studies focuses on the theoretical and technical side of performance, allowing you to explore the practical skills and analytical theory behind creative arts.

- **18. Music/Modern Language**

- Trinity College Dublin
- **527** points
- **4 Years**
- **Overview:** MusicStudying music will allow you to engage with a range of traditions to acquire a profound understanding of how music works in theory and in creative practice. If you are interested in understanding music's place in society, developing music technology skills, writing music, or improving your skills as an informed performer, this course could be for you. A music degree will prepare you for a wide range of careers, in the creative arts, journalism, music production, arts management, research, and teaching. Students combine this subject with their choice of French, German, Irish or Spanish.
- **Why we recommended this:** Music/Modern Language combines the technical study of music theory with the systematic learning of languages, suiting your ability to handle complex, structured information.

- **19. Music/Philosophy**

- Trinity College Dublin
- **527** points
- **4 Years**
- **Overview:** MusicStudying music will allow you to engage with a range of traditions to acquire a profound understanding of how music works in theory and in creative practice. If you are interested in understanding music's place in society, developing music technology skills, writing music, or improving your skills as an informed performer, this course could be for you. Philosophy (Restricted)This course offers the opportunity to engage in depth with questions of metaphysics (about the fundamental nature of reality), epistemology (the theory of knowledge), ethics (theories of right and wrong), political philosophy (the nature of the just state), philosophy of religion (reasoning about God), philosophy of mind (questions

about thought, language and reason) and various other areas. We teach courses which have both systematic and historical emphases and in the higher years students can choose options and get to write a thesis on a topic of their own choice.

- **Why we recommended this:** Music/Philosophy offers a highly intellectual path, connecting your aptitude for logical reasoning with the theoretical study of music's place in society and fundamental reality.
