

RECOMMENDATION SET 1

- **0. Accounting and Finance**

- Maynooth University
- **412 points**
- **3 Years**
- **Overview:** You will learn how to compile, analyse, interpret and communicate essential information about the operations of a business - whether that business be a small firm, a publicly traded corporation or an NGO (non-governmental organisation). Study technical accounting skills, financial analysis and the measurement of performance in business.

- **1. Business and Accounting**

- Maynooth University
- **401 points**
- **3 - 4 Years**
- **Overview:** Studying Business and Accounting together helps you develop an excellent set of technical accounting skills, coupled with a thorough appreciation of the world of business and management. Accounting and finance need to support the implementation of a business strategy to create and capture value for and from customers. The Business element of this degree gives students an appreciation of the core functions of a business and how they interact to create and capture value.

- **2. Business and Management**

- Maynooth University
- **400 points**
- **3 - 4 Years**
- **Overview:** Business and Management students will learn how, through business and management practices, they can make a positive difference in the lives of customers, employees, colleagues, organisations and the broader society. They are about coordinating the functions of a business to deliver value to the client and capture sufficient returns for staff and owners. We will teach you how to make a difference to the lives of customers, providing goods and services they need across a wide range of industries and countries..

- **3. Business Management and Global Cultures**

- Maynooth University
- **400 points**
- **3 or 4 Years**
- **Overview:** An essential challenge for businesses in Ireland is how they can connect the capabilities of our workforce to contribute to solutions for people who are largely in markets outside Ireland, across the EU and the wider global community. Business needs graduates who can both understand the fundamentals of how to create value for customers and how to translate them into solutions and services that fit the needs of diverse cultures.

- **4. Athletic and Rehabilitation Therapy**

- TUS Midlands
- **488 points**
- **4 Years**
- **Overview:** The term sports injury refers to the kinds of injuries that most commonly occur during sports or exercise. In this honours degree, students will become skilled in the prevention, assessment, diagnosis, treatment, and rehabilitation of musculoskeletal injuries related to physical activity.

- **5. Sport Science and Health**

- Maynooth University
- **473 points**
- **4 Years**
- **Overview:** This programme is based on the core scientific disciplines of sport and exercise science - physiology and biomechanics. Students will learn to understand how to achieve maximum performance for the high performing athlete, and those who are looking to support exercise and physical activity for the health of the wider population, of all ages and capabilities.

- **6. Physical Activity and Health Science**

- TUS Midlands
- **273 points**
- **4 Years**
- **Overview:** This course draws upon expertise from psychologists, nutritionists, exercise and sport scientists, and public health professionals to provide you with the knowledge and skills to improve the general health of various sectors of society using exercise courses, physical activity and nutrition. While bringing together the social, behavioural, biological and biomedical sciences to facilitate the development and improvement of existing interventional techniques. Being physically active and having a healthy diet are important for people of all ages to maintain their health and well being.

- **7. Exercise and Health Science**

- TUS Midlands
- **208 points**
- **3 Years**
- **Overview:** This course will include contributions from physical activity, nutrition, sports science and behaviour change specialists. Students will learn in small class groups, ensuring greater access to equipment and training and applied experience of knowledge generated. Students will also be transitioned into the requirements of education at third level, and their generic skills will be developed throughout the course to support greater employability. This course is designed to produce specialists in behaviour change across all aspects of health but most specifically in exercise/physical activity and nutrition.

- **8. Classical Civilisation/Modern Language**

- Trinity College Dublin
- **358 points**
- **4 Years**
- **Overview:** The study of Classical Civilisation is concerned with the literature, thought and culture of Ancient Greece and Rome. Through the examination and contextualisation of literary works and the analysis of the main aspects of ancient history and art, you will develop a thorough knowledge of the classical world and a critical approach to Greek and Roman literature. All texts are studied in translation and no knowledge of Greek or Latin is required, but there are opportunities to study the languages at an introductory level.

- **9. Classical Languages/Modern Language**

- Trinity College Dublin
 - **331** points
 - **4 Years**
 - **Overview:** The study of Classical Languages is concerned with the language, literature and thought of either Ancient Greece or Ancient Rome. You will choose to study either Greek or Latin. Through the reading of literature in the original language and the examination of key aspects of ancient history, you will develop a thorough knowledge of the classical world and a critical approach to textual and material culture. Students combine this subject with their choice of French or German.
- **10. International Business and Global Cultures**
 - Maynooth University
 - **400** points
 - **3 or 4 Years**
 - **Overview:** An essential challenge for businesses in Ireland is how they can connect the capabilities of our workforce to contribute to solutions for people who are largely in markets outside Ireland, across the EU and the wider global community. Business needs graduates who can both understand the fundamentals of how to create value for customers and how to translate them into solutions and services that fit the needs of diverse cultures.
- **11. Business and Languages**
 - Maynooth University
 - **397** points
 - **4 Years**
 - **Overview:** You choose one business subject (Accounting*, Business Management, International Business or Marketing) and one language (Chinese, French, German or Spanish). You do not need to have studied either business or your chosen language for the Leaving Certificate to take this degree.
- **12. Psychology**
 - Maynooth University
 - **509** points
 - **3 Years**
 - **Overview:** Psychology is the scientific study of mental life and behaviour. It involves areas such as Brain and Behaviour, Social Psychology, Cognitive Psychology, Developmental Psychology and Psychological Research Methods.
- **13. Social Sciences (Two Subject Combination)**
 - University College Dublin
 - **490** points
 - **3 Years**
 - **Overview:** Social Sciences students explore society and how people behave as individuals and in groups. With the four-year Social Sciences degree, you choose DN700 at CAO and then select your preferred option below. Your subject choices are guaranteed. The Two Subjects Choice (TSC) options are: Archaeology; Economics; Geography; Information & Communication Studies, Philosophy; Politics and Sociology. There are options to change subject choices at the end of first year if you wish. You will gain a deep understanding of each subject you choose to study and develop real-world skills in research, communication and leadership. You may additionally apply for an internship, or study abroad for a year or a semester. You will learn to analyse, criticise and challenge beliefs and assumptions - including your own.
- **14. Sociology (Social Sciences Two Subject Combination)**
 - University College Dublin
 - **490** points
 - **4 Years**
 - **Overview:** If you are interested in people, you will be interested in sociology. It is relevant for understanding almost every aspect of our lives. We are all part of society, we are connected with each other and we are affected by the people around us. In the same way, we shape the social context for others as well. Sociology provides you with the mindset and the research tools to observe the social world, make connections, understand differences, norms, cultures or inequalities.
- **15. Applied Psychology**
 - TUS Midlands
 - **420** points
 - **4 Years**
 - **Overview:** Our BSc in Applied Psychology is accredited by the Psychological Society of Ireland (PSI). Psychology is the scientific study of the human mind and behaviour. It examines how we think, feel, act and interact with other people. You will develop skills in research, problem-solving, critical thinking and analysis, communication and professional development. The course will be relevant to anyone wishing to pursue a longer-term career in psychology. It is also an ideal stepping stone to post-graduate study either within psychology or in other areas of social science.
- **16. Economics, Mathematics & Statistics**
 - University College Dublin
 - **490** points
 - **4 Years**
 - **Overview:** If you are interested in Mathematics, Statistics and Economics, then this course enables you to explore these areas in depth, while also emphasising how they complement each other. Economists employ mathematics to design theoretical models and use statistics to test these models and to explore the tremendous amount of data that is generated by the economy. In turn, the models and data that are part of the study of Economics provide an interesting source of applications for students that have learned mathematical and statistical skills.
- **17. Mathematics (Social Sciences Two Subject Combination)**
 - University College Dublin
 - **490** points
 - **4 Years**
 - **Overview:** Mathematics has long played a central role in our quest to fully describe and understand the natural world. Nowadays, it is also a vital tool in many of the social sciences. Those who concentrate on this subject will gain an understanding of mathematical concepts and learn how to prove key facts and solve problems using deductive reasoning.
- **18. Mathematics**
 - University College Dublin
 - **420** points
 - **3 Years**

- **Overview:** Mathematics has long played a central role in our quest to fully describe and understand the natural world. Nowadays, it is also a vital tool in many of the social sciences. Those who concentrate on this subject will gain an understanding of mathematical concepts and learn how to prove key facts and solve problems using deductive reasoning. Some first year modules build on the foundations laid at Leaving Certificate or equivalent, while others will introduce exciting new aspects of the subject. It is not assumed that you will have met everything before and each topic is carefully introduced and built upon

- **19. Statistics**

- University College Dublin
- **420** points
- **3 Years**
- **Overview:** If you are interested in studying Statistics with an Arts and Humanities or Social Science subject, then this degree could be for you. Statistics is the science of transforming data into knowledge and understanding, providing a principled approach to making data-informed decisions. Statistical methods enable us to gain insights from data, and with the advent of powerful computing technology, these methods have become widely used in many sectors.

RECOMMENDATION SET 2

- **0. Children's and General Nursing (Integrated)**

- Trinity College Dublin
- **520** points
- **4 Years**
- **Overview:** Students of nursing learn about caring and the complexities of health and illness through interactive teaching and learning strategies in the classroom and the healthcare environment. Practice (clinical and community) experience provides the student with opportunities to integrate the art and science of nursing and promotes the development of caring relationships with patients and their families/significant others.

- **1. Commerce (International) With Spanish**

- University of Galway
- **520** points
- **4 Years**
- **Overview:** Commerce with Spanish allows students to further their language skills and live abroad while gaining valuable experience of international business. It is the ideal qualification for students who want to build a career in another European Union country or in an international firm.

- **2. Energy Systems Engineering**

- University of Galway
- **520** points
- **4 Years**
- **Overview:** This course prepares you with the fundamentals of mathematics, physics, chemistry, and engineering, hands-on labs in our state-of-the-art facilities, energy-focused classes on topics like zero carbon energy systems, fuels and hydrogen, zero energy buildings, smart grids, and more.

- **3. Law**

- University of Galway
- **520** points
- **4 Years**
- **Overview:** Law regulates all aspects of society: from marriage and parenting to corporate governance or international relations between countries. To study law is to become aware of one's legal rights and responsibilities in a variety of contexts, as well as to acquire knowledge and the research, writing and advocacy skills that enable one to argue both sides of a complex situation and devise a pragmatic, client-focused solution.

- **4. Law and Human Rights**

- University of Galway
- **520** points
- **4 Years**
- **Overview:** The four-year Bachelor of Civil Law (Human Rights) is an innovative and unique programme - the first of its kind in Ireland. It offers students the opportunity to combine a full undergraduate law programme with the study of human rights.

- **5. Law, Criminology and Criminal Justice**

- University of Galway
- **520** points
- **4 Years**
- **Overview:** The four-year Bachelor of Civil Law (Criminology and Criminal Justice) is a unique degree offering in Ireland for students with an interest in both law and the fields of criminology and criminal justice. Students have the opportunity to combine the study of a full undergraduate law degree with an additional specialisation that focuses on the causes of crime and the operation of the criminal justice system. Students will have access to world-class academics that specialise in the fields of criminal law, criminal justice, criminology, psychology and human rights.

- **6. Theoretical Physics and Mathematics**

- Maynooth University
- **520** points
- **3 Years**
- **Overview:** Study the entire physical world from the microscopic to the cosmic - topics such as black holes, the Big Bang, quantum computing, elementary particles and the fundamental forces of nature, superconductivity, neural networks, matter in extreme conditions, and simulation of physical and biological systems. In this degree you will develop a deeper understanding of the various areas of modern mathematics, including analysis, algebra, geometry, and topology.

- **7. Film**

- Trinity College Dublin
- **518** points
- **4 Years**
- **Overview:** Why do films affect us the way they do? Why did the introduction of sound change film forever? What do we mean by 'independent cinema'? What is a digital story world? These and many more are the questions that Film Studies asks students to consider in small-group lectures and seminars. In addition, over the course of your degree you'll be encouraged to respond creatively to critical issues via projects, presentations, short

films and video essays, as well as to develop your screenwriting skills to see if you have a fresh vision to share with the world around you.

- **8. Commerce (International) With French**

- University of Galway
- **517** points
- **4 Years**
- **Overview:** This exciting four-year course in Commerce with a modern French will allow you to develop your language skills and live abroad while gaining valuable insights into international business and culture. It is the ideal international qualification for students who want to build an exciting career in another country or in an international firm, or who wish to significantly expand their career choices.

- **9. Commerce (International) With German**

- University of Galway
- **517** points
- **4 Years**
- **Overview:** The Bachelor of Commerce (International with German) degree is a four year internationally recognised undergraduate programme which develops students' Business and German Language skills. Graduates of this programme not only have a great business qualification but also an international language.

- **10. Law & Business**

- University of Galway
- **517** points
- **4 Years**
- **Overview:** The four-year Bachelor of Civil Law and Business allows students to combine the study of a full law degree with principal commercial disciplines such as Business & Commercial Law, Accountancy, Economics, Management and Digital Business & Analytics. Graduates will understand not only the legal process but also the fundamentals of business. This will prepare graduates to work as lawyers in a corporate environment.

- **11. Computer Science, Linguistics and a Language**

- Trinity College Dublin
- **512** points
- **4 Years**
- **Overview:** B.A. (Mod) in Computer Science, Linguistics and a Language. CSLL combines the study of Computer Science; a natural language, either Spanish, French or Irish; and Linguistics. The computer science component of CSLL seeks to impart a mastery of the techniques and technologies that lie behind what you see on the screen of one of today's computers, giving you a full understanding the computer applications of today, and enabling you to participate in the development of the applications of the future.

- **12. History of Art and Architecture**

- Trinity College Dublin
- **511** points
- **4 Years**
- **Overview:** History of Art and Architecture is about the study of images, objects and buildings. It is unique in developing high levels of visual literacy applicable to a range of career pathways. It explores why works of art look the way they do and seeks to discover what they say about the societies that created them. It develops skills in visual analysis, critical assessment, and communication.

- **13. Computational Thinking (Computer Science, Maths & Philosophy)**

- Maynooth University
- **510** points
- **3 years**
- **Overview:** Acquire hands-on programming skills, advanced problem-solving techniques, and learning to think logically and analytically when approaching complex problems developing your creativity and communication skills. Study Philosophy (seeking to understand and analyse human knowledge and thinking) and advanced mathematics.

- **14. Electrical and Electronic Engineering**

- University of Galway
- **510** points
- **4 Years**
- **Overview:** Electrical and Electronic Engineering involves developing technologies required for our future needs in such areas as communication, electrical energy, transport, healthcare and entertainment. Electrical and Electronic Engineers are involved in advances in medical technology, mobile phones, wireless communications, electrical power systems, renewable energy, electric vehicles, e-commerce and the internet-of-things.

- **15. Electronic and Computing Engineering**

- University of Galway
- **510** points
- **4 Years**
- **Overview:** Electronic and Computer Engineering is a course that aims to integrate two separate engineering fields to meet the joint demands made by the electronics and computer industries in today's world. This programme combines coursework in different aspects of both fields over four years, with an emphasis on the design of computing systems.

- **16. Criminology with Psychology**

- University College Dublin
- **509** points
- **4 Years**
- **Overview:** Criminology is the study of crime, the causes of crime and its impact on individuals and society. This unique new degree is designed to provide students with an advanced conceptual knowledge of Criminology and Psychology, an insight into the contribution of both disciplines to understanding key aspects of human behaviour and an ability to appraise the methodologies used in both areas

- **17. Financial Mathematics and Economics**

- University of Galway
- **509** points
- **4 Years**
- **Overview:** The BSc in Financial Mathematics and Economics (BSc in FME) programme is a four-year degree programme consisting of courses in mathematics, economics, statistics/probability, applied mathematics, accounting and business finance, and computer science. The programme's aim

is to equip students with expertise in quantitative subjects, with a particular focus on financial economics, actuarial mathematics and statistics. The degree should appeal to people who enjoy mathematics and are interested in studying economics and other subjects in the financial area. (Please note that you do not have to study economics for the Leaving Certificate to be admitted to this course.)

- **18. Midwifery**

- University College Dublin
- **509** points
- **4 Years**
- **Overview:** The focus and philosophy of midwifery in UCD is the promotion of women-centred care. The initial focus of this course is on the foundational knowledge and skills required for midwifery practice. Each year, these will be developed and strengthened through theory and practice. In your final year, you'll also focus on professional issues.

- **19. Philosophy**

- Trinity College Dublin
- **509** points
- **4 Years**
- **Overview:** This course offers the opportunity to engage in depth with questions of metaphysics (about the fundamental nature of reality), epistemology (the theory of knowledge), ethics (theories of right and wrong), political philosophy (the nature of the just state), philosophy of mind (questions about thought, language and reason) and various other areas.
