

RECOMMENDATION SET 1

- **0. Sport, Health and Exercise Science**

- University College Dublin
- **532 points**
- **3 Years**
- **Overview:** This course is suitable for you if you have a strong interest in sport and exercise science and wish to pursue a career in high performance sport, a clinical profession (e.g. physiotherapy, dietetics, medicine) and/or scientific research in sport and health sciences. You will study the scientific principles underlying the promotion and enhancement of sport, physical health and exercise across the lifespan.

- **1. Sport Science and Health**

- Dublin City University
- **518 points**
- **4 Years**
- **Overview:** Are you passionate about sport? Can you imagine supporting an elite athlete to the heights of their career or helping to coach a team to be among the best in the world? That's exactly what many of our Sports Science and Health graduates do, while many others make a massive impact in the community, helping people of all ages to enjoy and benefit from sport and exercise. During this course, you'll learn how to enhance health and human performance, and how to advocate for and champion a healthy, educated and active society. You'll encounter a range of teaching methods, including practical sessions, and develop key skills you can use in any career, including creative and critical thinking.

- **2. Physical Education with Biology**

- Dublin City University
- **521 points**
- **4 Years**
- **Overview:** Do you really enjoy getting active while also having a passion for subjects such as biology and science? This course is a brilliant opportunity to blend your interests in a substantive way and go on to make a positive impact on society through education. Once you graduate, you can teach PE and Biology up to Leaving Cert level, and Science for Junior Cert level, or choose from a wide range of other exciting career paths. This course offers a unique blend of academic subjects, taught in a way that emphasises learning through practical experiences. During the course, you'll gain a comprehensive understanding of the content, theory, and skills of different physical activities (such as athletics, games, aquatics, dance, and outdoor activities), biology, science and education. You'll also improve your communication, leadership, and critical thinking skills. Future-proof your life In both third and fourth year, you'll do a comprehensive professional school placement and you can also choose to study overseas through the Erasmus programme.

- **3. Physical Education with Mathematics**

- Dublin City University
- **499 points**
- **4 Years**
- **Overview:** Do you really enjoy both physical activity and mathematics? This course is a brilliant opportunity to combine your passions and go on to make a positive impact on society through education. Once you graduate from this course, you can teach these subjects up to Leaving Cert level or choose from a wide range of other exciting career paths. This course offers a unique blend of academic subjects, taught in a way that emphasises learning through practical experiences. During the course, you'll gain a comprehensive understanding of the content, theory, and skills of different physical activities (such as athletics, games, aquatics, dance, and outdoor activities), maths and education. You'll also improve your communication, leadership, and critical thinking skills.

- **4. Sport and Exercise Management**

- University College Dublin
- **478 points**
- **3 Years**
- **Overview:** The multidisciplinary nature of the BSc in Sport & Exercise Management equips students with skills in areas such as management, marketing, event planning, human resources, economics and finance, sports development and coaching. These underpin the structure and governance of sport, health and exercise programmes today. You will study several management subjects and techniques over the course of three years, designed to provide you with the skills to work within a wide range of sports management areas. You will learn basic principles in first year which will be refined and developed in second and third year.

- **5. Accounting and Finance**

- Dublin City University
- **532 points**
- **3 Years**
- **Overview:** A BA in Accounting and Finance gives you a world of opportunities. It is considered Ireland's premier degree for those wishing to pursue careers as accountants and financial services professionals. The course offers great prospects for career progression, and the chance to work in a wide range of different industries. Your Career Starts Here This degree was first of its kind in Ireland, and this continues to be an extremely popular course. Graduates are highly regarded by the accounting and financial services professions, as can be seen in the consistently employment rates for those who take the BA in Accounting and Finance.

- **6. Business Studies**

- Dublin City University
- **510 points**
- **3 - 4 Years**
- **Overview:** The Business Studies degree course is designed to give you an introduction to the foundations of business and guide you to a specialisation in economics, management, finance, marketing, HR or business analytics. The four-year course includes an optional 11-month paid work placement that gives you the opportunity to experience working in a real business environment. Alternatively, you can opt to spend a year at one of our partner universities in Europe.

- **7. Global Business (Canada)**

- Dublin City University
- **545 points**
- **4 years**
- **Overview:** Immersing you into Canadian work-life and culture while you study - gain two business degrees, experience two countries and complete two work placements. This is a unique course for students who are looking for a truly global learning experience. The skills and knowledge that you'll develop on the BA in Global Business (Canada) are a passport to an international career in business. Not only that, but the course also gives you the

opportunity to qualify with two degrees by the end of this four-year programme.

- **8. Business Studies International**

- Dublin City University
- **498** points
- **4 Years**
- **Overview:** If your ambition is to have a career in business that gives you international opportunities, then this course could be for you. The Business Studies degree course gives you an introduction to the foundations of business and allows you to specialise in areas such as economics, management, finance, marketing, HR or business analytics. International OpportunitiesThe course not only allows you to develop the skills and knowledge needed for a career in business, it also offers you an exciting intercultural experience and the chance to master another language. The four-year course gives you the chance to spend a year at one of DCU's partner universities in Austria, Belgium, China, France, Germany, Japan, Mexico or Spain.

- **9. BCL (Law and Society)**

- Dublin City University
- **496** points
- **3 Years**
- **Overview:** The BCL degree focuses on experiential learning and developing practical legal skills while also providing you with opportunities to engage with industry and the wider legal profession. In particular, the Moot Court module gives you the chance to practise your court-room skills and gain a real insight into law in action. DCU has its own Moot Court room which is where you will participate in mock trials and practise skills such as advocacy, presenting evidence or cross examination.

- **10. Law**

- Dublin City University
- **398** points
- **3 Years**
- **Overview:** The course will allow you to study all 8 of the core modules examined in the entrance exams to the Law Society as a trainee solicitor. These are constitutional law, contract law, criminal law, property law, equity and trusts, European Union law, tort law, and company law. Choosing the law stream on the Bachelor of Arts at DCU will allow you to explore the key foundations of law while also studying another discipline. This will provide you with an interdisciplinary education, covering many important areas of law while also choosing from History, International Languages or Media Studies. You'll have the option to take a year abroad, extending your degree to four years and graduating with a Bachelor of Arts (Joint Honours) International.

- **11. Social Policy/Political Science**

- Trinity College Dublin
- **509** points
- **4 Years**
- **Overview:** Social Policy Curious about social and economic policy issues around the world? Searching for a course that demands both academic and vocational qualities? Interested in understanding society, its social problems and have a desire to make a difference? Then Social Policy may be the subject choice for you. It is particularly relevant to students intending to pursue a career in research, social policy analysis and evaluation, management and planning within the social services, both voluntary and statutory, as well as to those with a general interest in society and social policy. Political Science Political Science will appeal to students who are excited about exploring the background to current events, the nature and use of power and how decisions are made that impact on wider society. If you are interested in having an in-depth knowledge of public affairs, developing critical and much sought after research skills and if your career interests lie in journalism, public service, teaching, public policy, international organisation and/or business then Political Science may be for you.

- **12. Social Justice (Social Sciences Two Subject Combination)**

- University College Dublin
- **490** points
- **4 Years**
- **Overview:** The subject of Social Justice draws on a range of academic disciplines in order to advance understanding of issues such as inequality, discrimination and human rights abuses. It will appeal to those who would like to acquire the knowledge and skills to understand and challenge injustice and help bring about social change.

- **13. Computer Science**

- University College Dublin
- **540** points
- **4 Years**
- **Overview:** The UCD Computer Science degree covers the fundamentals of Computer Science while also exposing students to the contemporary languages and technologies used in the industry. Key topics include programming, foundational mathematics, advanced software engineering, cloud development, theory of computer science, networks and security. The principal programming languages used are C, Java and Python. Specialised topics include computer graphics, game development, robotics, mobile development and others.

- **14. Mechatronic Engineering**

- Dublin City University
- **533** points
- **4 Years**
- **Overview:** This course all about how we build intelligent machines through the meeting of mechanical systems such as engines and machines with the electronics needed to control them.This course perfectly blends mechanical engineering and electronic engineering. It offers classes in 3D modelling and design, for example, as well as circuit design and programming. Our students and staff are intrigued and inspired by the interplay between electronics and moving parts in connected devices and state-of-the-art machinery.Gain knowledge for the real world In third year, you'll get to do a six-month INTRA work placement and throughout the course, you'll do lots of project-based learning where you use the latest real-world tools and technologies to solve problems and, of course, build robots. That's not all. You'll also take some business-based modules, so you can learn how to develop a business plan and work with other parts of an enterprise. While you can go on from this course to work in either mechanical or electronic engineering, our graduates typically end up in roles where they incorporate one into the other. For example, they might put sensors into a machine to measure aspects of how it's working or develop control systems for a lift or a car. Either way, mechatronics graduates are in huge demand.

- **15. Electronic and Computer Engineering**

- Dublin City University
- **531** points
- **4 Years**
- **Overview:** Calling maths lovers! If you'd like to be able to fix a gaming remote or build a smart doorbell from scratch, you need to study Electronic and Computer Engineering. Across the first three years, you'll study the fundamentals of electronic engineering and programming. As this course covers a

broad field, you'll choose one of four specialisms in fourth year: Systems and Devices (covering sensors, diagnostics and more), High-Speed Networks (such as fibre optics and 5G), Digital Interaction (including 3D interfaces and game design), and the Internet of Things.

- **16. Mathematics (Social Sciences Two Subject Combination)**

- University College Dublin
- **490** points
- **4 Years**
- **Overview:** Mathematics has long played a central role in our quest to fully describe and understand the natural world. Nowadays, it is also a vital tool in many of the social sciences. Those who concentrate on this subject will gain an understanding of mathematical concepts and learn how to prove key facts and solve problems using deductive reasoning.

- **17. Mathematics**

- University College Dublin
- **420** points
- **3 Years**
- **Overview:** Mathematics has long played a central role in our quest to fully describe and understand the natural world. Nowadays, it is also a vital tool in many of the social sciences. Those who concentrate on this subject will gain an understanding of mathematical concepts and learn how to prove key facts and solve problems using deductive reasoning. Some first year modules build on the foundations laid at Leaving Certificate or equivalent, while others will introduce exciting new aspects of the subject. It is not assumed that you will have met everything before and each topic is carefully introduced and built upon

- **18. Common Entry into Engineering (Undenominated Entry)**

- Dublin City University
- **543** points
- **4 Years**
- **Overview:** Engineers can be found in many fields from high-tech industry and medicine to financial services, energy aware technologies and biotechnology. If unsure of which strand of engineering is for you this course helps you to choose while studying the fundamentals of engineering. You'll spend first year building a strong engineering foundation across maths, materials engineering and basic sciences, while also building skills like logical and critical thinking. Then you'll specialise in second year, going on to a challenging, cutting-edge course where you'll build real expertise, whether that's in mechatronics or sustainability engineering. Through lectures, labs, individual and group work, you'll get hands-on experience with modern manufacturing processes, design, simulation and analysis procedures, and get skilled in programming and electronics.

- **19. Landscape Architecture**

- University College Dublin
- **485** points
- **4 Years**
- **Overview:** The design studio is central to Landscape Architecture. You'll spend most of your time in the studio, pursuing individual and small group project work. You'll learn by doing design projects that allow you to develop creative skills and apply knowledge taught through lectures, seminars, drawing classes, field trips, reviews, readings, individual and group tutorials. In your third year you will also gain professional experience interning in a landscape related company / institution.

RECOMMENDATION SET 2

- **0. Global Business (Canada)**

- Dublin City University
- **545** points
- **4 years**
- **Overview:** Immersing you into Canadian work-life and culture while you study - gain two business degrees, experience two countries and complete two work placements. This is a unique course for students who are looking for a truly global learning experience. The skills and knowledge that you'll develop on the BA in Global Business (Canada) are a passport to an international career in business. Not only that, but the course also gives you the opportunity to qualify with two degrees by the end of this four-year programme.

- **1. Radiography**

- University College Dublin
- **545** points
- **4 Years**
- **Overview:** Radiographers are responsible for producing high-quality images to assist in the diagnosis and treatment of disease. While radiography is a caring profession, it's also one that requires considerable technological and scientific expertise in both the production of images and the responsible delivery of ionising radiation. If you're interested in science and you want to use your knowledge to care for people, Radiography at UCD may be a perfect fit for you. Our aim is to prepare graduate radiographers to meet the everyday challenges arising from ongoing advances in diagnostic imaging and healthcare.

- **2. Biological, Biomedical & Biomolecular Sciences**

- University College Dublin
- **544** points
- **4 Years**
- **Overview:** The UCD Science (DN200) course offers 27 degree subjects categorised into streams. Students can study subjects from more than one stream in first year. It is also possible for students to change their stream in first year. At the end of first year, students choose a minimum of two subjects to study in second year (for example Statistics and Mathematics or Genetics and Microbiology). Students will major in one of these subjects in third and fourth year.

- **3. Biomedical Engineering**

- Dublin City University
- **544** points
- **4 Years**
- **Overview:** When you study Biomedical Engineering, you not only learn how the body works and becomes injured, but you come to understand how medical devices are developed to treat injuries and disease, and how we can help the body heal itself. You'll use state-of-the-art labs and tools such as 3D simulations and machine learning as you study. You'll get biological and medical knowledge, and technical engineering expertise, so you can solve problems in biomedicine. You'll study advanced biology, biomaterials, biomechanics, tissue engineering, medical device design, surgical technology, rehabilitation engineering and much more besides.

- **4. Chemistry**

- University College Dublin
- **544** points
- **4 Years**
- **Overview:** The UCD Science (DN200) course offers 27 degree subjects categorised into streams. Students can study subjects from more than one stream in first year. It is also possible for students to change their stream in first year. At the end of first year, students choose a minimum of two subjects to study in second year (for example Statistics and Mathematics or Genetics and Microbiology). Students will major in one of these subjects in third and fourth year.

- **5. Commerce International**

- University College Dublin
- **544** points
- **4 Years**
- **Overview:** Commerce International (BCIT) combines a flexible business education from Ireland's leading business school with the linguistic skills and cultural understanding to succeed in the exciting world of international business. Students of the BCIT course are well-grounded in the theory and practice of business management and equipped to understand and comment critically on business issues. To achieve a truly global perspective on business, it is necessary to immerse yourself in the culture and not just learn the vocabulary. As part of the course, BCIT students will also take a range of literature and culture modules from the UCD School of Languages, Cultures and Linguistics. Some examples of modules currently on offer include French New Wave Cinema, Surrealism in Spain and Mexico, Grimm's Tales, Italian Cinema and Society.

- **6. Earth and Environmental Sciences**

- University College Dublin
- **544** points
- **4 Years**
- **Overview:** The UCD Science (DN200) course offers 27 degree subjects categorised into streams. Students can study subjects from more than one stream in first year. It is also possible for students to change their stream in first year. At the end of first year, students choose a minimum of two subjects to study in second year (for example Statistics and Mathematics or Genetics and Microbiology). Students will major in one of these subjects in third and fourth year.

- **7. History/History of Art and Architecture**

- Trinity College Dublin
- **544** points
- **4 Years**
- **Overview:** History The History modules at Trinity allow you to study a remarkable range of types of history - whether cultural or political history, military or social history, environmental history or the history of ideas - from the early Middle Ages to the very recent past. We offer survey modules allowing you to grasp the broad patterns in history, specialist modules where you can study topics of particular interest to you in small classes, and opportunities for you to pursue your own independent research. History of Art and Architecture History of Art and Architecture is about the study of images, objects and buildings. It is unique in developing high levels of visual literacy applicable to a range of career pathways. It explores why works of art look the way they do and seeks to discover what they say about the societies that created them. It develops skills in visual analysis, critical assessment, and communication.

- **8. History/Modern Language**

- Trinity College Dublin
- **544** points
- **4 Years**
- **Overview:** History The History programme combines the strength of a broad-based programme in the first two years, introducing all students to the sheer diversity of historical studies, with the freedom to explore areas of particular interest to individual students in the final two years. A range of modules covering medieval and modern periods, including Irish, European, and American history, as well as some modules exploring the skills and methods which historians use, and the kinds of debates in which historians engage. There is the opportunity to concentrate on those parts of history which interest you most, and above all in the final year dissertation, an independent research project which very many students find the most rewarding part of their whole degree programme. Students combine this subject with their choice of German, Irish, Russian or Spanish.

- **9. History/Philosophy**

- Trinity College Dublin
- **544** points
- **4 Years**
- **Overview:** History The History programme combines the strength of a broad-based programme in the first two years, introducing all students to the sheer diversity of historical studies, with the freedom to explore areas of particular interest to individual students in the final two years. Philosophy This course offers the opportunity to engage in depth with questions of metaphysics (about the fundamental nature of reality), epistemology (the theory of knowledge), ethics (theories of right and wrong), political philosophy (the nature of the just state), philosophy of religion (reasoning about God), philosophy of mind (questions about thought, language and reason) and various other areas.

- **10. History/Political Science**

- Trinity College Dublin
- **544** points
- **4 Years**
- **Overview:** History The History programme introduces all students to the diversity of historical studies, with the freedom to explore areas of particular interest to individual students in the final two years. Political Science Political Science will appeal to students who are excited about exploring the background to current events, the nature and use of power and how decisions are made that impact on wider society. If you are interested in having an in-depth knowledge of public affairs, developing critical and much sought after research skills and if your career interests lie in journalism, public service, teaching, public policy, international organisation and/or business then Political Science may be for you

- **11. History/Religion**

- Trinity College Dublin
- **544** points
- **4 Years**
- **Overview:** Religion This course offers you a choice of three possible directions of study after your first year. The first is a broad-based study of Religion and Theology, the second a specialisation in the Cultural Study of Religion, and the third in Christian Theology. Within the Cultural Study of Religion, you have the opportunity to explore the monotheistic religions of Judaism, Christianity and Islam, the religions of Asia and Africa, as well as new atheistic and religious movements. If you choose to specialise in Theology, you can investigate the development of Christian self-understanding in a number of different modes, including denominational, multidenominational and ecumenical aspects. History The History programme introduces students to the diversity of historical studies, such as medieval and modern periods, including Irish, European, and American history, as well as some modules

exploring the skills and methods which historians use, and the kinds of debates in which historians engage.

- **12. Mathematics**

- University College Dublin
- **544** points
- **4 Years**
- **Overview:** The UCD Science (DN200) course offers 27 degree subjects categorised into streams. Students can study subjects from more than one stream in first year. It is also possible for students to change their stream in first year. At the end of first year, students choose a minimum of two subjects to study in second year (for example Statistics and Mathematics or Genetics and Microbiology). Students will major in one of these subjects in third and fourth year.

- **13. Physics**

- University College Dublin
- **544** points
- **4 Years**
- **Overview:** The UCD Science (DN200) course offers 27 degree subjects categorised into streams. Students can study subjects from more than one stream in first year. It is also possible for students to change their stream in first year. At the end of first year, students choose a minimum of two subjects to study in second year (for example Statistics and Mathematics or Genetics and Microbiology). Students will major in one of these subjects in third and fourth year.

- **14. Psychology**

- University College Dublin
- **544** points
- **3 Years**
- **Overview:** If you have a questioning attitude and good reasoning skills, you will really enjoy the world opened up by Psychology. Psychology has links to the natural sciences, the social sciences and the arts, so it is likely to appeal to a wide variety of people. The course has core modules that will introduce you to major theories and research methods, and you will also have a chance to choose option modules in specialist areas of psychology (e.g. counselling, clinical psychology and forensic psychology).

- **15. Science - Explore Multiple Streams**

- University College Dublin
- **544** points
- **4 Years**
- **Overview:** The UCD Science course offers 27 degrees categorised into the following streams: Explore Multiple Streams Biological, Biomedical & Biomolecular Sciences Earth & Environmental Sciences Chemistry (includes Medicinal/Sustainable/Biophysical) Mathematics (includes Applied/Financial/Statistics) Physics (includes Theoretical/Astronomy & Space Science) Science, Mathematica & Education Explore Multiple Streams The Explore Multiple Streams option is for students who are interested in degrees in different streams. For example a student may be interested in Genetics and Chemistry. As Genetics is in the Biological, Biomedical & Biomolecular Sciences stream and Chemistry is in the Chemistry stream, students interested in these subjects can choose explore Multiple Streams. Students who choose Explore Multiple Streams, are offered the same first year module guarantees as students who choose the other streams.

- **16. Science, Mathematics & Education**

- University College Dublin
- **544** points
- **4 Years**
- **Overview:** The UCD Science (DN200) course offers 27 degree subjects categorised into streams. Students can study subjects from more than one stream in first year. It is also possible for students to change their stream in first year. At the end of first year, students choose a minimum of two subjects to study in second year (for example Statistics and Mathematics or Genetics and Microbiology). Students will major in one of these subjects in third and fourth year.

- **17. Common Entry into Engineering (Udenominated Entry)**

- Dublin City University
- **543** points
- **4 Years**
- **Overview:** Engineers can be found in many fields from high-tech industry and medicine to financial services, energy aware technologies and biotechnology. If unsure of which strand of engineering is for you this course helps you to choose while studying the fundamentals of engineering. You'll spend first year building a strong engineering foundation across maths, materials engineering and basic sciences, while also building skills like logical and critical thinking. Then you'll specialise in second year, going on to a challenging, cutting-edge course where you'll build real expertise, whether that's in mechatronics or sustainability engineering. Through lectures, labs, individual and group work, you'll get hands-on experience with modern manufacturing processes, design, simulation and analysis procedures, and get skilled in programming and electronics.

- **18. Global Business (France)**

- Dublin City University
- **543** points
- **4 Years**
- **Overview:** Are you looking for a course that gives you a headstart in international business, as well as a rich cultural experience in another country? Then the BA in Global Business (France) could be for you. This degree gives you the skills and knowledge you need to thrive in the fast-moving world of business. Not only that, but the course also gives you the opportunity to qualify with two degrees by the end of this four-year programme, and you'll have the chance to gain fluency in French.

- **19. Occupational Therapy**

- Trinity College Dublin
- **543** points
- **4 Years**
- **Overview:** The main goal of occupational therapy is to enable people to participate in meaningful activities of everyday living, such as, self-care, work and leisure activities. By enabling people to engage in activities that hold meaning for them, occupational therapists aim to enable people to improve their day-to-day quality of life. Occupational therapists work in a variety of settings, including communities, hospitals, rehabilitation units, schools, universities and reform centres.
