

RECOMMENDATION SET 1

- **0. Journalism and Digital Communication**

- University of Limerick
- **381** points
- **4 Years**
- **Overview:** Journalism is an important, exciting and dynamic field. It tells us about ourselves. The platforms through which we tell our stories are evolving, and in UL we offer students a chance to engage with and deliver stories across all digital and social media platforms. We help develop real-world practical and critical thinking skills in students so that their journalism is informed by a balanced sense of justice, accuracy and life-experience. Students of the BA in Journalism and New Media learn core practical journalism skills and, through the study of two specialised subjects, develop their capacities to engage critically with society and the structures of power that operate within it.

- **1. Journalism**

- Dublin City University
- **409** points
- **3 Years**
- **Overview:** DCU's BA in Journalism is a top degree in Ireland designed to equip you with practical skills in reporting and writing for different media as well as providing you with essential knowledge in politics, law, ethics, society and culture. This degree will really appeal to you if you have an enquiring mind because the world needs journalists to analyse, examine and reveal how things work and what the future holds for people.

- **2. Arts (Journalism)**

- University of Galway
- **381** points
- **4 Years**
- **Overview:** If you are a budding reporter or are curious about the world around you and like to write, or have a passion for radio, television or social media, then this is an ideal programme for you. The BA Journalism is an exciting programme for University of Galway (reformed for 2019) which offers you an opportunity to gain highly coveted communication and media production skills while undertaking an Arts degree.

- **3. Media Studies**

- Dublin City University
- **358** points
- **3 - 4 Years**
- **Overview:** Media Studies graduates generally have excellent communication, analytical and team-working skills - skills that are in high demand in the knowledge economy. These graduates are likely to find employment in a range of commercial, state, and non-governmental organisations, and they will have a competitive advantage in careers like advertising, marketing, public relations, advocacy and international development. Students choose one other subject from: English, International Languages or Politics. You'll have the option to take a year abroad, extending your degree to four years and graduating with a Bachelor of Arts (Joint Honours) International. Internship Year You can opt to apply for a year-long INTRA work placement in Year Three. This programme will prepare you for a variety of careers and also provides a foundation for postgraduate study.

- **4. Global Media**

- University of Galway
- **350** points
- **3-4 Years**
- **Overview:** The Global Media subject within BA Arts is an exciting new subject being launched by University of Galway in 2021. The subject aims to give you a robust and challenging university experience, introducing you to a range of areas such as interactive web media, data, media production, journalism and film studies. It will also give you a critical understanding of the changing global media environment and an insight into the role of the media in a globalised world. Various modules will also examine how society exchanges information through communication in democratic societies, as placed within historical and theoretically-grounded contexts.

- **5. Information and Communication Studies**

- University College Dublin
- **420** points
- **3 Years**
- **Overview:** Information & Communication Studies (ICS) equips you with the knowledge, skills, and tools to help you to make sense of a world where every aspect of human experience is affected by digital technology, media, data, and information in all formats. ICS explores digital information, social media, and communication and analyses their effects on societies, culture, politics, privacy, health, education and the many different spheres of public, private and personal life. Ultimately, ICS is about people, and understanding how people and technology interact and influence each other.

- **6. Immersive Software Engineering**

- University of Limerick
- **651** points
- **4 Years**
- **Overview:** Immersive Software Engineering is a new computer science degree where you learn by doing. You get an integrated Bachelors/Masters qualification (level 9) in four years. You spend half your time learning on campus in a research-driven paradigm, in studios, working on projects, in teams, undergoing continuous assessment instead of end of term exams. You spend the other half of your time in paid residencies, where you solve some of society's toughest problems in excellent companies. The goal of Immersive Software Engineering is to turn curious, creative people like you into top notch problem solvers and software engineers, familiar with concepts, methods and tools, and with about 2 years of experience gained in the field in up to 5 companies.

- **7. Computer Science**

- University College Dublin
- **540** points
- **4 Years**
- **Overview:** The UCD Computer Science degree covers the fundamentals of Computer Science while also exposing students to the contemporary languages and technologies used in the industry. Key topics include programming, foundational mathematics, advanced software engineering, cloud development, theory of computer science, networks and security. The principal programming languages used are C, Java and Python. Specialised topics include computer graphics, game development, robotics, mobile development and others.

- **8. Artificial Intelligence and Machine Learning**

- University of Limerick
 - **487** points
 - **4/5 Years**
 - **Overview:** The Bachelor of Science programme is of four years duration. In the first year the student will undertake an intensive learning programme of computer science fundamentals, programming including an immediate introduction to an AI-appropriate language, and mathematics. In subsequent years the focus on artificial intelligence will intensify while also including core computer science aspects such as operating systems, data structures and algorithms, database systems, computer graphics. Data analytics / mining and more specialist topics such as language engineering / translation and cultural aspects of AI are covered in later years. Students who opt to exit after four years with a bachelors degree will complete, in their final year, a year-long Final year Project that is the culmination of their studies drawing on their skills in research, algorithm or system design, and implementation.
- **9. Computer Science and Information Technology**
 - University of Galway
 - **440** points
 - **4 Years**
 - **Overview:** We depend on electronic devices, such such as computers and mobile phones, computer software and networks to store, process, transmit, retrieve and manipulate information. Students will cover the technology used in these devices and will focus on the development of the software applications that make these devices useful.
- **10. Computer Science, Linguistics and a Language**
 - Trinity College Dublin
 - **512** points
 - **4 Years**
 - **Overview:** B.A. (Mod) in Computer Science, Linguistics and a Language. CSLL combines the study of Computer Science; a natural language, either Spanish, French or Irish; and Linguistics. The computer science component of CSLL seeks to impart a mastery of the techniques and technologies that lie behind what you see on the screen of one of today's computers, giving you a full understanding the computer applications of today, and enabling you to participate in the development of the applications of the future.
- **11. Mathematics**
 - Trinity College Dublin
 - **578** points
 - **4 Years**
 - **Overview:** Mathematics is a broad and diverse subject which is used to model, analyse and understand several applications in the physical and biological sciences, engineering, management science, economics and finance. Its numerous applications are naturally interwoven with the underlying theory which is essential in developing one's logical reasoning, quantitative skills and problem-solving techniques.
- **12. Mathematics (Social Sciences Two Subject Combination)**
 - University College Dublin
 - **490** points
 - **4 Years**
 - **Overview:** Mathematics has long played a central role in our quest to fully describe and understand the natural world. Nowadays, it is also a vital tool in many of the social sciences. Those who concentrate on this subject will gain an understanding of mathematical concepts and learn how to prove key facts and solve problems using deductive reasoning.
- **13. Statistics**
 - University College Dublin
 - **420** points
 - **3 Years**
 - **Overview:** If you are interested in studying Statistics with an Arts and Humanities or Social Science subject, then this degree could be for you. Statistics is the science of transforming data into knowledge and understanding, providing a principled approach to making data-informed decisions. Statistical methods enable us to gain insights from data, and with the advent of powerful computing technology, these methods have become widely used in many sectors.
- **14. Mathematics/Music**
 - Trinity College Dublin
 - **613** points
 - **4 Years**
 - **Overview:** Mathematics Mathematics is a broad and diverse subject which is used to model, analyse and understand several applications in the physical and biological sciences, engineering, management science, economics and finance. Its numerous applications are naturally interwoven with the underlying theory which is essential in developing one's logical reasoning, quantitative skills and problem-solving techniques. Music Studying music will allow you to engage with a range of traditions to acquire a profound understanding of how music works in theory and in creative practice. If you are interested in understanding music's place in society, developing music technology skills, writing music, or improving your skills as an informed performer, this course could be for you.
- **15. Fine Art**
 - TU Dublin - Grangegorman
 - **701** points
 - **4 Years**
 - **Overview:** The BA in Fine Art is designed for students who wish to work as cultural producers in the Fine Art sector. The course is focused primarily on acquiring the knowledge and skills that are needed to operate as a visual artist in a competitive environment, nationally and internationally. There's a strong emphasis on developing skills acquisition, creative intelligence and conceptual and critical thinking abilities, which are integrated with modules in Critical Theory and Professional Practice.
- **16. Interior Design**
 - TU Dublin - Grangegorman
 - **862** points
 - **4 Years**
 - **Overview:** This course is all about the art or process of designing the interior decoration of a room or building, and how we experience spaces and the objects in them. It's a powerful, essential part of our daily lives that affects how we live, work and play. Exciting recreational environments, unique domestic spaces, functional workplaces, inspiring retail spaces, that's interior design at work.
- **17. Engineering**

- Trinity College Dublin
 - 577 points**
 - 4 Years**
 - Overview:** Engineering is about being creative in technical problem solving. Engineers make things possible by using mathematical and scientific principles together with analytical and design skills. They tackle existing problems by developing new solutions through innovative technologies. They also expand the frontiers of society by developing advanced materials, sustainable energy systems, construction technologies, transport systems, biomedical devices, and telecommunications infrastructure.
- **18. Mechanical Engineering**
 - University of Galway
 - 566 points**
 - 4 Years**
 - Overview:** Mechanical Engineering is a subject concerned with the design and manufacture of parts and systems that make up the range of machinery and equipment you see around you, from a can opener to a jet aircraft. Mechanical engineers design the tools and processes necessary to create all man-made products, and are often involved from conceiving of an idea right through to seeing it as a finished product ready for its commercial application.
- **19. Aeronautical Engineering**
 - University of Limerick
 - 556 points**
 - 4 Years**
 - Overview:** The Bachelor of Engineering (B.E.) and Masters of Engineering (M.E.) programmes are 4 years and 5 years in duration, respectively. Both include an eight month period of Cooperative Education spent in an appropriate industrial environment. The course provides a broad and practical programme of study, which gives you a good understanding of aircraft design, aerodynamics, structures, propulsion, control, materials, avionics, business and maintenance, and enables you to work in all sectors of the aerospace industry.

RECOMMENDATION SET 2

- **0. Dental Science**
 - Trinity College Dublin
 - 625 points**
 - 5 Years**
 - Overview:** Dental Science is the study of the oral cavity and the diseases associated with oral tissues. This five-year programme is designed to ensure that graduates can safely and effectively deliver the full range of primary dental care, including prevention, diagnosis and treatment of oral and dental diseases.
- **1. Economics and Finance**
 - University College Dublin
 - 625 points**
 - 3-4 Years**
 - Overview:** If you have a strong interest or ability in economics, maths and statistics, this degree provides everything you need for a future career in the areas of financial economics, banking and finance. Recognised as one of the premier degrees in its field in Ireland and internationally, it equips students with outstanding expertise in quantitative methods, analytical skills and a rigorous preparation in economics and finance. The skills that the course develops are valuable on their own in many careers and provide the essential background for learning Economics and Finance.
- **2. Management Science and Information Systems Studies**
 - Trinity College Dublin
 - 625 points**
 - 4 Years**
 - Overview:** Students learn how to use techniques from disciplines such as business, mathematics, computer science, statistics and management science to solve real world problems. There is also a firm emphasis on interpersonal skills such as verbal communication, interviewing, teamwork and report writing.
- **3. Global Business (USA)**
 - Dublin City University
 - 617 points**
 - 4 Years**
 - Overview:** Experience the world of work and study in the USA while you gain two business degrees, experience two countries and complete two work placements. The BA in Global Business (USA) is a passport to a career in international business. This unique course will give you a broad understanding of international business, as well as a rich intercultural experience, and high quality work placements with leading companies, in Ireland and the US.
- **4. Actuarial & Financial Studies**
 - University College Dublin
 - 613 points**
 - 4 Years**
 - Overview:** Studying UCD Actuarial & Financial Studies (BAFS) degree requires a multidisciplinary education in fields such as mathematics, economics, finance, statistics, risk management and professionalism. It takes a combination of strong analytical skills, business knowledge and understanding of human behaviour to design and manage programmes that control risk and guarantee sufficient funds for the insurance and pension sectors. Actuaries have traditionally worked mostly in the insurance and pensions industries but are increasingly moving into wider fields, where they can employ their range of skills. The course also opens up options to work in finance, investment and trading.
- **5. Engineering with Management**
 - Trinity College Dublin
 - 613 points**
 - 4 Years**
 - Overview:** Engineering with Management is concerned with the analysis, design, improvement, installation, and management of integrated systems of people, finance, materials and equipment. Our graduates have the technical skills common to all excellent engineers, with this knowledge augmented by an understanding of the commercial and industrial environment and the ability to generate innovative solutions to the problems of the world.

- **6. Law/Business Studies**

- Trinity College Dublin
- **613 points**
- **4 Years**
- **Overview:** LawThe law degree will appeal to you if you are interested in society and how it works, how we regulate the relationships between people. Given the wide range of legal modules, the degree attracts students with a broad range of interests.Business StudiesThis four year programme offers the opportunity to focus upon the many areas of overlapping interest between the two disciplines, for example, the structure of companies and other forms of business organisation, competition law and regulation of markets, consumer law, labour law, finance and financial markets, taxation, the protection of intellectual property and international perspectives on law and business.

- **7. Law/History**

- Trinity College Dublin
- **613 points**
- **4 Years**
- **Overview:** Law The law degree will appeal to you if you are interested in society and how it works, how we regulate the relationships between people. Given the wide range of legal modules, the degree attracts students with a broad range of interests. Those interested in politics are attracted to subjects such as constitutional law. History The History programme introduces students to the diversity of historical studies, which include modules covering medieval and modern periods, including Irish, European, and American history, as well as some modules exploring the skills and methods which historians use, and the kinds of debates in which historians engage.

- **8. Mathematics/Modern Language**

- Trinity College Dublin
- **613 points**
- **4 Years**
- **Overview:** MathematicsMathematics is a broad and diverse subject which is used to model, analyse and understand several applications in the physical and biological sciences, engineering, management science, economics and finance. Its numerous applications are naturally interwoven with the underlying theory which is essential in developing one's logical reasoning, quantitative skills and problem-solving techniques.You can choose between German, Irish, Italian, Russian and Spanish. Apart from French and Irish all languages can be studied from both advanced and beginners level.

- **9. Mathematics/Music**

- Trinity College Dublin
- **613 points**
- **4 Years**
- **Overview:** Mathematics Mathematics is a broad and diverse subject which is used to model, analyse and understand several applications in the physical and biological sciences, engineering, management science, economics and finance. Its numerous applications are naturally interwoven with the underlying theory which is essential in developing one's logical reasoning, quantitative skills and problem-solving techniques. Music Studying music will allow you to engage with a range of traditions to acquire a profound understanding of how music works in theory and in creative practice. If you are interested in understanding music's place in society, developing music technology skills, writing music, or improving your skills as an informed performer, this course could be for you.

- **10. Mathematics/Philosophy**

- Trinity College Dublin
- **613 points**
- **4 Years**
- **Overview:** Mathematics Mathematics is a broad and diverse subject which is used to model, analyse and understand several applications in the physical and biological sciences, engineering, management science, economics and finance. Its numerous applications are naturally interwoven with the underlying theory which is essential in developing one's logical reasoning, quantitative skills and problem-solving techniques. Philosophy This course offers the opportunity to engage in depth with questions of metaphysics (about the fundamental nature of reality), epistemology (the theory of knowledge), ethics (theories of right and wrong), political philosophy (the nature of the just state), philosophy of religion (reasoning about God), philosophy of mind (questions about thought, language and reason) and various other areas.

- **11. Global Business**

- Trinity College Dublin
- **602 points**
- **4 years**
- **Overview:** The Global Business degree is a unique programme, designed for students who wish to focus on business from the very beginning of their degree. The degree is both innovative and practical with a strong focus on experiential learning. Trinity Business School places an emphasis on blended learning, where academic excellence meets industry experience with a keen focus on how business operates within the global economy.

- **12. Pharmacy**

- University College Cork
- **602 points**
- **5 Years**
- **Overview:** A pharmacist is a healthcare team member specifically concerned with drugs and medicines. Pharmacy at UCC provides the confidence, skills, and knowledge to make a difference in the pharmaceutical arena.

- **13. Actuarial Mathematics**

- Dublin City University
- **589 points**
- **4 Years**
- **Overview:** Actuarial Mathematics could be the perfect course for you. It's accredited by the Institute and Faculty of Actuaries, UK, meaning you may be exempt from some of the exams needed to qualify as an actuary in Ireland and the UK. Before you embark on learning essential actuarial knowledge and theories, you'll be given solid mathematical training. In your first two years, you'll study the fundamental mathematical principles that underpin the actuarial and financial models covered in later years. You'll also study computer programming, economics and accounting.

- **14. Biomedical, Health and Life Sciences**

- University College Dublin
- **589 points**
- **4 Years**
- **Overview:** This course will appeal to those with a keen interest in science and in how research and technology can impact on human health. It is training scientists at the interface of science and medicine. You will learn how scientifically driven investigations can advance our knowledge of disease

prevention, detection and treatment and translating these into clinical utility. The course will immerse you in modern medical and biological sciences and focus on the application of scientific developments. BHLS offers students a unique opportunity to complete a research project with a Principal Investigator in a biomedical research area that interests them and an opportunity to be involved in peer-reviewed publications.

- **15. Law and French**

- Trinity College Dublin
- **589** points
- **4 Years**
- **Overview:** The Law and French degree programme offers a unique opportunity to study core and specialised legal modules but also the language, culture and political systems of France. Students must undertake an Erasmus year in France, exposing them to the law of that legal system.

- **16. Physiotherapy**

- University of Limerick
- **589** points
- **4 Years**
- **Overview:** The Bachelor of Science in Physiotherapy is a four-year degree programme which includes a total of 31 weeks of clinical practice in the last two years of the programme. The first year provides a foundation in Anatomy and Physiology, communication and behaviour, and an Introduction to Physiotherapy Practice. Over the remaining three years you will undertake studies in the various disciplines of physiotherapy including cardiorespiratory care, clinical neurology and musculoskeletal disorders for people across the lifespan. Research and evidence-based practice are core elements underpinning the programme.

- **17. Philosophy, Political Science, Economics and Sociology**

- Trinity College Dublin
- **581** points
- **4 Years**
- **Overview:** Philosophy, Political Science, Economics and Sociology (PPES), offers a coherent and integrated introduction to the study of social sciences and philosophy. It brings together some of the most important approaches to understanding society and, in doing so, develops skills for a range of future careers and activities.

- **18. Economics/Geography**

- Trinity College Dublin
- **578** points
- **4 Years**
- **Overview:** EconomicsAny society has to address the problem of how and what to produce for its material survival, and how the goods and services that are produced should be distributed among its population. Economists explore how people and institutions behave and function when producing, exchanging and using goods and services. GeographyGeography is the study of Earth's landscapes, peoples, places and environments. Fundamentally it is about the world in which we live. Geography offers a 21st century education by uniquely bridging the social sciences (human geography) with the natural sciences (physical geography). Geography also covers increasingly important environmental issues where humans affect physical environments and vice versa.

- **19. Economics/History**

- Trinity College Dublin
- **578** points
- **4 Years**
- **Overview:** EconomicsAny society has to address the problem of how and what to produce for its material survival, and how the goods and services that are produced should be distributed among its population. Economists explore how people and institutions behave and function when producing, exchanging and using goods and services. HistoryThe four-year programme allows students to lay firm foundations in the first two years, with wide-ranging modules on medieval and modern history, Irish, European, American, environmental and global history, as well as on historical methods and approaches. The final two years of the programme allow students the chance to study several specialist modules in-depth and to undertake independent research on a subject of their own choice.
