• 3. Music

- Preprocessed title: music
- Trinity College Dublin
- RIASEC Interests: Artistic
- Categories: Creative Arts
- **476** points
- **88.5%** similarity
- **Overview:** Studying music will allow you to engage with a range of traditions to acquire a profound understanding of how music works in theory and in creative practice. If you are interested in understanding music and its place in society, developing music technology skills, writing music, or improving your skills as an informed performer, this course could be for you. A music degree will prepare you for a wide range of careers in the creative arts, journalism, music production, arts management, research, and teaching.
- **Why we recommended this:**

• 4. English Literature/History of Art and Architecture

- Preprocessed title: english literatur histori art architectur
- Trinity College Dublin
- RIASEC Interests: Artistic, Investigative
- Categories: Creative Arts, Humanities
- **487** points
- **77.5%** similarity
- **Overview:** English LiteratureEnglish Literature covers a broad range of literatures written in the English language, from Chaucer to the present day. The aim of the course is to help students acquire a thorough knowledge of the history of differing literatures while also enabling them to develop a sophisticated critical consciousness and an awareness of critical and cultural theory. History of Art and ArchitectureHistory of Art and Architecture is about the study of images, objects and buildings. It is unique in developing high levels of visual literacy applicable to a range of career pathways. It explores why works of art look the way they do and seeks to discover what they say about the societies that created them. It develops skills in visual analysis, critical assessment, and communication.

- Preprocessed title: comput infrastructur
- TU Dublin - Grangegorman
- RIASEC Interests: Investigative
- Categories: Computers
- **346** points
- **70.2%** similarity
- **Overview:** Computer Science (Infrastructure) is about developing software and infrastructure for applications ranging from those on smart devices to those in global corporations. This course provides the skills required to build data centres and networks, and to develop software securely, individually and in teams. You'll gain a working knowledge of the components of a computer and a network, become familiar with the components of an operating system, and learn to administrate large distributed systems.
- **Why we recommended this:**

- **12. Genetics and Cell Biology**

- Preprocessed title: genet cell biolog
- Dublin City University
- RIASEC Interests: Investigative
- Categories: Computers, Life Science
- **518** points
- **67.1%** similarity
- **Overview:** By studying on this programme, you can come to understand the genetic basis for life and how this information can be used to investigate, diagnose and treat diseases. You'll also gain practical laboratory skills, as well as skills in communications, critical thinking and problem-solving. Furthermore, you'll gain skills in computational biology, which uses high-tech data analysis and modelling to help harness genetic and biological insights.
- **Why we recommended this:**

- **13. Data Science**

- Preprocessed title: data
- Dublin City University
- RIASEC Interests: Investigative
- Categories: Computers, Mathematics
- **500** points
- **66.3%** similarity
- **Overview:** Fancy a career as a professional problem solver, investigator and storyteller? That's exactly what a data scientist is. From retail and sports science to journalism and fintech, data scientists are increasingly at the heart of business and government. Whether it's enabling product recommendations or helping a sports team decide what player to buy next, data science can unlock the secrets of any sector. If you like maths, creative problem solving and collaborative work, data science could really appeal to you. This course sits at the intersection of computer science, maths and business, enabling you to understand what is possible with cutting-edge technology such as machine learning and artificial intelligence.

- **17. Mathematics/Philosophy**

- Preprocessed title: mathemat philosophi
- Trinity College Dublin
- RIASEC Interests: Artistic, Investigative
- Categories: Humanities, Mathematics
- **613** points
- **73.3%** similarity
- **Overview:** Mathematics Mathematics is a broad and diverse subject which is used to model, analyse and understand several applications in the physical and biological sciences, engineering, management science, economics and finance. Its numerous applications are naturally interwoven with the underlying theory which is essential in developing one's logical reasoning, quantitative skills and problem-solving techniques. Philosophy This course offers the opportunity to engage in depth with questions of metaphysics (about the fundamental nature of reality), epistemology (the theory of knowledge), ethics (theories of right and wrong), political philosophy (the nature of the just state), philosophy of religion (reasoning about God), philosophy of mind (questions about thought, language and reason) and various other areas.
- **Why we recommended this:**

- **18. Arts: Joint Honours (Humanities)**

- Preprocessed title: art human
- Dublin City University
- RIASEC Interests: Artistic, Investigative
- Categories: Humanities

- **378** points
- **71.1%** similarity
- **Overview:** At registration, choose two from the following list of subjects: Up to two permitted from English and Gaeilge Only one permitted from Human Development | Philosophy Only one permitted from History | Music Only one permitted from Geography | World Religions and Theology English You'll engage with a wide range of literature and become familiar with the vital characteristics and contexts of drama, poetry, film and fiction. Gaeilge/Irish You'll learn about Irish culture and tradition as well as developing your practical language skills. Human Development You'll develop an understanding of human needs and capacities at crucial stages of the development process through your studies of Psychology, Sociology and Philosophy. History You'll explore how human beings behave grounded on a close examination of how they have behaved in the past in all spheres of the world but with a particular emphasis on Ireland. Music You'll develop your musicality and deepen your understanding of music including classical, traditional, popular and other music styles drawing on a range of practical, analytical and critical approaches. Geography You'll examine human activity, human-environment relations and physical environments at a variety of scales, from the local through to the global. Philosophy You will critically engage with a range of questions about issues such as truth, beauty, value, knowledge, and the nature of reality. In doing so, you will develop enhanced skills in clear analysis and rigorous argumentation. World Religions and Theology You'll critically engage with the big questions about life in order to understand the historical and contemporary significance of religious faith agus contemporary ethical dilemmas.

- **17. Athletic Therapy and Training**

- Preprocessed title: athlet therapi train
- Dublin City University
- RIASEC Interests: Investigative, Realistic, Social
- Categories: Life Science, Sport
- **554** points
- **36.6%** similarity
- **Overview:** The Athletic Therapy and Training programme will equip you with skills in preventing, assessing, treating and rehabilitating injuries associated with physical activity, including those experienced by elite athletes. Incorporating multiple work placements, this course gives you extensive theoretical knowledge of how the body works and then shows you how to apply that expertise. It is an intensive, highly practical programme that immerses students in musculoskeletal medicine from an early stage. Practical experience at home and abroad: You'll learn how to assess, treat and rehabilitate in theory and, from second year, in real-world settings. You'll complete placements in sports medicine clinics and rehabilitation clinics, as well as undertaking pitchside and team placements. In your final year, you'll do a semester-long immersive placement, which could be in an athletic therapy clinic or a professional sports team. These placements may be completed in Ireland but most students go to the US, Canada, Australia or Britain. This course is accredited by Athletic Rehabilitation Therapy Ireland. When you graduate, you'll be eligible to become a certified Athletics Therapist. As an independent, highly skilled clinician with a wealth of experience, you'll be highly sought after in sports medicine, by musculoskeletal clinics or with a sports team, or you can go on to work as a researcher in musculoskeletal medicine.
