

RECOMMENDATION SET 1

- **0. Computer Science**

- Preprocessed title: comput
- University College Dublin
- RIASEC Interests: Investigative
- Categories: Computers
- **540** points
- **97.9%** similarity
- **Overview:** The UCD Computer Science degree covers the fundamentals of Computer Science while also exposing students to the contemporary languages and technologies used in the industry. Key topics include programming, foundational mathematics, advanced software engineering, cloud development, theory of computer science, networks and security. The principal programming languages used are C, Java and Python. Specialised topics include computer graphics, game development, robotics, mobile development and others.
- **Why we recommended this:**

- **1. Computer Science and Information Technology**

- Preprocessed title: comput inform technolog
- University of Galway
- RIASEC Interests: Investigative
- Categories: Computers
- **440** points
- **96.8%** similarity
- **Overview:** We depend on electronic devices, such such as computers and mobile phones, computer software and networks to store, process, transmit, retrieve and manipulate information. Students will cover the technology used in these devices and will focus on the development of the software applications that make these devices useful.
- **Why we recommended this:**

- **2. Computer Science and Software Engineering (through Arts)**

- Preprocessed title: comput softwar engin art
- Maynooth University
- RIASEC Interests: Investigative
- Categories: Computers
- **349** points
- **95.0%** similarity
- **Overview:** Study all the essentials of computing and software for mobile apps and websites, as well as key areas in mathematics, a major project and a six month placement in industry. Enjoy the huge benefit of studying another Arts subject with Computer Science in first year. This lends graduates a wider frame of reference.
- **Why we recommended this:**

- **3. Genetics and Cell Biology**

- Preprocessed title: genet cell biolog
- Dublin City University
- RIASEC Interests: Investigative
- Categories: Computers, Life Science
- **518** points
- **83.4%** similarity
- **Overview:** By studying on this programme, you can come to understand the genetic basis for life and how this information can be used to investigate, diagnose and treat diseases. You'll also gain practical laboratory skills, as well as skills in communications, critical thinking and problem-solving. Furthermore, you'll gain skills in computational biology, which uses high-tech data analysis and modelling to help harness genetic and biological insights.
- **Why we recommended this:**

- **4. Data Science**

- Preprocessed title: data
- Dublin City University
- RIASEC Interests: Investigative
- Categories: Computers, Mathematics
- **500** points
- **83.1%** similarity
- **Overview:** Fancy a career as a professional problem solver, investigator and storyteller? That's exactly what a data scientist is. From retail and sports science to journalism and fintech, data scientists are increasingly at the heart of business and government. Whether it's enabling product recommendations or helping a sports team decide what player to buy next, data science can unlock the secrets of any sector. If you like maths, creative problem solving and collaborative work, data science could really appeal to you. This course sits at the intersection of computer science, maths and business, enabling you to understand what is possible with cutting-edge technology such as machine learning and artificial intelligence.
- **Why we recommended this:**

- **5. Computational Social Science**

- Preprocessed title: comput social
- University College Dublin
- RIASEC Interests: Investigative
- Categories: Computers, Social Science
- **490** points
- **82.9%** similarity
- **Overview:** The world around us is undergoing significant changes due to digitization and deployment of Artificial Intelligence. Today we are more interconnected than ever before. As we navigate this new social landscape, we leave behind digital footprints that can be analyzed and interpreted through the lens of Computational Social Science. This field of study leverages the power of big data, computer simulations, and social network analysis to gain insights into social phenomena and individual behaviour.
- **Why we recommended this:**

- **6. Applied Physics**

- Preprocessed title: physic
- Dublin City University
- RIASEC Interests: Investigative
- Categories: Computers, Physical Science
- **413** points
- **81.1%** similarity
- **Overview:** Do you want to know how to use your understanding of physics to have an impact in the real world? This is the course for you. As for students of any experimental physics course, you'll need reasonable ability and comfort with mathematics to thrive and achieve your potential. This long-established experimental physics course focuses on the real-world applications of fundamental physics. You'll learn through a blend of lectures, tutorials and a strong element of laboratory and project work, gaining theoretical and analytical knowledge as well as excellent hands-on experimental, problem-solving and analytical skills. And you can focus on your core interests, by choosing from a range of specialisms such as data science, computational physics or semiconductors. Gaining vital real-world experience In third year, you'll do an INTRA work placement, either in an industrial or research laboratory environment. We strongly support students applying for summer internships both nationally and internationally, and some Applied Physics students go on such competitive internships each year, both in Ireland and abroad.
- **Why we recommended this:**

• 7. Mechatronic Engineering

- Preprocessed title: mechatron engin
- Dublin City University
- RIASEC Interests: Investigative, Realistic
- Categories: Computers, Engineering
- **533** points
- **80.3%** similarity
- **Overview:** This course all about how we build intelligent machines through the meeting of mechanical systems such as engines and machines with the electronics needed to control them. This course perfectly blends mechanical engineering and electronic engineering. It offers classes in 3D modelling and design, for example, as well as circuit design and programming. Our students and staff are intrigued and inspired by the interplay between electronics and moving parts in connected devices and state-of-the-art machinery. Gain knowledge for the real world In third year, you'll get to do a six-month INTRA work placement and throughout the course, you'll do lots of project-based learning where you use the latest real-world tools and technologies to solve problems and, of course, build robots. That's not all. You'll also take some business-based modules, so you can learn how to develop a business plan and work with other parts of an enterprise. While you can go on from this course to work in either mechanical or electronic engineering, our graduates typically end up in roles where they incorporate one into the other. For example, they might put sensors into a machine to measure aspects of how it's working or develop control systems for a lift or a car. Either way, mechatronics graduates are in huge demand.
- **Why we recommended this:**

• 8. Electronic and Computer Engineering

- Preprocessed title: electron comput engin
- Dublin City University
- RIASEC Interests: Investigative, Realistic
- Categories: Computers, Engineering
- **531** points
- **80.3%** similarity
- **Overview:** Calling maths lovers! If you'd like to be able to fix a gaming remote or build a smart doorbell from scratch, you need to study Electronic and Computer Engineering. Across the first three years, you'll study the fundamentals of electronic engineering and programming. As this course covers a broad field, you'll choose one of four specialisms in fourth year: Systems and Devices (covering sensors, diagnostics and more), High-Speed Networks (such as fibre optics and 5G), Digital Interaction (including 3D interfaces and game design), and the Internet of Things.
- **Why we recommended this:**

• 9. Mathematics

- Preprocessed title: mathemat
- Trinity College Dublin
- RIASEC Interests: Investigative
- Categories: Mathematics
- **578** points
- **98.4%** similarity
- **Overview:** Mathematics is a broad and diverse subject which is used to model, analyse and understand several applications in the physical and biological sciences, engineering, management science, economics and finance. Its numerous applications are naturally interwoven with the underlying theory which is essential in developing one's logical reasoning, quantitative skills and problem-solving techniques.
- **Why we recommended this:**

• 10. Statistics

- Preprocessed title: statist
- University College Dublin
- RIASEC Interests: Investigative
- Categories: Mathematics
- **420** points
- **96.1%** similarity
- **Overview:** If you are interested in studying Statistics with an Arts and Humanities or Social Science subject, then this degree could be for you. Statistics is the science of transforming data into knowledge and understanding, providing a principled approach to making data-informed decisions. Statistical methods enable us to gain insights from data, and with the advent of powerful computing technology, these methods have become widely used in many sectors.
- **Why we recommended this:**

• 11. Actuarial & Financial Studies

- Preprocessed title: actuari financi
- University College Dublin
- RIASEC Interests: Conventional, Investigative
- Categories: Business, Mathematics
- **613** points
- **82.5%** similarity
- **Overview:** Studying UCD Actuarial & Financial Studies (BAFS) degree requires a multidisciplinary education in fields such as mathematics, economics, finance, statistics, risk management and professionalism. It takes a combination of strong analytical skills, business knowledge and understanding of human behaviour to design and manage programmes that control risk and guarantee sufficient funds for the insurance and pension sectors. Actuaries have traditionally worked mostly in the insurance and pensions industries but are increasingly moving into wider fields, where they can employ their range of skills. The course also opens up options to work in finance, investment and trading.

- **Why we recommended this:**
- **12. Arts (Mathematics and Education)**
 - Preprocessed title: art mathemat educ
 - University of Galway
 - RIASEC Interests: Investigative, Social
 - Categories: Education, Mathematics
 - **423** points
 - **71.4%** similarity
 - **Overview:** This degree combines a teacher training qualification with teaching practice throughout the duration of the programme. As part of the programme you will undertake a teaching placement in each year, completing 100 hours of teaching between years 1-3 and a further 13 weeks a post-primary school in your fourth year.
 - **Why we recommended this:**
- **13. Quantitative Finance**
 - Preprocessed title: quantit financ
 - Maynooth University
 - RIASEC Interests: Conventional, Enterprising
 - Categories: Business, Computers, Mathematics
 - **465** points
 - **47.2%** similarity
 - **Overview:** This programme will challenge and stimulate students who wish to pursue a career in the financial markets. The combination of financial, mathematical and computer programming skills will equip graduates to succeed and prosper in a fast-changing banking and financial sector. Students will have the opportunity to put the theory into practice during the work placement period and savour the daily life of a professional in the financial services industry.
 - **Why we recommended this:**
- **14. Engineering**
 - Preprocessed title: engin
 - Trinity College Dublin
 - RIASEC Interests: Investigative, Realistic
 - Categories: Engineering
 - **577** points
 - **84.7%** similarity
 - **Overview:** Engineering is about being creative in technical problem solving. Engineers make things possible by using mathematical and scientific principles together with analytical and design skills. They tackle existing problems by developing new solutions through innovative technologies. They also expand the frontiers of society by developing advanced materials, sustainable energy systems, construction technologies, transport systems, biomedical devices, and telecommunications infrastructure.
 - **Why we recommended this:**
- **15. Mechanical Engineering**
 - Preprocessed title: mechan engin
 - University of Galway
 - RIASEC Interests: Investigative, Realistic
 - Categories: Engineering
 - **566** points
 - **84.4%** similarity
 - **Overview:** Mechanical Engineering is a subject concerned with the design and manufacture of parts and systems that make up the range of machinery and equipment you see around you, from a can opener to a jet aircraft. Mechanical engineers design the tools and processes necessary to create all man-made products, and are often involved from conceiving of an idea right through to seeing it as a finished product ready for its commercial application.
 - **Why we recommended this:**
- **16. Political Science/Law**
 - Preprocessed title: polit law
 - Trinity College Dublin
 - RIASEC Interests: Investigative
 - Categories: Law
 - **553** points
 - **80.7%** similarity
 - **Overview:** Political Science If you are interested in having an in-depth knowledge of public affairs, developing critical and much sought after research skills and if your career interests lie in journalism, public service, teaching, public policy, international organisation and/or business then Political Science may be for you Law The law degree will appeal to you if you are interested in society and how it works, how we regulate the relationships between people. Given the wide range of legal modules, the degree attracts students with a broad range of interests. Those interested in politics are attracted to subjects such as constitutional law.
 - **Why we recommended this:**
- **17. Radiography**
 - Preprocessed title: radiographi
 - University College Dublin
 - RIASEC Interests: Investigative
 - Categories: Healthcare, Physical Science
 - **545** points
 - **68.9%** similarity
 - **Overview:** Radiographers are responsible for producing high-quality images to assist in the diagnosis and treatment of disease. While radiography is a caring profession, it's also one that requires considerable technological and scientific expertise in both the production of images and the responsible delivery of ionising radiation. If you're interested in science and you want to use your knowledge to care for people, Radiography at UCD may be a perfect fit for you. Our aim is to prepare graduate radiographers to meet the everyday challenges arising from ongoing advances in diagnostic imaging and healthcare.
 - **Why we recommended this:**
- **18. Applied Economics (through Transformational Learning)**
 - Preprocessed title: econom transform learn

- University College Cork
 - RIASEC Interests: Investigative
 - Categories: Social Science
 - **498** points
 - **80.1%** similarity
 - **Overview:** Economics is the study of people in the ordinary business of life. It is about the choices and decisions that we make and the consequence of these decisions. The BSc Applied Economics is a degree in Economics with a difference. It is a 4 year degree combining the study and application of Economics with personal, professional development and the opportunity to go on work placement or study abroad.
 - **Why we recommended this:**
- **19. Agricultural Science**
 - Preprocessed title: agricultur
 - University College Cork
 - RIASEC Interests: Investigative, Realistic
 - Categories: Agriculture, Life Science
 - **484** points
 - **64.2%** similarity
 - **Overview:** At UCC we guarantee a comprehensive agricultural education; building from a foundation of fundamental sciences, developing core knowledge, instilling best practice applications using the very latest tools and technologies, and interrogating the business that is dairying.
 - **Why we recommended this:**

RECOMMENDATION SET 2

- **0. Medicine**
 - Preprocessed title: medicin
 - Trinity College Dublin
 - RIASEC Interests: Investigative, Social, Realistic
 - Categories: Healthcare, Life Science
 - **739** points
 - **45.7%** similarity
 - **Overview:** Medicine is a unique course in that students study a broad range of subjects with the primary goal of understanding the science and practice of healing. Medicine and healthcare are constantly evolving as new knowledge and therapies emerge to prevent and treat illness. Each day brings a new patient with new healthcare challenges.
 - **Why we recommended this:**
- **1. Music Education**
 - Preprocessed title: music educ
 - Trinity College Dublin
 - RIASEC Interests: Artistic, Social
 - Categories: Creative Arts, Education
 - **656** points
 - **23.3%** similarity
 - **Overview:** If you love sharing music, already have a competent standard of music performance, and wish to combine these qualities with a teaching career, then this course is ideally suited to you. Whether your interests are primarily academic or practical, your experience of this vast and rich discipline will be greatly advanced. As an academic study, music fosters independence of thought, creativity and critical and analytical skills. This course offers opportunities to perform music, to share music with others via teaching and performing, and to conduct a number of different ensembles.
 - **Why we recommended this:**
- **2. Actuarial & Financial Studies**
 - Preprocessed title: actuari financi
 - University College Dublin
 - RIASEC Interests: Conventional, Investigative
 - Categories: Business, Mathematics
 - **613** points
 - **68.9%** similarity
 - **Overview:** Studying UCD Actuarial & Financial Studies (BAFS) degree requires a multidisciplinary education in fields such as mathematics, economics, finance, statistics, risk management and professionalism. It takes a combination of strong analytical skills, business knowledge and understanding of human behaviour to design and manage programmes that control risk and guarantee sufficient funds for the insurance and pension sectors. Actuaries have traditionally worked mostly in the insurance and pensions industries but are increasingly moving into wider fields, where they can employ their range of skills.  - **Why we recommended this:**
- **3. Dentistry**
 - Preprocessed title: dentistr
 - University College Cork
 - RIASEC Interests: Investigative, Realistic, Social
 - Categories: Healthcare, Life Science
 - **613** points
 - **45.5%** similarity
 - **Overview:** Dentistry provides a rewarding career in the provision of oral health care and is satisfying not only in terms of performing high-standard clinical procedures but also in terms of social interaction. The dentist also fulfills an important function in educating patients regarding their oral care.
 - **Why we recommended this:**
- **4. Engineering with Management**
 - Preprocessed title: engin manag
 - Trinity College Dublin
 - RIASEC Interests: Enterprising, Investigative, Social
 - Categories: Business, Engineering
 - **613** points
 - **46.3%** similarity

- **Overview:** Engineering with Management is concerned with the analysis, design, improvement, installation, and management of integrated systems of people, finance, materials and equipment. Our graduates have the technical skills common to all excellent engineers, with this knowledge augmented by an understanding of the commercial and industrial environment and the ability to generate innovative solutions to the problems of the world.
 - **Why we recommended this:**
- **5. Law/Business Studies**
 - Preprocessed title: law busi
 - Trinity College Dublin
 - RIASEC Interests: Conventional, Enterprising
 - Categories: Business, Law
 - **613** points
 - **29.3%** similarity
 - **Overview:** LawThe law degree will appeal to you if you are interested in society and how it works, how we regulate the relationships between people. Given the wide range of legal modules, the degree attracts students with a broad range of interests.Business StudiesThis four year programme offers the opportunity to focus upon the many areas of overlapping interest between the two disciplines, for example, the structure of companies and other forms of business organisation, competition law and regulation of markets, consumer law, labour law, finance and financial markets, taxation, the protection of intellectual property and international perspectives on law and business.
 - **Why we recommended this:**
- **6. Mathematics/Modern Language**
 - Preprocessed title: mathemat languag
 - Trinity College Dublin
 - RIASEC Interests: Artistic, Investigative
 - Categories: Languages, Mathematics
 - **613** points
 - **63.6%** similarity
 - **Overview:** MathematicsMathematics is a broad and diverse subject which is used to model, analyse and understand several applications in the physical and biological sciences, engineering, management science, economics and finance. Its numerous applications are naturally interwoven with the underlying theory which is essential in developing one's logical reasoning, quantitative skills and problem-solving techniques.You can choose between German, Irish, Italian, Russian and Spanish. Apart from French and Irish all languages can be studied from both advanced and beginners level.
 - **Why we recommended this:**
- **7. Pharmacy**
 - Preprocessed title: pharmaci
 - University College Cork
 - RIASEC Interests: Investigative, Social
 - Categories: Chemical Science, Healthcare, Life Science
 - **602** points
 - **40.4%** similarity
 - **Overview:** A pharmacist is a healthcare team member specifically concerned with drugs and medicines. Pharmacy at UCC provides the confidence, skills, and knowledge to make a difference in the pharmaceutical arena.
 - **Why we recommended this:**
- **8. Biomedical, Health and Life Sciences**
 - Preprocessed title: biomed health life
 - University College Dublin
 - RIASEC Interests: Investigative
 - Categories: Life Science
 - **589** points
 - **57.3%** similarity
 - **Overview:** This course will appeal to those with a keen interest in science and in how research and technology can impact on human health. It is training scientists at the interface of science and medicine. You will learn how scientifically driven investigations can advance our knowledge of disease prevention, detection and treatment and translating these into clinical utility. The course will immerse you in modern medical and biological sciences and focus on the application of scientific developments. BHLS offers students a unique opportunity to complete a research project with a Principal Investigator in a biomedical research area that interests them and an opportunity to be involved in peer-reviewed publications.
 - **Why we recommended this:**
- **9. Veterinary Medicine**
 - Preprocessed title: veterinari medicin
 - University College Dublin
 - RIASEC Interests: Investigative, Realistic, Social
 - Categories: Healthcare, Life Science
 - **589** points
 - **44.9%** similarity
 - **Overview:** This course will educate you to the best international standards in veterinary medicine and is accredited nationally by the Veterinary Council of Ireland (VCI), by the European Association of Establishments for Veterinary Education (EAEVE) and is one of only 6 veterinary schools in Europe currently accredited by the American Veterinary Medical Association (AVMA). The veterinary profession is concerned with the promotion of the health and welfare of animals of special importance to society. This involves the care of healthy and sick animals, the prevention, recognition, control and treatment of their diseases and of diseases transmitted from animals to man, and the welfare and productivity of livestock.
 - **Why we recommended this:**
- **10. Commercial Modern Music**
 - Preprocessed title: commerci music
 - BIMM Institute Dublin
 - RIASEC Interests: Artistic
 - Categories: Business, Creative Arts
 - **585** points
 - **24.7%** similarity
 - **Overview:** This programme encourages musicians to hone their live performance skills and recording studio technical knowledge while also developing your career goals, which may include being a professional performer, professional songwriter or producer, music manager or publisher, academic researcher or teacher. Streams: Drums, Bass, Guitar, Vocals, Songwriting and Music Production. The course includes a mixture of classroom study, live performance and specialist workshops.
 - **Why we recommended this:**

- **11. Philosophy, Political Science, Economics and Sociology**

- Preprocessed title: philosophi polit econom sociolog
- Trinity College Dublin
- RIASEC Interests: Investigative
- Categories: Humanities, Law, Social Science
- **581** points
- **46.2%** similarity
- **Overview:** Philosophy, Political Science, Economics and Sociology (PPES), offers a coherent and integrated introduction to the study of social sciences and philosophy. It brings together some of the most important approaches to understanding society and, in doing so, develops skills for a range of future careers and activities.
- **Why we recommended this:**

- **12. Physiotherapy**

- Preprocessed title: physiotherapi
- University College Dublin
- RIASEC Interests: Investigative, Realistic, Social
- Categories: Healthcare, Life Science, Sport
- **578** points
- **41.3%** similarity
- **Overview:** Physiotherapists are healthcare professionals responsible for developing, maintaining and restoring movement and functional ability in adults and children using evidence-based practice. Studying Physiotherapy in UCD will provide you with the skills and qualifications required to practice as a physiotherapist upon graduation. With state-of-the-art facilities and globally recognised researchers as lecturers, you will learn in a culture of established academic excellence.
- **Why we recommended this:**

- **13. Engineering**

- Preprocessed title: engin
- Trinity College Dublin
- RIASEC Interests: Investigative, Realistic
- Categories: Engineering
- **577** points
- **62.1%** similarity
- **Overview:** Engineering is about being creative in technical problem solving. Engineers make things possible by using mathematical and scientific principles together with analytical and design skills. They tackle existing problems by developing new solutions through innovative technologies. They also expand the frontiers of society by developing advanced materials, sustainable energy systems, construction technologies, transport systems, biomedical devices, and telecommunications infrastructure.
- **Why we recommended this:**

- **14. Finance**

- Preprocessed title: financ
- University College Cork
- RIASEC Interests: Conventional, Enterprising
- Categories: Business
- **577** points
- **30.5%** similarity
- **Overview:** Finance is concerned with the operation of financial markets and the valuation of financial assets, in particular in stock, bond, foreign exchange and interest rate markets. The BSc Finance is based equally on the subject areas of corporate finance and financial economics. This combined approach provides graduates with a thorough grounding in each area.
- **Why we recommended this:**

- **15. Psychology**

- Preprocessed title: psycholog
- Trinity College Dublin
- RIASEC Interests: Investigative, Social
- Categories: Social Science
- **577** points
- **50.4%** similarity
- **Overview:** The School of Psychology aims to offer a knowledge base and a set of skills that not only equip students for the many careers that exist in psychology, but also prepare students intellectually for other careers. Psychology is a branch of science that demands clear, rigorous thinking, numeracy and the ability to define, study and solve problems in complex, changing settings.
- **Why we recommended this:**

- **16. Mechanical Engineering**

- Preprocessed title: mechan engin
- University of Galway
- RIASEC Interests: Investigative, Realistic
- Categories: Engineering
- **566** points
- **61.8%** similarity
- **Overview:** Mechanical Engineering is a subject concerned with the design and manufacture of parts and systems that make up the range of machinery and equipment you see around you, from a can opener to a jet aircraft. Mechanical engineers design the tools and processes necessary to create all man-made products, and are often involved from conceiving of an idea right through to seeing it as a finished product ready for its commercial application.

- **17. Occupational Therapy**

- Preprocessed title: occup therapi
- University College Cork
- RIASEC Interests: Investigative, Realistic, Social
- Categories: Life Science, Healthcare
- **566** points
- **44.4%** similarity

- **Overview:** Students on this broad and varied Occupational Therapy course study psychology, anatomy and physiology, as well as occupational therapy theories, assessment and treatment approaches and evidence-based practice.
- **Why we recommended this:**

- **18. Theoretical Physics**

- Preprocessed title: physic
- Trinity College Dublin
- RIASEC Interests: Investigative
- Categories: Mathematics, Physical Science
- **566** points
- **71.8%** similarity
- **Overview:** Theoretical Physics explores the natural world at its most fundamental level, using mathematical theories guided by experimental investigation. For some it is the foundation for an academic career in mathematics or physics. For others it provides the basis for many career options in industry, medicine, law, finance and computing. Trinity provides a course which ranges widely across physics and mathematics. Its graduates are in demand for their technical skills and versatility.
- **Why we recommended this:**

- **19. European Studies**

- Preprocessed title: european
- Trinity College Dublin
- RIASEC Interests: Investigative
- Categories: Languages, Humanities, Social Science
- **564** points
- **44.6%** similarity
- **Overview:** European Studies is a broad-ranging and integrated programme that offers students the chance to learn European languages, and also to study history and social sciences. This programme encourages students to think about our continent in all its complexity, and to analyse Europe's cultures, history, and politics.
- **Why we recommended this:**
