

RECOMMENDATION SET 1

- **0. English Literature/History**

- Trinity College Dublin
- **487 points**
- **Overview:** English LiteratureEnglish Literature covers a broad range of literatures written in the English language, from Chaucer to the present day. The aim of the course is to help students acquire a thorough knowledge of the history of differing literatures while also enabling them to develop a sophisticated critical consciousness and an awareness of critical and cultural theory. HistoryThe History programme combines the strength of a broad-based programme in the first two years, introducing all students to the sheer diversity of historical studies, with the freedom to explore areas of particular interest to individual students in the final two years. The first and second years provide a range of modules covering medieval and modern periods, including Irish, European, and American history, as well as some modules exploring the skills and methods which historians use, and the kinds of debates in which historians engage.
- **Why we recommended this:** English Literature/History matches your deep interest in humanities, allowing you to use your strong analytical skills and creative curiosity to explore historical contexts and complex literary texts.

- **1. English Literature/Middle Eastern, Jewish and Islamic Civilisations**

- Trinity College Dublin
- **487 points**
- **Overview:** English Literature (Joint Honours) English Literature covers a broad range of literatures written in the English language, from Chaucer to the present day. The aim of the course is to help students acquire a sense of the development of literatures in English over time and space and a rich array of critical techniques and questions. What is Middle Eastern, Jewish and Islamic Civilisations Middle Eastern, Jewish and Islamic Civilisations is the study of the historical origins as well as contemporary culture of a wide range of societies of the region, providing you with an insight into the contemporary Middle East and to the challenges of diversity and multiculturalism in an increasingly globalised world.
- **Why we recommended this:** English Literature/Middle Eastern, Jewish and Islamic Civilisations appeals to your passion for humanities and your desire to investigate diverse cultures through critical analysis and scholarly research.

- **2. English Literature/Philosophy**

- Trinity College Dublin
- **487 points**
- **Overview:** English LiteratureEnglish Literature covers a broad range of literatures written in the English language, from Chaucer to the present day. The aim of the course is to help students acquire a thorough knowledge of the history of differing literatures while also enabling them to develop a sophisticated critical consciousness and an awareness of critical and cultural theory. PhilosophyThis course offers the opportunity to engage in depth with questions of metaphysics (about the fundamental nature of reality), epistemology (the theory of knowledge), ethics (theories of right and wrong), political philosophy (the nature of the just state), philosophy of religion (reasoning about God), philosophy of mind (questions about thought, language and reason) and various other areas.
- **Why we recommended this:** English Literature/Philosophy aligns with your fascination for humanities, providing a platform to apply your logical reasoning to fundamental questions while engaging with creative literary expression.

- **3. Religion/English Literature**

- Trinity College Dublin
- **397 points**
- **Overview:** World Religions and TheologyThis course explores theories of religion, the monotheistic religions of Judaism, Christianity and Islam, the religions of Asia and Africa, movements such as New Atheism, New Religious Movements and the interaction between religion and politics, science, or art. English Literature English Literature covers a broad range of literatures written in the English language, from Chaucer to the present day. The aim of the course is to help students acquire a thorough knowledge of the history of differing literatures while also enabling them to develop a sophisticated critical consciousness and an awareness of critical and cultural theory.
- **Why we recommended this:** Religion/English Literature combines your strong humanities focus with a research-driven exploration of world cultures, arts, and the evolution of human thought across different societies.

- **4. Climate and Environmental Sustainability**

- Dublin City University
- **431 points**
- **Overview:** The BA in Climate and Environmental Sustainability is an applied geography programme that is not just about understanding climate change and its consequences, but also about understanding how the environment itself offers solutions. If you have a keen interest in issues relating to the environment such as improving water quality and managing biodiversity, this degree is ideal for you.
- **Why we recommended this:** Climate and Environmental Sustainability is perfect for your environmental interests, blending hands-on practical solutions with the scientific investigation needed to tackle urgent global sustainability challenges.

- **5. Environmental Health**

- TU Dublin - Grangegorman
- **320 points**
- **Overview:** In this course, you'll study issues such as food safety, environmental pollution, occupational safety and health risk management, and how these should be managed.
- **Why we recommended this:** Environmental Health allows you to use your practical problem-solving skills and scientific curiosity to protect public safety and manage ecological risks in various settings.

- **6. Planning and Environmental Management**

- TU Dublin - Bolton Street
- **360 points**
- **Overview:** TU835 BSc in Spatial Planning and Environmental Management is designed to prepare and equip you with the skills to be a decision-maker and expert practitioner in planning our urban and rural environments. Now more than ever, graduates are needed who can develop and implement environmental management solutions to critical problems such as climate change and biodiversity loss.
- **Why we recommended this:** Planning and Environmental Management suits your desire to improve the environment, enabling you to practically design and manage sustainable urban and rural spaces for future generations.

- **7. Environmental Science and Technology**

- Dublin City University
- **434 points**
- **Overview:** Get the relevant scientific skills you'll need to tackle these complex issues on this diverse and stimulating course. Whether out on field trips or doing nanoscale environmental analysis in the lab, you'll gain the analytical and practical skills to understand, protect and improve our environment.

Not only that, but you'll get to contribute in a practical way to reducing carbon on- and off-campus in our new module, Towards Zero Carbon. Over the four years, you'll gain a strong scientific core in biology, chemistry, physics and maths. This is vital to working as an environmental scientist, but also gives you flexibility when it comes to your career choice. In your third year, you'll do a nine-month work placement and you also have the chance to study abroad. And of course, throughout the course, you'll be able to contribute practically to reducing carbon reliance. As the world is ever more focused on protecting the environment and cutting carbon emissions, there is ongoing and increasing demand for qualified scientists. Graduates from this course typically go on to high-impact careers as research scientists in areas such as environmental protection, and water, air and soil management and conservation.

- **Why we recommended this:** Environmental Science and Technology connects your passion for nature with rigorous scientific analysis, offering hands-on laboratory and fieldwork to develop innovative technological solutions for our planet.

• 8. Culinary Arts

- TU Dublin - Grangegorman
- **328** points
- **Overview:** In this course, you'll acquire knowledge and skills in restaurant service and the larder, hot kitchen and pastry sections, and be well set up for a career in culinary operations, food and beverage, front of house, marketing or sales.
- **Why we recommended this:** Culinary Arts merges your creative talents with a hands-on, practical approach to food, allowing you to master technical skills in a high-energy, hospitality-focused environment.

• 9. Fashion and Retail Business

- TU Dublin - Aungier Street
- **282** points
- **Overview:** You'll acquire a comprehensive understanding of the principal operational and strategic issues involved in the management of retail & services-based enterprises in the context of both national and international business. You'll become familiar with the business specialties and disciplines affecting both operational and strategic management decisions in such enterprises.
- **Why we recommended this:** Fashion and Retail Business utilizes your creative flair and practical organizational skills to navigate the fast-paced world of retail, combining artistic trends with effective business management.

• 10. International Hospitality Management

- TU Dublin - Grangegorman
- **255** points
- **Overview:** This course will give you the management, technological and operational skills you need to work in the international hospitality industry. Specific modules enhance the international focus of the course and the international experience of the student.
- **Why we recommended this:** International Hospitality Management leverages your strong interest in the hospitality sector, equipping you with the practical and managerial skills required to lead operations in global tourism.

• 11. International Hospitality and Tourism Management

- TU Dublin - Tallaght
- **232** points
- **Overview:** This course provides students with the opportunity to study contemporary modules in e-business, web design, media planning, food and drink tourism, procurement and tourism planning and policy. Students will undertake a six month professional internship in Ireland or with international partners of the college department abroad. Additionally, students will be able to study French, German, or Spanish thereby maximising their employability.
- **Why we recommended this:** International Hospitality and Tourism Management suits your hospitality focus, offering practical training and professional internships to help you manage diverse service environments and international travel operations.

• 12. Architecture

- TU Dublin - Bolton Street
- **632** points
- **Overview:** Architecture is the art and science of designing space. This course will suit you if you've got a creative aptitude for architectural design, the ability to implement your designs in practice, are interested in artistic and cultural aspects of society, and have an aptitude for technical and managerial challenges.
- **Why we recommended this:** Architecture perfectly balances your creative vision with technical precision, allowing you to design and build functional spaces while exploring the artistic and scientific aspects of construction.

• 13. Architectural Technology

- TU Dublin - Bolton Street
- **424** points
- **Overview:** An Architectural Technologist is a technical designer skilled in the application and integration of architectural and construction technologies in the building design process. Architectural Technology is an immersive, full-time course, which will prepare you for practice and requires attendance five days a week. A studio setting provides a structured environment in which you will work alongside other students and be exposed to a variety of teaching and learning experiences.
- **Why we recommended this:** Architectural Technology draws on your practical mindset and attention to detail, focusing on the technical design and integration of construction technologies to bring complex buildings to life.

• 14. Building Engineering

- TU Dublin - Bolton Street
- **490** points
- **Overview:** Building engineers are at the heart of the building design process. They design, develop, install and implement the mechanical and electrical systems that ensure our buildings are safe, sustainable, comfortable, efficient and effective. Our graduates' impact and value lies at the leading edge-convergence of creative design vision and making it work through engineering and construction technology.
- **Why we recommended this:** Building Engineering aligns with your technical aptitude and interest in construction, focusing on the practical design of sustainable mechanical systems that make modern buildings safe and efficient.

• 15. Structural Engineering

- TU Dublin - Bolton Street
- **490** points
- **Overview:** Structural engineers are involved in designing buildings, bridges, factories, power stations, communication towers, dams, stadiums, oil and gas rigs, and wind turbines. In this course, you'll study structural analysis, mechanics of materials, design of steel and concrete, geotechnical engineering, environmental engineering, concrete and material technology and design projects.
- **Why we recommended this:** Structural Engineering uses your strong analytical abilities and practical nature to design robust infrastructure, from bridges to skyscrapers, ensuring they are safe and technologically sound.

• 16. Agricultural Systems Engineering

• 16. Agricultural Systems Engineering

- SETU Carlow
- **313** points
- **Overview:** This programme focuses on agricultural science, agri-business, agricultural engineering and agricultural systems. Students will develop knowledge in areas such as sensing technology, electro-pneumatics, electro-hydraulics, automation, Agribusiness, management, marketing and product pricing.
- **Why we recommended this:** Agricultural Systems Engineering connects your interest in farming and technology, applying practical engineering solutions and automated systems to improve modern agribusiness and food production.

• 17. Medicine

- Trinity College Dublin
- **739** points
- **Overview:** Medicine is a unique course in that students study a broad range of subjects with the primary goal of understanding the science and practice of healing. Medicine and healthcare are constantly evolving as new knowledge and therapies emerge to prevent and treat illness. Each day brings a new patient with new healthcare challenges.
- **Why we recommended this:** Medicine suits your scientific curiosity and interest in healthcare, requiring both the practical skills to perform procedures and the analytical depth to diagnose and treat complex illnesses.

• 18. Children's and General Nursing (Integrated)

- Trinity College Dublin
- **520** points
- **Overview:** Students of nursing learn about caring and the complexities of health and illness through interactive teaching and learning strategies in the classroom and the healthcare environment. Practice (clinical and community) experience provides the student with opportunities to integrate the art and science of nursing and promotes the development of caring relationships with patients and their families/significant others.
- **Why we recommended this:** Children's and General Nursing (Integrated) matches your healthcare interests, combining hands-on clinical practice with the scientific knowledge needed to provide compassionate and effective patient care.

• 19. Midwifery

- Trinity College Dublin
- **507** points
- **Overview:** The first three years combine learning in university and clinical midwifery practice in the maternity hospitals. The final year will include a 36-week period of internship in midwifery practice. This course will provide you with the knowledge and skills to meet the needs of women and their families in an individualised, culturally sensitive manner.
- **Why we recommended this:** Midwifery utilizes your practical abilities and interest in health sciences to support women throughout pregnancy, focusing on hands-on clinical skills and personalized, evidence-based care.

RECOMMENDATION SET 2

• 0. Architecture

- TU Dublin - Bolton Street
- **632** points
- **Overview:** Architecture is the art and science of designing space. This course will suit you if you've got a creative aptitude for architectural design, the ability to implement your designs in practice, are interested in artistic and cultural aspects of society, and have an aptitude for technical and managerial challenges.
- **Why we recommended this:** Architecture integrates your talent for creative design with your technical precision, offering a pathway to design and build complex structures that shape our physical and cultural environment.

• 1. Medicine

- Trinity College Dublin
- **739** points
- **Overview:** Medicine is a unique course in that students study a broad range of subjects with the primary goal of understanding the science and practice of healing. Medicine and healthcare are constantly evolving as new knowledge and therapies emerge to prevent and treat illness. Each day brings a new patient with new healthcare challenges.
- **Why we recommended this:** Medicine utilizes your exceptional analytical abilities and practical problem-solving skills to master complex health sciences while fulfilling your interest in patient care and the mechanics of healing.

• 2. Children's and General Nursing (Integrated)

- Trinity College Dublin
- **520** points
- **Overview:** Students of nursing learn about caring and the complexities of health and illness through interactive teaching and learning strategies in the classroom and the healthcare environment. Practice (clinical and community) experience provides the student with opportunities to integrate the art and science of nursing and promotes the development of caring relationships with patients and their families/significant others.
- **Why we recommended this:** Children's and General Nursing (Integrated) matches your practical skills and compassion, requiring both the scientific mind to understand illness and the personal touch to care for vulnerable patients.

• 3. History of Art and Architecture

- Trinity College Dublin
- **511** points
- **Overview:** History of Art and Architecture is about the study of images, objects and buildings. It is unique in developing high levels of visual literacy applicable to a range of career pathways. It explores why works of art look the way they do and seeks to discover what they say about the societies that created them. It develops skills in visual analysis, critical assessment, and communication.
- **Why we recommended this:** History of Art and Architecture appeals to your analytical curiosity and love for culture, focusing on the visual analysis and historical context of the world's most significant buildings and images.

• 4. Computational Thinking (Computer Science, Maths & Philosophy)

- Maynooth University
- **510** points
- **Overview:** Acquire hands-on programming skills, advanced problem-solving techniques, and learning to think logically and analytically when approaching complex problems developing your creativity and communication skills. Study Philosophy (seeking to understand and analyse human

knowledge and thinking) and advanced mathematics.

- **Why we recommended this:** Computational Thinking (Computer Science, Maths & Philosophy) connects your love for deep, philosophical inquiry with your high capacity for logic, focusing on solving complex problems through abstract reasoning and technology.

- **5. Sport Science and Health**

- Dublin City University
- **518** points
- **Overview:** Are you passionate about sport? Can you imagine supporting an elite athlete to the heights of their career or helping to coach a team to be among the best in the world? That's exactly what many of our Sports Science and Health graduates do, while many others make a massive impact in the community, helping people of all ages to enjoy and benefit from sport and exercise. During this course, you'll learn how to enhance health and human performance, and how to advocate for and champion a healthy, educated and active society. You'll encounter a range of teaching methods, including practical sessions, and develop key skills you can use in any career, including creative and critical thinking.
- **Why we recommended this:** Sport Science and Health combines your interest in human biology with your practical mindset, focusing on how scientific principles can be applied to optimize physical performance and community wellbeing.

- **6. Music Education**

- Trinity College Dublin
- **656** points
- **Overview:** If you love sharing music, already have a competent standard of music performance, and wish to combine these qualities with a teaching career, then this course is ideally suited to you. Whether your interests are primarily academic or practical, your experience of this vast and rich discipline will be greatly advanced. As an academic study, music fosters independence of thought, creativity and critical and analytical skills. This course offers opportunities to perform music, to share music with others via teaching and performing, and to conduct a number of different ensembles.
- **Why we recommended this:** Music Education bridges your passion for the arts and your desire to help others, allowing you to share your creative talents through teaching, performance, and academic exploration.

- **7. Design - Visual Communication**

- TU Dublin - Grangegorman
- **654** points
- **Overview:** The work of the Design - Visual Communication graduate is all about breathing life into images, text and concepts, turning them on their head and communicating them in a fresh way to a wide audience. This four-year course will suit you if you wish to become a graphic designer, illustrator, typographer or digital media designer.
- **Why we recommended this:** Design - Visual Communication channels your creative strengths into impactful media, using your eye for aesthetics to solve communication challenges through graphic design, illustration, and innovative digital storytelling.

- **8. Film**

- Trinity College Dublin
- **518** points
- **Overview:** Why do films affect us the way they do? Why did the introduction of sound change film forever? What do we mean by 'independent cinema'? What is a digital story world? These and many more are the questions that Film Studies asks students to consider in small-group lectures and seminars. In addition, over the course of your degree you'll be encouraged to respond creatively to critical issues via projects, presentations, short films and video essays, as well as to develop your screenwriting skills to see if you have a fresh vision to share with the world around you.
- **Why we recommended this:** Film aligns with your deep interest in the humanities and creative arts, encouraging you to analyze visual storytelling and develop your own unique vision as a screenwriter or director.

- **9. Computer Science, Linguistics and a Language**

- Trinity College Dublin
- **512** points
- **Overview:** B.A. (Mod) in Computer Science, Linguistics and a Language. CSLL combines the study of Computer Science; a natural language, either Spanish, French or Irish; and Linguistics. The computer science component of CSLL seeks to impart a mastery of the techniques and technologies that lie behind what you see on the screen of one of today's computers, giving you a full understanding the computer applications of today, and enabling you to participate in the development of the applications of the future.
- **Why we recommended this:** Computer Science, Linguistics and a Language links your logical thinking with your interest in humanities, exploring the complex relationship between technology and human communication through coding and linguistics.

- **10. Commercial Modern Music**

- TU Dublin - Grangegorman
- **585** points
- **Overview:** This four-year course has been designed for guitarists, bass players, drummers, vocalists, songwriters, music producers and those running commercial music projects who want to gain a Level 8 qualification in modern music, while at the same time fulfilling their creative and commercial potential. It will encourage you to hone your live performance skills and recording studio technical knowledge while also developing your career goals, which may include being a professional performer, professional songwriter or producer, music manager or publisher, academic researcher or teacher.
- **Why we recommended this:** Commercial Modern Music provides a platform for your high creative energy, helping you refine your performance skills while developing the professional knowledge needed to succeed in the music industry.

- **11. Interior Design**

- TU Dublin - Grangegorman
- **862** points
- **Overview:** This course is all about the art or process of designing the interior decoration of a room or building, and how we experience spaces and the objects in them. It's a powerful, essential part of our daily lives that affects how we live, work and play. Exciting recreational environments, unique domestic spaces, functional workplaces, inspiring retail spaces, that's interior design at work.
- **Why we recommended this:** Interior Design perfectly matches your strong creative vision and artistic flair, allowing you to transform physical spaces through both aesthetic beauty and functional, hands-on design principles.

- **12. Fine Art**

- TU Dublin - Grangegorman
- **701** points
- **Overview:** The BA in Fine Art is designed for students who wish to work as cultural producers in the Fine Art sector. The course is focused primarily on acquiring the knowledge and skills that are needed to operate as a visual artist in a competitive environment, nationally and internationally. There's a strong emphasis on developing skills acquisition, creative intelligence and conceptual and critical thinking abilities, which are integrated with modules in Critical Theory and Professional Practice.
- **Why we recommended this:** Fine Art offers a dedicated space for your high levels of creative expression and visual intelligence, focusing on developing

your unique artistic voice and technical skills as a professional.

- **13. Jazz and Contemporary Music Performance**

- Dublin City University
- **515** points
- **Overview:** The BA in Jazz and Contemporary Music Performance at DCU is a four-year, full time Honours degree which trains you for a life as a professional performing musician. To take to the stage as a performer demands intensive training as well as talent. Our degree course can help you on your way to a career as a professional musician. You will also understand the context of the international music scene today, how the music business works and how you can make your mark in it.
- **Why we recommended this:** Jazz and Contemporary Music Performance is ideal for your artistic profile, offering intensive training to master your instrument while providing the professional insights necessary for a successful performing career.

- **14. Theoretical Physics and Mathematics**

- Maynooth University
- **520** points
- **Overview:** Study the entire physical world from the microscopic to the cosmic - topics such as black holes, the Big Bang, quantum computing, elementary particles and the fundamental forces of nature, superconductivity, neural networks, matter in extreme conditions, and simulation of physical and biological systems. In this degree you will develop a deeper understanding of the various areas of modern mathematics, including analysis, algebra, geometry, and topology.
- **Why we recommended this:** Theoretical Physics and Mathematics challenges your profound analytical mindset, allowing you to explore the fundamental laws of nature through rigorous logical reasoning and advanced scientific problem-solving.

- **15. Sports Management and Coaching - GAA**

- SETU Carlow
- **700** points
- **Overview:** Sports management and coaching is an area of study that combines the techniques of sports management and coaching with the principles of business and enterprise. The field of sports management and coaching is changing rapidly. Professional sporting bodies require management and coaching staff to have an excellent understanding of their chosen sport, as well as strong business skills.
- **Why we recommended this:** Sports Management and Coaching - GAA leverages your hands-on nature and community leadership potential, combining practical physical activity with the organizational skills needed to guide athletic teams effectively.

- **16. Sports Management and Coaching - Rugby**

- SETU Carlow
- **700** points
- **Overview:** Sports management and coaching is an area of study that combines the techniques of sports management and coaching with the principles of business and enterprise. The field of sports management and coaching is changing rapidly. Professional sporting bodies require management and coaching staff to have an excellent understanding of their chosen sport, as well as strong business skills.
- **Why we recommended this:** Sports Management and Coaching - Rugby aligns with your preference for practical, outdoor environments and teamwork, providing a structured pathway to apply your leadership skills within a professional athletic context.

- **17. Sports Management and Coaching - Soccer**

- SETU Carlow
- **700** points
- **Overview:** Sports management and coaching is an area of study that combines the techniques of sports management and coaching with the principles of business and enterprise. The field of sports management and coaching is changing rapidly. Professional sporting bodies require management and coaching staff to have an excellent understanding of their chosen sport, as well as strong business skills.
- **Why we recommended this:** Sports Management and Coaching - Soccer suits your active, hands-on approach and social nature, focusing on the practical application of coaching techniques and the management of team dynamics.

- **18. Genetics and Cell Biology**

- Dublin City University
- **518** points
- **Overview:** By studying on this programme, you can come to understand the genetic basis for life and how this information can be used to investigate, diagnose and treat diseases. You'll also gain practical laboratory skills, as well as skills in communications, critical thinking and problem-solving. Furthermore, you'll gain skills in computational biology, which uses high-tech data analysis and modelling to help harness genetic and biological insights.
- **Why we recommended this:** Genetics and Cell Biology suits your high curiosity and scientific aptitude, providing the laboratory skills and theoretical knowledge needed to investigate the very building blocks of life and disease.

- **19. Business Studies**

- Dublin City University
- **510** points
- **Overview:** The Business Studies degree course is designed to give you an introduction to the foundations of business and guide you to a specialisation in economics, management, finance, marketing, HR or business analytics. The four-year course includes an optional 11-month paid work placement that gives you the opportunity to experience working in a real business environment. Alternatively, you can opt to spend a year at one of our partner universities in Europe.
- **Why we recommended this:** Business Studies utilizes your organized and structured approach to problem-solving, providing a solid foundation in economics and management to help you excel in professional and administrative environments.
