

RECOMMENDATION SET 1

- **0. Engineering**

- Trinity College Dublin
- **577 points**
- **4 Years**
- **Overview:** Engineering is about being creative in technical problem solving. Engineers make things possible by using mathematical and scientific principles together with analytical and design skills. They tackle existing problems by developing new solutions through innovative technologies. They also expand the frontiers of society by developing advanced materials, sustainable energy systems, construction technologies, transport systems, biomedical devices, and telecommunications infrastructure.

- **1. Mechanical Engineering**

- University of Galway
- **566 points**
- **4 Years**
- **Overview:** Mechanical Engineering is a subject concerned with the design and manufacture of parts and systems that make up the range of machinery and equipment you see around you, from a can opener to a jet aircraft. Mechanical engineers design the tools and processes necessary to create all man-made products, and are often involved from conceiving of an idea right through to seeing it as a finished product ready for its commercial application.

- **2. Aeronautical Engineering**

- University of Limerick
- **556 points**
- **4 Years**
- **Overview:** The Bachelor of Engineering (B.E.) and Masters of Engineering (M.E.) programmes are 4 years and 5 years in duration, respectively. Both include an eight month period of Cooperative Education spent in an appropriate industrial environment. The course provides a broad and practical programme of study, which gives you a good understanding of aircraft design, aerodynamics, structures, propulsion, control, materials, avionics, business and maintenance, and enables you to work in all sectors of the aerospace industry.

- **3. Engineering (Electrical & Electronic Engineering)**

- University College Cork
- **543 points**
- **4 Years**
- **Overview:** BE Electrical and Electronic Engineering is a four-year professional engineering course designed to prepare students for employment in the electrical and electronic sectors in Ireland and abroad. It has a broad curriculum with strong practical content, including a work placement. It has an excellent record for graduate employment.

- **4. Architecture**

- TU Dublin - Bolton Street
- **632 points**
- **5 Years**
- **Overview:** Architecture is the art and science of designing space. This course will suit you if you've got a creative aptitude for architectural design, the ability to implement your designs in practice, are interested in artistic and cultural aspects of society, and have an aptitude for technical and managerial challenges.

- **5. Architectural Technology**

- TU Dublin - Bolton Street
- **424 points**
- **4 Years**
- **Overview:** An Architectural Technologist is a technical designer skilled in the application and integration of architectural and construction technologies in the building design process. Architectural Technology is an immersive, full-time course, which will prepare you for practice and requires attendance five days a week. A studio setting provides a structured environment in which you will work alongside other students and be exposed to a variety of teaching and learning experiences.

- **6. Landscape Architecture**

- University College Dublin
- **485 points**
- **4 Years**
- **Overview:** The design studio is central to Landscape Architecture. You'll spend most of your time in the studio, pursuing individual and small group project work. You'll learn by doing design projects that allow you to develop creative skills and apply knowledge taught through lectures, seminars, drawing classes, field trips, reviews, readings, individual and group tutorials. In your third year you will also gain professional experience interning in a landscape related company / institution.

- **7. Building Engineering**

- TU Dublin - Bolton Street
- **490 points**
- **4 Years**
- **Overview:** Building engineers are at the heart of the building design process. They design, develop, install and implement the mechanical and electrical systems that ensure our buildings are safe, sustainable, comfortable, efficient and effective. Our graduates' impact and value lies at the leading edge-convergence of creative design vision and making it work through engineering and construction technology.

- **8. Mechatronic Engineering**

- Dublin City University
- **533 points**
- **4 Years**
- **Overview:** This course all about how we build intelligent machines through the meeting of mechanical systems such as engines and machines with the electronics needed to control them. This course perfectly blends mechanical engineering and electronic engineering. It offers classes in 3D modelling and design, for example, as well as circuit design and programming. Our students and staff are intrigued and inspired by the interplay between electronics and moving parts in connected devices and state-of-the-art machinery. Gain knowledge for the real world. In third year, you'll get to do a six-

month INTRA work placement and throughout the course, you'll do lots of project-based learning where you use the latest real-world tools and technologies to solve problems and, of course, build robots. That's not all. You'll also take some business-based modules, so you can learn how to develop a business plan and work with other parts of an enterprise. While you can go on from this course to work in either mechanical or electronic engineering, our graduates typically end up in roles where they incorporate one into the other. For example, they might put sensors into a machine to measure aspects of how it's working or develop control systems for a lift or a car. Either way, mechatronics graduates are in huge demand.

- **9. Electronic and Computer Engineering**

- Dublin City University
- **531** points
- **4 Years**
- **Overview:** Calling maths lovers! If you'd like to be able to fix a gaming remote or build a smart doorbell from scratch, you need to study Electronic and Computer Engineering. Across the first three years, you'll study the fundamentals of electronic engineering and programming. As this course covers a broad field, you'll choose one of four specialisms in fourth year: Systems and Devices (covering sensors, diagnostics and more), High-Speed Networks (such as fibre optics and 5G), Digital Interaction (including 3D interfaces and game design), and the Internet of Things.

- **10. Electrical & Electronic / Computer & Communications Engineering**

- TU Dublin - Grangegorman
- **490** points
- **4 Years**
- **Overview:** This course will educate you to an honours level in electrical and electronic engineering. It meets the educational standard required for chartered engineering membership of Engineers Ireland. You can specialise in Power Systems Engineering, Control Engineering, Communications Engineering, Electronic Engineering, or Computer Engineering.

- **11. Immersive Software Engineering**

- University of Limerick
- **651** points
- **4 Years**
- **Overview:** Immersive Software Engineering is a new computer science degree where you learn by doing. You get an integrated Bachelors/Masters qualification (level 9) in four years. You spend half your time learning on campus in a research-driven paradigm, in studios, working on projects, in teams, undergoing continuous assessment instead of end of term exams. You spend the other half of your time in paid residencies, where you solve some of society's toughest problems in excellent companies. The goal of Immersive Software Engineering is to turn curious, creative people like you into top notch problem solvers and software engineers, familiar with concepts, methods and tools, and with about 2 years of experience gained in the field in up to 5 companies.

- **12. Physics**

- University College Dublin
- **544** points
- **4 Years**
- **Overview:** The UCD Science (DN200) course offers 27 degree subjects categorised into streams. Students can study subjects from more than one stream in first year. It is also possible for students to change their stream in first year. At the end of first year, students choose a minimum of two subjects to study in second year (for example Statistics and Mathematics or Genetics and Microbiology). Students will major in one of these subjects in third and fourth year.

- **13. Biological, Biomedical & Biomolecular Sciences**

- University College Dublin
- **544** points
- **4 Years**
- **Overview:** The UCD Science (DN200) course offers 27 degree subjects categorised into streams. Students can study subjects from more than one stream in first year. It is also possible for students to change their stream in first year. At the end of first year, students choose a minimum of two subjects to study in second year (for example Statistics and Mathematics or Genetics and Microbiology). Students will major in one of these subjects in third and fourth year.

- **14. Earth and Environmental Sciences**

- University College Dublin
- **544** points
- **4 Years**
- **Overview:** The UCD Science (DN200) course offers 27 degree subjects categorised into streams. Students can study subjects from more than one stream in first year. It is also possible for students to change their stream in first year. At the end of first year, students choose a minimum of two subjects to study in second year (for example Statistics and Mathematics or Genetics and Microbiology). Students will major in one of these subjects in third and fourth year.

- **15. Energy Systems Engineering**

- University of Galway
- **520** points
- **4 Years**
- **Overview:** This course prepares you with the fundamentals of mathematics, physics, chemistry, and engineering, hands-on labs in our state-of-the-art facilities, energy-focused classes on topics like zero carbon energy systems, fuels and hydrogen, zero energy buildings, smart grids, and more.

- **16. Mathematics**

- Trinity College Dublin
- **578** points
- **4 Years**
- **Overview:** Mathematics is a broad and diverse subject which is used to model, analyse and understand several applications in the physical and biological sciences, engineering, management science, economics and finance. Its numerous applications are naturally interwoven with the underlying theory which is essential in developing one's logical reasoning, quantitative skills and problem-solving techniques.

- **17. Mathematics (Social Sciences Two Subject Combination)**

- University College Dublin
- **490** points
- **4 Years**
- **Overview:** Mathematics has long played a central role in our quest to fully describe and understand the natural world. Nowadays, it is also a vital tool in

many of the social sciences. Those who concentrate on this subject will gain an understanding of mathematical concepts and learn how to prove key facts and solve problems using deductive reasoning.

- **18. Statistics**

- University College Dublin
- **420** points
- **3 Years**
- **Overview:** If you are interested in studying Statistics with an Arts and Humanities or Social Science subject, then this degree could be for you. Statistics is the science of transforming data into knowledge and understanding, providing a principled approach to making data-informed decisions. Statistical methods enable us to gain insights from data, and with the advent of powerful computing technology, these methods have become widely used in many sectors.

- **19. Journalism**

- Dublin City University
- **409** points
- **3 Years**
- **Overview:** DCU's BA in Journalism is a top degree in Ireland designed to equip you with practical skills in reporting and writing for different media as well as providing you with essential knowledge in politics, law, ethics, society and culture. This degree will really appeal to you if you have an enquiring mind because the world needs journalists to analyse, examine and reveal how things work and what the future holds for people.

RECOMMENDATION SET 2

- **0. Dental Science**

- Trinity College Dublin
- **625** points
- **5 Years**
- **Overview:** Dental Science is the study of the oral cavity and the diseases associated with oral tissues. This five-year programme is designed to ensure that graduates can safely and effectively deliver the full range of primary dental care, including prevention, diagnosis and treatment of oral and dental diseases.

- **1. Economics and Finance**

- University College Dublin
- **625** points
- **3-4 Years**
- **Overview:** If you have a strong interest or ability in economics, maths and statistics, this degree provides everything you need for a future career in the areas of financial economics, banking and finance. Recognised as one of the premier degrees in its field in Ireland and internationally, it equips students with outstanding expertise in quantitative methods, analytical skills and a rigorous preparation in economics and finance. The skills that the course develops are valuable on their own in many careers and provide the essential background for learning Economics and Finance.

- **2. Management Science and Information Systems Studies**

- Trinity College Dublin
- **625** points
- **4 Years**
- **Overview:** Students learn how to use techniques from disciplines such as business, mathematics, computer science, statistics and management science to solve real world problems. There is also a firm emphasis on interpersonal skills such as verbal communication, interviewing, teamwork and report writing.

- **3. Global Business (USA)**

- Dublin City University
- **617** points
- **4 Years**
- **Overview:** Experience the world of work and study in the USA while you gain two business degrees, experience two countries and complete two work placements. The BA in Global Business (USA) is a passport to a career in international business. This unique course will give you a broad understanding of international business, as well as a rich intercultural experience, and high quality work placements with leading companies, in Ireland and the US.

- **4. Actuarial & Financial Studies**

- University College Dublin
- **613** points
- **4 Years**
- **Overview:** Studying UCD Actuarial & Financial Studies (BAFS) degree requires a multidisciplinary education in fields such as mathematics, economics, finance, statistics, risk management and professionalism. It takes a combination of strong analytical skills, business knowledge and understanding of human behaviour to design and manage programmes that control risk and guarantee sufficient funds for the insurance and pension sectors. Actuaries have traditionally worked mostly in the insurance and pensions industries but are increasingly moving into wider fields, where they can employ their range of skills. The course also opens up options to work in finance, investment and trading.

- **5. Engineering with Management**

- Trinity College Dublin
- **613** points
- **4 Years**
- **Overview:** Engineering with Management is concerned with the analysis, design, improvement, installation, and management of integrated systems of people, finance, materials and equipment. Our graduates have the technical skills common to all excellent engineers, with this knowledge augmented by an understanding of the commercial and industrial environment and the ability to generate innovative solutions to the problems of the world.

- **6. Law/Business Studies**

- Trinity College Dublin
- **613** points
- **4 Years**
- **Overview:** LawThe law degree will appeal to you if you are interested in society and how it works, how we regulate the relationships between people.

Given the wide range of legal modules, the degree attracts students with a broad range of interests. Business Studies This four year programme offers the opportunity to focus upon the many areas of overlapping interest between the two disciplines, for example, the structure of companies and other forms of business organisation, competition law and regulation of markets, consumer law, labour law, finance and financial markets, taxation, the protection of intellectual property and international perspectives on law and business.

- **7. Law/History**

- Trinity College Dublin
- **613 points**
- **4 Years**
- **Overview:** Law The law degree will appeal to you if you are interested in society and how it works, how we regulate the relationships between people. Given the wide range of legal modules, the degree attracts students with a broad range of interests. Those interested in politics are attracted to subjects such as constitutional law. History The History programme introduces students to the diversity of historical studies, which include modules covering medieval and modern periods, including Irish, European, and American history, as well as some modules exploring the skills and methods which historians use, and the kinds of debates in which historians engage.

- **8. Mathematics/Modern Language**

- Trinity College Dublin
- **613 points**
- **4 Years**
- **Overview:** Mathematics Mathematics is a broad and diverse subject which is used to model, analyse and understand several applications in the physical and biological sciences, engineering, management science, economics and finance. Its numerous applications are naturally interwoven with the underlying theory which is essential in developing one's logical reasoning, quantitative skills and problem-solving techniques. You can choose between German, Irish, Italian, Russian and Spanish. Apart from French and Irish all languages can be studied from both advanced and beginners level.

- **9. Mathematics/Music**

- Trinity College Dublin
- **613 points**
- **4 Years**
- **Overview:** Mathematics Mathematics is a broad and diverse subject which is used to model, analyse and understand several applications in the physical and biological sciences, engineering, management science, economics and finance. Its numerous applications are naturally interwoven with the underlying theory which is essential in developing one's logical reasoning, quantitative skills and problem-solving techniques. Music Studying music will allow you to engage with a range of traditions to acquire a profound understanding of how music works in theory and in creative practice. If you are interested in understanding music's place in society, developing music technology skills, writing music, or improving your skills as an informed performer, this course could be for you.

- **10. Mathematics/Philosophy**

- Trinity College Dublin
- **613 points**
- **4 Years**
- **Overview:** Mathematics Mathematics is a broad and diverse subject which is used to model, analyse and understand several applications in the physical and biological sciences, engineering, management science, economics and finance. Its numerous applications are naturally interwoven with the underlying theory which is essential in developing one's logical reasoning, quantitative skills and problem-solving techniques. Philosophy This course offers the opportunity to engage in depth with questions of metaphysics (about the fundamental nature of reality), epistemology (the theory of knowledge), ethics (theories of right and wrong), political philosophy (the nature of the just state), philosophy of religion (reasoning about God), philosophy of mind (questions about thought, language and reason) and various other areas.

- **11. Global Business**

- Trinity College Dublin
- **602 points**
- **4 years**
- **Overview:** The Global Business degree is a unique programme, designed for students who wish to focus on business from the very beginning of their degree. The degree is both innovative and practical with a strong focus on experiential learning. Trinity Business School places an emphasis on blended learning, where academic excellence meets industry experience with a keen focus on how business operates within the global economy.

- **12. Pharmacy**

- University College Cork
- **602 points**
- **5 Years**
- **Overview:** A pharmacist is a healthcare team member specifically concerned with drugs and medicines. Pharmacy at UCC provides the confidence, skills, and knowledge to make a difference in the pharmaceutical arena.

- **13. Actuarial Mathematics**

- Dublin City University
- **589 points**
- **4 Years**
- **Overview:** Actuarial Mathematics could be the perfect course for you. It's accredited by the Institute and Faculty of Actuaries, UK, meaning you may be exempt from some of the exams needed to qualify as an actuary in Ireland and the UK. Before you embark on learning essential actuarial knowledge and theories, you'll be given solid mathematical training. In your first two years, you'll study the fundamental mathematical principles that underpin the actuarial and financial models covered in later years. You'll also study computer programming, economics and accounting.

- **14. Biomedical, Health and Life Sciences**

- University College Dublin
- **589 points**
- **4 Years**
- **Overview:** This course will appeal to those with a keen interest in science and in how research and technology can impact on human health. It is training scientists at the interface of science and medicine. You will learn how scientifically driven investigations can advance our knowledge of disease prevention, detection and treatment and translating these into clinical utility. The course will immerse you in modern medical and biological sciences and focus on the application of scientific developments. BHLS offers students a unique opportunity to complete a research project with a Principal Investigator in a biomedical research area that interests them and an opportunity to be involved in peer-reviewed publications.

- **15. Law and French**

- Trinity College Dublin
- **589** points
- **4 Years**
- **Overview:** The Law and French degree programme offers a unique opportunity to study core and specialised legal modules but also the language, culture and political systems of France. Students must undertake an Erasmus year in France, exposing them to the law of that legal system.

- **16. Physiotherapy**

- University of Limerick
- **589** points
- **4 Years**
- **Overview:** The Bachelor of Science in Physiotherapy is a four-year degree programme which includes a total of 31 weeks of clinical practice in the last two years of the programme. The first year provides a foundation in Anatomy and Physiology, communication and behaviour, and an Introduction to Physiotherapy Practice. Over the remaining three years you will undertake studies in the various disciplines of physiotherapy including cardiorespiratory care, clinical neurology and musculoskeletal disorders for people across the lifespan. Research and evidence-based practice are core elements underpinning the programme.

- **17. Philosophy, Political Science, Economics and Sociology**

- Trinity College Dublin
- **581** points
- **4 Years**
- **Overview:** Philosophy, Political Science, Economics and Sociology (PPES), offers a coherent and integrated introduction to the study of social sciences and philosophy. It brings together some of the most important approaches to understanding society and, in doing so, develops skills for a range of future careers and activities.

- **18. Economics/Geography**

- Trinity College Dublin
- **578** points
- **4 Years**
- **Overview:** EconomicsAny society has to address the problem of how and what to produce for its material survival, and how the goods and services that are produced should be distributed among its population. Economists explore how people and institutions behave and function when producing, exchanging and using goods and services. GeographyGeography is the study of Earth's landscapes, peoples, places and environments. Fundamentally it is about the world in which we live. Geography offers a 21st century education by uniquely bridging the social sciences (human geography) with the natural sciences (physical geography). Geography also covers increasingly important environmental issues where humans affect physical environments and vice versa.

- **19. Economics/History**

- Trinity College Dublin
- **578** points
- **4 Years**
- **Overview:** EconomicsAny society has to address the problem of how and what to produce for its material survival, and how the goods and services that are produced should be distributed among its population. Economists explore how people and institutions behave and function when producing, exchanging and using goods and services. HistoryThe four-year programme allows students to lay firm foundations in the first two years, with wide-ranging modules on medieval and modern history, Irish, European, American, environmental and global history, as well as on historical methods and approaches. The final two years of the programme allow students the chance to study several specialist modules in-depth and to undertake independent research on a subject of their own choice.
